ELECTIVE PAPER - I

**TOURISM -
PRINCIPLES AND PRACTICES**

**INSTITUTE OF DISTANCE EDUCATION
UNIVERSITY OF MADRAS**

WELCOME

Warm Greetings.

It is with a great pleasure to welcome you as a student of Institute of Distance Education, University of Madras. It is a proud moment for the Institute of Distance education as you are entering into a cafeteria system of learning process as envisaged by the University Grants Commission. Yes, we have framed and introduced Choice Based Credit System(CBCS) in Semester pattern from the academic year 2018-19. You are free to choose courses, as per the Regulations, to attain the target of total number of credits set for each course and also each degree programme. What is a credit? To earn one credit in a semester you have to spend 30 hours of learning process. Each course has a weightage in terms of credits. Credits are assigned by taking into account of its level of subject content. For instance, if one particular course or paper has 4 credits then you have to spend 120 hours of self-learning in a semester. You are advised to plan the strategy to devote hours of self-study in the learning process. You will be assessed periodically by means of tests, assignments and quizzes either in class room or laboratory or field work. In the case of PG (UG), Continuous Internal Assessment for 20(25) percentage and End Semester University Examination for 80 (75) percentage of the maximum score for a course / paper. The theory paper in the end semester examination will bring out your various skills: namely basic knowledge about subject, memory recall, application, analysis, comprehension and descriptive writing. We will always have in mind while training you in conducting experiments, analyzing the performance during laboratory work, and observing the outcomes to bring out the truth from the experiment, and we measure these skills in the end semester examination. You will be guided by well experienced faculty.

I invite you to join the CBCS in Semester System to gain rich knowledge leisurely at your will and wish. Choose the right courses at right times so as to erect your flag of success. We always encourage and enlighten to excel and empower. We are the cross bearers to make you a torch bearer to have a bright future.

With best wishes from mind and heart,

DIRECTOR

**ELECTIVE PAPER - I
TOURISM - PRINCIPLES AND
PRACTICES**

COURSE WRITER

Dr. M. THENMOZHI

Assistant Professor

Department of History

Queen Mary's College (Autonomous)

Mylapore, Chennai – 600 004

COORDINATION & EDITING

Prof. Dr. S.S. Sundaram

Professor and Head

Department of Indian History

University of Madras,

Chepauk, Chennai - 600 005.

M.A., DEGREE COURSE
FIRST YEAR -
FIRST SEMESTER
Elective Paper - I
TOURISM - PRINCIPLES AND PRACTICES
SYLLABUS

UNIT I

Meaning, Nature and Scope of Tourism – Origin and Growth of Tourism – Components of Tourism – Kinds of Tourism – Modes of Transport – Motivation for Travel – Socio-economic significance of Tourism.

UNIT II

Tourism Culture – People's instinct for travel – Tourism as an Economic Activity – Tourism as a Merchandise – Domestic and International Tourism – Employment Potentials – Tourism Centres in India.

UNIT III

Tourism Infrastructure – Accommodation – Hotels and Motels – Transport – Role of Travel Agencies – Ticketing.

UNIT IV

Tourism Planning and Administration in India – India Tourism Development Corporation (ITDC) – Government Departments and Non-Government Agencies.

UNIT V

Tourism Industry in Tamil Nadu – Tourist Centres in Tamil Nadu – Growth and Development of Tourism in Tamil Nadu – Tamil Nadu Tourism Development Corporation (TTDC)

Books for Reference:

1. A.K. Bhatia – Tourism Development: Principles and Practices
2. Ratandeep Singh – Dynamics of Modern Tourism
3. Robinet, Sindhu Joseph, Anoop Philip – Indian Tourism Products
4. Jagmohan Negi – Tourist Guide and Tour Operation
5. V.K. Gupta – Tourism in India
6. R.C. Majumdar – History of Cultures of Indian People
7. R.K. Sinha – Growth and Development of Modern Tourism
8. Douglas Foster – Travel and Tourism Management

LESSON 1

INTRODUCTION TO TRAVEL AND TOURISM

Learning Objectives

After reading this lesson, you will be able to

- ❖ Understand the meaning, nature and scope of Tourism in India
- ❖ Acquire knowledge about the origin and growth of travel and early travelers it also explains how the concept of Tourism emerged
- ❖ Learn about the changing market destination and the emergence of annual holidays

Structure

- 1.1 Introduction**
- 1.2 Growth of Modern Tourism**
- 1.3 Scope of Tourism Development**
- 1.4 Origin and Growth of Tourism**
- 1.5 Earliest Travelers to the Indian soil**
- 1.6 Changing Market Destination Patterns**
- 1.7 The Concept of Holidays**
- 1.8 Let us sum up**
- 1.9 Answers to check your progress**

1.1 Introduction

Tourism is a basic and most desirable human activity deserving the praise and encouragement of all people and all governments.” It is an industry concerned with attracting people to a destination, transporting them, providing housing, feeding and entertaining them upon arrival and returning them to their homes. A quarter of a century ago, travel was the privilege of a few rich, affluent and adventurous people. Today, with the rise in the standard of

living of people in several developed and developing countries along with fast technological revolution in transportation industry, overseas holidays are within the reach of middle and working class. Travel, today, is sold like any normal consumer product through retail outlets, wholesalers, and even departmental stores of many countries. More and more people with small incomes are making overseas travel possible.

1.2 Growth of Modern Tourism

Modern tourism is impressed by the mass travel growth, concords, supersonic flights, resurgence of cruise ship travel and many similar developed phenomena. Toll-free telephone service makes it easy and convenient for potential tourists to call for information and reservations. Computerized reservation system facilitates the answering of inquiries and booking of airlines reservation. Tours car rentals, hotels and automatic ticketing machines are facilitating for dispensing airlines tickets covering each segments of the passenger's itinerary at the applicable fare. In the coming years the air plane will travel faster. More and more people will be able to travel great distances in comparatively brief span of time. Travel will be relatively inexpensive. The introduction of lower fare will give rise to mass travel requirements. Due to redistribution of income trend in the developing nations, sources will be available for air travel and the leisure requirements. There will be new hotels, new air routes, and new tours for the general public. Everyone in the future will know all about cruises and air travel tours to distant lands.

In addition to a leisure time activity, tourism has many facets: cultural tourism, religious tourism, etc. Similarly, group tourism, has to be taken into consideration to offer the right type of product to the individual travelers as also the travelers moving in groups.

Tourism is not only an economic activity of importance to national development, but also an important medium of cultural changes among nations of the world. A lot of emphasis has been laid on the economic role of tourism, its contribution to the foreign exchange earnings of the nation and its potential for greater employment. It is time to understand the important role of tourism as a means of social education and social mobilisation in the country itself, as a competing force for fostering better understanding among nations of the world for developing closer cultural and business relations and as a competing force for developing closer cultural and business relations and also as a significant factor, contributing to world peace. "The full

impact of tourism on the national economy is not just through expenditure on the front line tourist trade. It embraces all those industries which have been called upon at various stages of the process to supply goods or services. The output produced by the industries which are outside the direct tourism sector are, in very real sense, due to the needs of the tourist who spends the money in the first place and sets the whole thing going."According to Richards, there are two sets of links between tourist spending and the economy. Firstly, the broad consumption items which have a direct affect. These relate to the actual expenditure involved on tourism, e.g. transport, accommodation, food and drinks, shopping services etc. Secondly, the links between the trades directly involved in tourism and those trades and industries which supply the tourism trade with goods and services.

1.3 Scope of Tourism Development

India has great tourism potentials for it is our unique diversification of cultural and natural attractions which contribute the resources for this industry. India has an ancient civilisation that is preserved in its religion customs, traditions and architecture. It has a distinctive culture and way of life. It abounds in temples that would certainly interest many visitors. Its traditional dances and music are loved by all. It has varied and spectacular scenery including snow-capped mountains, glaciers, boiling pools, unique glow warm caverns, beautiful lakes, fine beaches and appealing mountains, with exciting wildlife, lovely deserts, a manifestation of history which goes back to more than 5,000 years. This has resulted in historical monuments of great antiquity like the stupas in Sanchi, of beautiful monument of Taj Mahal, and many other illustrations in art and architecture of fabulous temples, mosques and churches. In this region are represented the great faiths of the world—Hinduism, Buddhism and Islam. This region offers to the tourists, the most exciting costumes, foods and festivals.

A unique asset of tourism is that there is no shortage of raw materials. India's unique variety of cultural and natural attractions constitute the resources for this industry.

India is the second most populous and sixth largest country in the world. Lying entirely in the northern hemisphere and spanning 5,000 years of history has much to offer to the tourist world. It measures about 3,214 kms from east to west between the extreme longitudes. It has a land frontier of 15,200 kms and a coastal line of 6,100 kms.

India is vast by high area on three sides and protected by the great Himalayas on the north. It is joined in the north by China and Nepal, a series of mountain ranges separate it from Burma. In the east lie Bangladesh, in the north are situated Pakistan and Afghanistan. In the south the country tapers off into the Indian Ocean between the Arabian Sea, on the west and the Bay of Bengal on the east. The gulf of Mannar and the Palk Strait separates India from Sri Lanka. The Laccadive, Minicoy and Aminidivi Islands in the Arabian Sea and Andaman and Nicobar Islands in the Bay of Bengal are parts of the territory of India. Thus India is cut-off from the main land of Asia by the Himalayan mountains, the highest mountain range in the world. Going from west to east along the country's land frontiers are Pakistan, Turkestan, China and Burma. Geographically, India consists of three distinct units:

- (i) Himalayas and their associate group of mountains;
- (ii) The Indo-Gangetic plains that runs parallel to the southern foot hills of the range;
- (iii) Southern Peninsula or Deccan Plateau that occupies most of the central and southern parts of the sub-continent.

The peculiarity of the main land is that the Himalayas range is dramatically high.. The Indo-Gangetic plain is a nice plain with hardly a variation in altitudes from sea to shining sea, and the southern peninsula is a fairly high plateau with coastal strips.

There are four main important seasons in India:

- (i) Winter season-starts in December and ends in February
- (ii) Summer season-starts in March and ends in May
- (iii) Rainy season starts in June and ends in September
- (iv) Post-monsoon period-starts in October and ends in November.

From the Himalayas to Kanyakumari the climate varies and so the people, their customs and traditions. A bracing cold sweeps over most of India from November to February followed by brief spring. Then comes the hot weather. There is more and more seasonal variation in temperature in the northern part. The winter are much colder there. In the rest of the country the temperature ranges from warm to hot all year round. April and May are the hottest months. In the inland areas, like Rajasthan temperature sometimes goes up to 120 degrees Fahrenheit during those months.

The amount of humidity and rainfall also varies a great deal throughout India. The Malabar Coast and the area around Kolkata in the West Bengal receive the heaviest-rainfall and have the most humid weather. There are areas which get more 80 inches rainfall in a year. Nearly all the rain falls during the rainy season. India's prevailing wind, the monsoon, is responsible for the distinct rainy and dry season. In summer it travels northward and from the Indian Ocean bearing moisture. In winter it travels, southward from Siberia and is dry by the time it reaches India.

The rivers in India may be classified as-Himalayan rivers, Deccan rivers, and Coastal rivers of the inland drainage. The Himalayan rivers are generally snow-fed and have continuous flow throughout the year. The Deccan rivers are generally rained, and therefore, fluctuate in volumes. The coastal streams, specially of the West Coast are short in length and have limited catchment areas. The streams of the inland drainage basin of western Rajasthan are few and far between. The Ganges basin is the largest in India. The Ganga has two main head waters in the Himalayas—the Bhagirathi and the Alaknanda—the former arising from the Gangotri Glacier at Gaumukh. The Ganga is joined by a number of Himalayan rivers, the Jamuna, the Ghagra, the Gandak and the Kosi. The chief rivers of the Deccan are the Mahanadi, the Godavari, the Krishna, the Tungabhadra and the Cauvery.

India is more remarkable for her extreme diversity of physical features. Its population represents a veritable museum of races representing almost all ethnic groups of the world with their characteristic features. The discoveries of Harappa cultures in the early part of this century has placed India on the map of early culture comparable in many of its characteristics to the contemporary civilisations of Egypt and Sumerian. The decline of the civilisation and the rise of the Aryans may be considered as the turning point of the Indian history. Nature and history both have made India one of the most attractive tourist country of the world. It offers everything in a rich variety-mountains and hills, valleys, highest peaks, sea beaches, landscape, scenic beauty, monuments and memorials, traditional art and the dances, fair and festivals and dozens of other precious things which made the country a mosaic of living traditions.

Tourism needs variety and India with its vast dimensions and diversity offers to every class of visitors something not found elsewhere—from the snake charmer to the eternal

snowcaps peaks of the Himalayas and system of the folk dances to the big games. Unlike other export industries, there is comparatively little investment needed for promoting tourism. The scope for its expansion is unlimited. Today, we find that a number of factors are coming into proper focus and are an integral part of much larger tourism industry.

Tourism is travel, relaxation, a holiday, an exposure to other cultures. It is an industry, a source of income especially of foreign exchange, an exercise in national image building. India has fantastically rich and varied tourist potential. The tendency of tourists is to delimit India to a set of monuments or scenic marvels. India thus becomes Khajuraho, Gulmarg, the Taj Mahal and Mahabalipuram, with little or nothing in between except a few necessary stop-over's. To enlarge this focus, the places of interests and the resorts for tourism need to be developed and the amenities and services provided for tourists can be gradually expanded. There are historical temples, monumental attractions, the Himalayas, the Ganges, the Taj Mahal, beautiful sea beaches and other types which are bound to create interest in foreign tourists.

The vast and beautiful country like India, its rich and colorful attraction, deserve a substantially greater tourist inflow than so-called other foreign tourist paradise which have least of almost everything offer but which somehow manage to get more tourists a month than India does in a year

Tourism in India is economically important and it is growing rapidly. The world Travel and Tourism council calculated that tourism generated Rs. 15.24lakh crore (US \$ 230 billion) or 9.4 % of GDP in 2017 and supported 41.622 million jobs,8% of employment. This sector is predicted to grow at an annual rate of 6.9% to Rs 32.05 lakh crore(US\$ 480 billion)by 2028 (9.9%) GDP. In 2015 , India's Medical Tourism sector was estimated to be worth US\$ 3billion. It is Projected to grow to \$7-8 billion by 2020. In 2014. 184,298 foreign patients visited India to seek medical treatment.

1.4 Origin and Growth of Tourism

1. Early Inventions for the Means of Travel

In the Neolithic age, several innovations were made which changed the nature of travel. Around 4000 B.C. sailing vessels were built in Egypt. It was also during this period that animals

were domesticated and trained to carry and transport community members, tools and agriculture supplies. Invention of the wheel during this period was also an important landmark which made movement of people to distant lands possible. The Sumerians invented the wheel around 3500 B.C. Invention of the wheel had considerably reduced the burdens of travel as also distance. It was now possible to travel hundreds of miles to new lands in search of fortune.

2. Early Efforts For Travelling

Most early travel, however was not undertaken for the purposes of pleasure since the motive was not to seek any holiday from the work situation. The primary motive for which the travel was undertaken was related to trade, exchange of goods, commerce and the activities associated with it. The traveller in the ancient past was thus a trader and a merchant looking for merchandise and engaging in trade and commerce.

3. Travel For Trade and Commerce

Most early travel was associated with trade and commerce. Throughout history, traders and merchants have travelled to far off lands in order to trade with other regions and communities. Travellers from distant lands started moving about in large numbers and visited many places for the purposes of commerce. With the gradual opening of the trade routes, travel became easier as well as regulated. At the market-places, travellers made contacts with each other, resulting in increased flow of trade and commerce. Trade relations gradually matured into cultural relations and better understanding of each other's way of life. This was a favourable development towards increase in travel activity during this period.

Early travel in the orient, particularly in India and in China, was also largely based on trade and commerce. Travel to India in particular was undertaken by travellers from all over the ancient world. Both India and China enjoyed the reputation of being countries of fabulous wealth where Trade and commerce flourished. It is on record that long before the Christian era, travellers visited India in search of fortune. This trend continued and became more marked in course of time with Europeans heading towards Indian shores for the sole purpose of trade and commerce.

4. Travel for Exploring New Lands

The urge to explore new lands and to seek new knowledge in ancient and distant lands was yet another motive of travelers in subsequent periods. Although trade and commerce continued to be the strong force for many travellers to undertake journeys to distant lands, seeking new knowledge and exploring the unexplored lands was becoming a strong urge in ancient times. Homer's great work 'Odyssey' records the wanderlust of the ancient Greeks and Romans.

5. Travel for Religious Purposes

Travel for religious purposes assumed a significant importance during middle ages and became a well established custom in many parts of the world. By the end of the Middle Ages, a large number of pilgrims were travelling to the main shrines in Europe and elsewhere. The adoption and spread of Christianity subsequently led to numerous pilgrims making their way to the holy land. So deep and strong was the hold of faith that the ritual of pilgrimage flourished over the centuries.

6. Events of Travelling in Ancient India

Pilgrim travel assumed a great importance in India. Emperor Ashoka traveled a great deal in his eagerness to spread doctrines of Buddha. Ashoka and his entourage first traveled to Nepal starting from Patliputra and then ventured to Lumbini Gardens, the land of Buddha's birth, on the Kapilavastu, the place where Buddha spent his childhood. From here, he went to Sarnath, where Buddha spent many years of his life and finally to Gaya, where Buddha got enlightenment. Through his travels, Emperor Ashoka had special memorials set up at each spot and also rest houses where travellers could rest. Harsha was another emperor who was greatly influenced by the Buddhist scriptures. He built institutions and Dharamshalas for the travellers. Rest houses were built in towns and villages, numerous monasteries and temples were also built for the pilgrims. The powerful influences of a crusading religion that slowly penetrated a foreign land, such as Christianity in Europe and later in America and Buddhism, Islam and Hinduism in Asia allowed an assimilation and perpetuation of very distinctive languages, literature, art, architecture, philosophy and forms of government. Religion thus played and continues to play a crucial part in travel.

1.5 Earliest Travelers to the Indian soil

Perhaps the earliest travelers from distant lands to the Indian soil were the trading Persians. Evidence of caravans of Persians visiting India lies engraved in the inscriptions dating to the Persian king Darius. During the rule of the Guptas, there was free access to the ports along the Western Coast, seaborne commerce with Europe through Egypt was yet another reason for travel in and around the country. There are also references of many known Persians, who visited the Indian soil for commerce and trade. There is also a mention of cultural exchanges between Persia and India. Reference has also been made to the influence of Persian customs in the court of Chandragupta Maurya. Great traveller from various faraway lands visited India. Probably the greatest traveller remembered from the distant past in Hieun-tsang. A devout Chinese Buddhist, he made the perilous journey to India around A.D. 633. His main mission was to collect and translate ancient Buddhist scriptures. Some other travellers whose names need special mention are Alexander the Great, Marco Polo, Benjamin of Tudela, Ibn Batutah, Francisco Friar, Alfonso D' Albuquerque and Mark Twain.

One of the important developments during this period was the emergence of some sort of communication system and accommodation. Development of trade and commerce necessitated this development. Shulgi, the ruler of ancient Babylonia, claimed to have built roads and rest houses at various places for wayfarers. With trade and commerce forming a link in development, it was inevitable that some sort of communication system connecting the centres of trade, commerce and learning were found to be in good shape. When Alexander the Great, during his journeys, reached India, he found well maintained roads covered with shady trees. Along one royal highway, 1,920 kilometres long and about 19 meters wide, people travelled in chariots, palanquins, bullock carts, on horses, camels and elephants.

1.5.1 Travel Accounts of Adventurers

The great travellers who ventured to explore distant lands had fascinating accounts of their travels. Even if we go back just a few hundred years to the third century A.D., since the first exploration of Alexander the Great, or only about seven hundred years since Marco Polo, and their amazing explorations crossing many lands we get fascinating accounts of the travels of these great persons.

- (a) **Benjamin:** The first medieval traveler to reach the orient was probably Benjamin of Tudela, a Jewish scholar, who left Saragossa in the year A.D., 1160. He wrote a detailed account of his thirteen-year long journey through Europe, Persia and India, giving information on the Jewish communities, and the geography of various places he had visited.
- (b) **Ibn Battuta:** Another famous traveler who recorded interesting accounts of his travel experiences was Ibn Batutah. Ibn Batutah wrote a detailed diary of his travel experiences. He was born at Tangier in A.D. 1304. In the year A.D. 1325, he left his home and passing through various countries in Africa and West Asia. crossed the Sindhu in A.D. 1333. His travel took him to places as far as Indonesia and China. Out of a total of more than 17,000 miles, he covered more than 14,000 miles in the course of his travels through India, the Maldives and Ceylon.
- (c) **Marco Polo:** Marco Polo, the fearless traveller, spent almost twenty-five years in Asia during the latter part of the 13th century. His wanderlust could well have been inherited from his father. Young Marco Polo left Venice in the year 1271 with his father and uncle. The three together travelled through Persia and Afghanistan to the “roof of the world”, the then unknown Pamir Plateau. After crossing the wind-swept Gobi desert, they reached Kublai Khan’s palace and remained in China for over twenty years. On his way back home, he stopped in Sumatra, Java, India and Ceylon. Marco Polo’s description of a place Zipangu (the present day in his memoirs, set the course for Columbus on his historic journey in 1492.)
- (d) **Other travelers:** Two of Columbus’s contemporaries who also became famous and wrote excellent accounts were— Vasco da Gama who opened the sea route from Western Europe to India in 1498 and Ferdinand Magellan whose ship sailed around the world. Francisco Friar. John of Monte Corvino also visited India on their way to a ay to and back from China during the decade of the thirteenth century. Mention may also be made of the famous Portuguese chronicle, the Commentaries of the Great Alfonso D’Albuquerque.

In the sixteenth and seventeenth centuries more European monks, travellers and adventurers visited India and many other places in search of knowledge. The first great sailor to do a westward circumnavigation of the world was Francis Drake who was knighted by Queen Elizabeth I in the year 1581. From 1768 to 1779 Captain James Cook made three long voyages

to the Pacific in search of a non-existent southern continent mentioned by Ptolemy who, earlier in the 2nd century A.D., had travelled widely and who wrote an eight-volume work on geography

1.6 Changing Market Destination Patterns

1. Early Pleasure Travel

- (a) **Romans and Their Spas:** The concept of pleasure travel as it existed in the west can be associated with the Roman empire. Romans probably were the first pleasure travellers. Travel received a great stimulus from the good communication system and security of the Roman empire. There existed a fine network of roads and new roads were built increasingly wherever the Romans went. Travel literature was published extensively giving routes, the names of the roads, distances between places and time required in travelling to them. The Romans were able to travel over a hundred miles in a day using relays of horses. They journeyed primarily to see famous temples in the Mediterranean areas, particularly the monuments and the famous pyramids of Egypt. The Roman travelled during holiday occasions, particularly the famous Olympic Games. Spas and seaside resorts which developed during this period may be associated with pleasure travel. Medicinal baths and seaside resorts which later were named as spas were popular with the Romans. The inland spa had its origin in a belief in the efficacy of its mineral waters for medicinal purposes, either by drinking the water or by immersing in it. The patients using the spas would require certain diversions, and gradually, the spa resorts added facilities for pleasure and entertainment to medical facilities. The visitors now not only enjoyed medicinal baths but also various forms of entertainments. Theatrical productions, athletic competitions, festivals and other forms of entertainments and amusement were often provided at the sites where spas were located. The spas had become extremely popular with travellers.
- (b) **Spas and the Seaside Resorts:** Subsequent development of spas, after their original use for recreational purposes by the Romans, played a big role in the development of pleasure travel in many countries in Europe. Development of various seaside resorts is also linked with the latter half of the eighteenth century, when people started realising the possible curative effects of sea water. Sea bathing also became very popular and many believed that bathing in sea water was more beneficial than inland spas. The seaside

resorts began to appear as an alternative to the original inland spa. By the year 1865, there were major seaside resorts in Britain, France, Italy and a few more countries of Central Europe. Thus development was a result of a demand for vacation travel. However, the use of these resorts was still confined to those with considerable means. Nevertheless, both the spas and the seaside resorts paved the way for the modern pleasure travel all over the world where millions of people visited various seaside resorts each year. The fall of the Roman empire in the fifth century was a great setback for pleasure travel in Europe. During the Dark Ages only the very adventurous and brave persons would travel. A trip in this period in history was considered dangerous. No one would associated travel with pleasure. Also with the decline of the Roman empire came a sharp decline in trade and commerce. In the absence of a prosperous community with the incentive to travel for pleasure, travelling ceased to exist for its own sake.

2. The Grand Tour

- (a) **The Renaissance:** The Renaissance marked the next important stage in the history of travel. The reappearance of tourism in Europe follows the Italian Renaissance and the development of a full scale urban system and network of roads. By the end of the fifteenth century Italy itself became the object of attention. At this time Italy was Europe's economic and cultural leader. It was, however, totally disunited politically. Wars were fought on Italian soil. These wars played an important part in the dissemination of the Renaissance and the subsequent development of the grand tour". Although it declined materially, Italy was still the 'intellectual' capital of Europe. For the aristocracy and intelligentsia of north-west Europe it represented both the classical heritage and all the latest ideas and inventions. A growing number of young noblemen were being sent abroad to complete their education in France and Italy.

1.7 The Concept of Holidays

- (a) **Annual Holiday:** The introduction of Annual Holiday in Europe was yet another important landmark which enabled many people to undertake travel in large numbers during the eighteenth century. The annual holiday was the forerunner to the 'paid holiday' which later on was responsible for an extraordinary growth of tourism during the twentieth century.

The term holiday derives from holy days associated with religious observances. In the present day parlance it is used generally in a secular sense meaning a respite from the routine of daily workday life and a time for leisure, recreation and amusement.

- (b) **Public Holiday:** A feature of ancient Rome, public holidays were among the most enjoyable events of the period. The most important and enjoyable public holiday was known as “Saturnalia” the feast of Saturn-celebrated in the month of December, where everybody high or low in status indulged in feasting and frolic. Also in Europe certain days commemorating religious festivals and saints’ days became holy days on which there was holiday from work. In the year 1552 in England an act was passed during the reign of Edward VI “for the keeping of holidays and fasting days.” This act still continues to be on the Statute Book. Subsequently, public and semi official offices in England frequently closed on certain saints’ days. There were, however, no general public holidays until the time of the Industrial Revolution. The concept of modern annual paid holiday is very largely an outcome of the post Industrial Revolution.
- (c) **Holidays to Satisfy Curiosity:** The so called ‘travel bug’ of modern parlance had its seeds in the ancient past. Although the purpose and motives for travels in the subsequent periods underwent a great change, the urge to travel has always been there. The growth and development of travel has been closely linked with the growth and development of society as a whole. The travellers of the ancient past were in fact the explorers in search of knowledge of different lands, of people, their cultures and their traditions. They were also traders interested in development of trade and commerce. In fact, these very developments paved the way for development of travel in the subsequent periods.

Check Your Progress

I Each answer should not exceed 50 words

- (a) Indo Gangetic plain
- (b) Sumerians
- (c) Early pleasure Travel

II Each answer should not exceed 250 words

- (a) Discuss the early Travel accounts
- (b) Briefly write about the Grand Tour
- (c) Describe the concept of Holidays

III Each answer should not exceed 500 words

- (a) Explain in detail about the Scope of Tourism in India
- (b) Discuss the origin and growth of Tourism

1.8 Let us sum up

You have learnt from this lesson the origin and growth of tourism and also the development of Modern Tourism. The early great travellers who ventured to explore distant lands had fascinating accounts of their travels which were discussed in this lesson. The Renaissance marked the next important stage in the history of travel and the concept of holidays were also studied in this lesson.

LESSON 2

TOURISM COMPONENTS

Learning Objectives

After reading this lesson, you will be able to

- ❖ understand the basic components of tourism industry
- ❖ learn about the significance of the elements of tourism
- ❖ study the various aspects and forms of tourism

Structure

- 2.1 Introduction**
- 2.2 Transport**
- 2.3 Locale**
- 2.4 Accommodation**
- 2.5 Elements of Tourism**
- 2.6 Kinds of Tourism**
- 2.7 Let us sum up**
- 2.8 Answers to check your progress**

2.1 Introduction

The force behind this very complex activity encompassing a wide range of relationships in tourism is a phenomenon of modern times. Understanding the meaning and the nature of this phenomenon and its various components is very essential. In order to understand tourism systematically, it is necessary to know the various components which together make tourism happen. Three of these are considered to be basic:

- (a) Transport
- (b) Attractions/Locale
- (c) Accommodation

2.2 Transport

There can be no travel if there were no transport. Travel involves movement of people and this is possible only if there is some mode of transport. Connectivity is very vital for tourism development. This could be possible only if adequate transportation infrastructure and access to destination is efficient, comfortable and inexpensive. A tourist, in order to get to his destination therefore, needs some mode of transport. This mode of transport may be a motor car, a coach, an aero plane, a ship or a train which enables a traveller to reach his pre-determined destination as per his budget.

1.Transport

- Air Transport
- Rail Transport
- Road Transport
- Ocean Transport
- Tourism Components

2.Accommodation

- Resort Complexes
- Hotels
- Motels
- Youth Hostels
- Holiday Centres
- Inns
- Farm Houses
- Sleeper Trains
- Campsites
- Caravans

- Villas
- Apartments
- Religious places as gurudwaras & Temples

3.Attractions

- Ancient Monuments
- Historical Building
- Theme Parks
- Wildlife Attractions
- Museums
- Art Galleries
- Archaeological sites
- Cultural Centres
- Amusement and Leisure Parks
- Beaches
- Mountains
- Open Countryside
- Climatic Features

2.3 Locale

The locale may include the holiday destination and what it offers to the tourist. The holiday destination may offer natural attractions like sunshine, scenic beauty or sporting facilities, etc. The locale, with its attractions and amenities, is the most important as these are very basic to tourism. Unless these are there, the tourists will not be motivated to go to a particular place. However, since interests and tastes of tourists vary widely, they might choose from a wide range of attractions available at various destinations all over the world. Tourist demands are also very much susceptible to changes in fashion. Fashion is an important factor in the demand

for various tourist attraction and amenities. The tourists who visit a particular place for its natural beauty may decide to visit some other attractions due to a change in fashion. Peter an author on Tourism has drawn up an inventory of the various attractions which are of significance in tourism. The five categories are given in the following table.

PETER'S INVENTORY OF TOURIST ATTRACTIONS

1. Cultural	: Sites and areas of archaeological interest; Historical Buildings and monuments; Places of historical significance; Museums; Modern culture; Political and educational Institutions, Religious institutions.
2. Traditions	: National festivals; Arts and handicrafts; Music; Folklore; Native life and customs.
3. Scenic	: National parks; Wildlife; Flora and fauna; Beach resorts; Mountain resorts.
4. Entertainment	: Participation and viewing sports; Amusement and recreation parks; Zone and oceanariums; Cinemas and theatres; Night life; Cuisine.
5. Other attractions	: Climate; Health resorts or spas; Unique attractions not available elsewhere

* * Source: *International Tourism, Hutchinson, 1969*

According to Robinson, an author on Tourism the attractions of tourism are, to a very large extent, geographical in character. Location and accessibility (whether a place has a coastal or inland position, and the ease with which a given place can be reached) are important. Physical space may be thought of as a component for there are those who seek the wilderness and solitude. Scenery or landscape is a compound of landforms, water and the vegetation and has an aesthetic value. Climatic conditions, especially in relation to the amount of sunshine, temperature and precipitation (snow as well as rain), are of special significance. Animal life may be an important attraction, firstly, in relation, to bird watching or viewing game in their natural habitat and, secondly, for sporting purposes, e.g., fishing and hunting. Man's impact on the natural landscape in the form of his settlements, historical monuments and archaeological

remains are also a major attractions. Finally, a variety of cultural features-ways of life, folklore, artistic expressions, etc. provide valuable attractions to many.

2.4 Accommodation

Accommodation plays a central role and is very basic to tourist destinations. World Tourism Organisation in its definition of a tourist has stated that the tourist must spend at least one night in the destination visited to be qualified as a tourist. This presupposes availability of some kind of accommodation. The demand for accommodation away from one's home is met by a variety of facilities. The range and type of accommodation is quite varied and has undergone considerable changes since last half a century. There has been a decline in the use of boarding houses and small private hotels. Larger hotels are increasing their share of holiday trade, especially in big metropolitan areas and popular tourist spots. In more traditional holiday and seaside resorts in Europe and elsewhere, bit hotels are keeping their share of holiday resorts. In recent years some changes have been reflected in the type of accommodation. There has been a increasing demand for more nontraditional and informal type of accommodation. The latest trends in accommodation are holiday villages. In recent years there has been an increase in the popularity of such accommodation.

Accommodation may in itself be an important tourist attraction. In fact, a large number of tourists visit a particular destination or town simply because there is a first class luxury hotel or resort which provides excellent services and facilities. Some countries like Switzerland, Holland, France, Austria and Belgium have gained a reputation for providing excellent accommodation with good cuisine. Many hotel establishments elsewhere in various countries, especially the resort hotels, have gained a reputation for their excellent cuisine, services and facilities. The French Government for instance, paved the way for tourist development of Corsica by launching a big hotel development programme

2.5 Elements of Tourism

Elements of tourism,

1. Pleasing weather

- 2. Scenic attractions
- 3. Historical and cultural factors
- 4. Accessibility
- 5. Amenities

1.Pleasing Weather

If we want to choose a place for touring purpose, pleasing condition will be one of the most important and crucial attractions in our weather selection procedure since fine weather plays an important role in making a holiday pleasant or an unpleasant experience, it is an important element of tourism. Millions of tourists from countries with extreme climates visit beaches in search of fine weather and sunshine. Sunshine and clear sea breeze at the beaches have attracted many since a very long time. In fact, development of spas and resorts along the sea coasts in many countries, were a result of the travellers; urge to enjoy good weather and sunshine, In Europe, countries like France, Italy, Spain and Greece have developed beautiful beach resorts. North Europeans visit Mediterranean coasts searching for older resorts like Monte Carlo, Nice and Cannes on the Riviera and new resorts in Italy and Spain. Italy has built beautiful resorts in its southern parts of Calabria, Sicily and Sardinia along the Adriatic and Mediterranean coasts taking advantage of brilliant sunshine. Many of the Mexican resorts, of the Pacific and California, Florida, and Hawaiian Islands in the United States are yet other example where weather has played a prominent part in attracting tourists. Beautiful beaches of India, Sri Lanka, Thailand, Indonesia, Australia and some other new destinations are yet more examples of what good weather can do. All these areas, in fact, capitalising on good weather, have become important tourist spots.

Destinations with attractive winter climates, winter warmth and sunshine are also important centers of tourist attraction. Many areas have become important winter holiday resorts attracting a large number of tourists. Around these winter resorts, a variety of winter sport facilities have been installed to cater to the increasing needs of tourists. In countries with tropical climates, many upland cool areas have been developed as 'hill station resorts' Climate then, is of particular significance to tourism and, there are many areas which, because of their beautiful, bracing climates, can be potential tourist areas.

2. Scenic Attractions

Scenic attractions, like beautiful landscape, are very important factors in tourism. Scenery or the landscape consisting of mountains, lakes, waterfalls, glaciers, forests, deserts, etc., are strong forces attracting people to visit them. Breathtaking mountain scenery and the coastal stretches exert a strong fascination for the tourist. The magnificent mountain ranges provide an atmosphere of peace and tranquility. Tourists visiting the northern slopes of the Alps in Switzerland and Austria and the southern slopes in Italy and also the Himalayan mountain slopes of India and Nepal for the first time, are charmed by their physical magnificence. Great natural wonders such as the Grand Canyon in the Un

Causeway of Northern Ireland, the Niagara Falls, the Geysers of Iceland, the glaciers of the Alps, the forests of Africa, the mighty rivers, the lakes and the deserts are a source of great interest to many tourists and have become the basis of an expanding tourist industry

Historical and Cultural interest characteristics exert a powerful attraction for many. Since many centuries these have had a profound influence on the traveller. A large number of tourists are attracted every year by the great drawing power of Stratford-on Avon in England because of its associations with Shakespeare, or the city of Agra in India with its famous Taj Mahal or Pisa in Italy for its famous Leaning Tower. Thousands of Americans and Canadians visit Europe because of its long historical heritage; besides, many view Europe as their original homeland and have a sentimental attachment to it. Any foreign visitor to England must visit London not because it is the largest city in the country and the capital, but because of its historical associations and traditions and its many cultural attractions. In a similar way the visitor in France includes Paris in his itinerary as he does Rome and Moscow in a visit to Italy and the Russia respectively. Many countries which are developing tourist industries are using the legacy of their historical past as their major tourist attractions. In India, the world-famous caves of Ajanta and Ellora are an example. These caves are India's oldest and most beautiful testimony of religious architecture and painting, and are man-made caves out of rocky mountains, conceived and executed some 2000 years ago.

3. Accessibility

Accessibility is a very crucial factor as it is a means by which a tourist can reach the area where attractions are located. Tourist attractions of whatever type would be of little importance if their locations are inaccessible by the normal means of transport. If the tourist attractions are located at places where no transport can reach or where there is inadequate transport

facilities, these become of little value. The tourist attractions which are located near to the tourist generating markets and are linked by a network of efficient roads and can be easily reached by air receive the maximum number of tourists. The distance factor also plays an important role in determining a tourist's choice of a destination. Longer distances cost much in the way of expenses on travel as compared to short distances. An example can be that of India. About two million and a half tourist arrivals or a country of the size of India may look rather unimpressive. However, if one looks at certain factors like the country's distance from the affluent tourist market of the world such as the United States, Europe, Canada, Japan and Australia, one may conclude that the long distance is rather one of the factors responsible for low arrivals. It costs a visitor from these countries quite a substantial amount to visit India for a holiday. It has been stated earlier that Europe and North America continue to be the main generating and receiving areas for international tourism, accounting for as much as 70 per cent and 20 per cent, respectively, of international tourist arrivals. The intra-regional tourism (tourism between countries of the same region) has an appreciable influence on the distribution of world arrivals. Of the total international tourist movements within Europe and North America, at least 75 per cent are intra-regional. In the Americas the United States and Canada alone account for nearly 50 per cent of all international tourist traffic in the regions, where intra-regional international tourist movements are also predominant. In Europe, intra-regional tourism accounts for over 70 per cent of international tourist movements. Easy accessibility thus is a key factor for the growth and development of tourist movements.

4. Amenities

Facilities are a necessary aid to the tourist centre. For a seaside resort, facilities like swimming, boating, yachting, surf-riding and other facilities like dancing, recreation and amusements are important for every tourist centre. Amenities can be of two types: natural, e.g., beaches, sea-bathing, possibilities of fishing, opportunities for climbing, trekking, viewing, etc, and manmade, e.g., various types of entertainments and facilities which cater to the special needs of the tourists. Excellent sandy beaches, sheltered in sunshine with palm and coconut trees and offering good bathing conditions form very good tourist attractions. Certain other natural amenities such as spacious waters for the purpose of sailing, or the opportunities for fishing and shooting are also very important.

From the very early historical period, travel has had a fascination for mankind. Much of the travel in the beginning was largely unconscious and a simple affair. People travelled by foot over paths, open fields as also forests. Movement across the landscape was a tough adventure requiring great skills and endurance. There were no travel procedures and formalities as there were no frontiers. All human activity focused upon day to day survival. The early hunters were keeping themselves busy in search of basic necessities like food, water and shelter. This often meant difficult and dangerous travel for entire communities. Although travel in the prehistoric times was rigorous and unsafe, it did not stop early people from migrating all over the globe.

2.6 Kinds of Tourism

Tourism is an economic product meeting the demand of the human beings and as such its market is created according to fluctuation of supply and demand. The majority of the demand of tourism enumerate the motives which can prompt a person to make a journey for tourist region. These motives are varied and do exercise a decisive influence on the destination of the journey. Thus the diversity of touristic motivations generate the various types of tourism. The types of tourism can be categorised under various headings.

1. **On the Basis of Origin and Destiny :** Tourism is not limited within the boundaries of a nation. Tourists may travel to a foreign country or within their own borders. The following types of tourism are finding the tourists flow patterns within a national boundary:
2. **Incoming Tourism:** In this category are included the tourists received by a certain country from other countries, the later being the origin country of the tourist.
3. **Outgoing Tourism:** There are many persons of a country who go abroad. Outgoing tourism comprises these tourists normally residing in the country and going abroad.
4. **Internal Tourism:** The national inhabitants of a country travel occasionally to other places within their national territories. This may be called as internal tourism.
5. **On the Basis of Movement Patterns :** The tourists stay in a place for a long-time or they travel simultaneously and spend little time in various tourist places. On the basis of how the tourists spend their time, the following distinctions can be made.

6. **Residential Tourism:** Residential tourism comprises of those tourists who have a holiday period of over one month and spend it in one specific tourists place. These tourist choose the quieter and peaceful places with a mild climate. Residential tourism usually takes place in the 'peak season', i.e. the highest point of the total demand.
7. **Seasonal tourism:** comprises of those tourists who have a holiday period of not more than one month. These tourists also remain in one specific place for not more than a month. The main point of difference in the residential and seasonal tourism is the time factor
8. **Roving Tourism:** There are certain categories of tourists, who travel throughout their holiday period. They travel from places to places and never spend more than 5 nights anywhere. They are continuously on the move. Their purpose of travel is different from those of residential and seasonal tourists. They are most widespread in spring and autumn.
9. **On the Basis of the Seasonal Character :** There are various factors influencing the mass tourist flow during a particular season. Some of the incentives for travel are of a sporting nature, depend on natural, condition, the seasons, hunting, fishing, winter sports, etc. There are also religious festivals—fairs, art and music festivals, trade fairs exhibitions, which attract the tourists during a particular season. The following types of tourism belong to this category.
10. **Winter Tourism:** In most of the European countries, this tourism takes place in the month of December or March. Winter tourism have two prime incentives—the search for snow and search for sunshine
11. **Summer Tourism:** Summer tourism take place during the summer holidays. The main incentives for this type of tourism are sunshine and bathing, preferably in the sea. In the European countries, it is a very varied type of mass tourism. It has low average quality than that of other seasons.
12. **Circumstantial Tourism:** It is a localized tourism as it is attracted by traditions, festivals of a religious artistic sportive, folklores, nature, etc. On the Basis of Incentives There are various incentives which generate the tourist flow patterns. Therefore, tourism may be classified as follows:

13. **Recreational Tourism:** Tourists who wish to devote their holidays to rest, to recuperate their physical and psychic and who wish to refresh themselves when tired are included in this category of recreational tourism. This is the longest stay in tourist resorts which generate relaxation to them, by the sea, in the hills, in the rest centers which ensure for them the sought-after comfort. Their main preference is the climatic resorts. Tourists also visit for reasons and a care-free convalescent resorts are also included in this category. These types of tourists have mainly intellectual incentives. They want to see new things, know new people, their history, art and local customs and their natural surroundings. It may be called as cultural tourism or roving tourism,
14. **Pleasure Tourism or Leisure Tourism:** It includes those tourists who leave on holiday for a change of climate out of curiosity of relax, see something new, enjoy good scenery, unfamiliar folk lore, the quiet and noisy modern tourist centres. Some tourists of this category find pleasure in travelling from the fact of constantly changing places and surroundings. The constant expansion of industrialization and automation, the anonymity and hectic pace of life, and the growing lack of leisure in a frequently-irksome routine job lead men today to look to leisure activities and travel as escape from the pressures and strains they are subjected to. These tourists look for peace and quietness in their surroundings. These tourists may be identified with the residential tourism and even more with the seasonal type with less dynamic features. It may also be called as tourism for convalescence. Visiting sea beaches and waterfalls is a good example of this type of tourism.
15. **Sporting Tourism:** Like sport itself, tourism is a mass phenomena of this century. Like sports too, it is only natural in its potential, neither good nor evil in essence and can be positive in its effects only if it is subjected to wise planning and guidance. This tourism is motivated by the wish to practice sports. Water and winter sports, hunting and fishing are in good demand. In this case there are big sports meetings, like the Olympic Games, the continental or world ski, football, hockey, boxing championship, etc. which attract to the country not only the sportsmen concerned, but also thousands of followers and other interested people. There are also sporting tourism of the devotees. There are winter sport, natural sports, mountain climbing, trekking, hiking, sailing, golf, hunting, fishing,

canoeing, water skiing, and skating, under-sea fishing, dancing beach games, mini-golf, hydro-cycling, and the various indoor amusements which offer fun and diversion. Countries which are well placed to develop sports have a good scope for tourist flow. They can get good benefits from the sporting tourism. For the elite sportsmen, tourism is one of the strongest motivating forces. "Cities, Altuis, Vor Tius" is all very well, but more enjoyable in Tokyo than in Birmingham or Belgrade. The thought that high performance will qualify one for world travel is perhaps the major motivation for the top flight athlete.

India is a place for existing sports. Polo is played at the important clubs in the principal cities of India. Skiing in Himalayas, golf-courses, yacht clubs, trekking, sun bathing, water sports are some of the specialties in the field of sports. Beaches of Goa and Kovalam are unique for Sybarites.

- 16. Business or Technical Tourism:** According to some theoreticians, sociologists and economists a business journey cannot be regarded as tourist journey because it lacks the 'voluntary element'. According to them, business journeys are professional journeys and do not leave to the person concerned either the choice of destination or time of his journey and thus the fundamental idea of liberty of the individual in tourism is absent. On the other side, all the definition of tourism include business journeys under tourism.

'Business Tourism' implies not only the professional journey of industrialist but also all journeys which has their purpose a visit to fairs and exhibitions or of technical achievements which awaken a rather general interest among people who have nothing in common with the profession in question. The inclusion of business journey to tourism is also due to the fact that businessmen behave not only as consumers but often during their free time, as real tourists by profiting from the attractions offered by the country.

- 17. On the Basis of the Socio-economic Aspects of Demand :** Tourism can again be classified on the basis of the economic aspect of demand.

Self-financing Tourism: It includes the tourists who dispose entirely of their own means to satisfy demand. All the incoming, outgoing and internal tourism belong to this category. Self-financing tourism is profitable both for the private tourist enterprise and for the national economy.

Juvenile Tourism: This classification of tourism is based on the informative and education of tourists.

Social Tourism: Social tourism is found in sectors of the population whose income level does not permit to meet their demands. Social tourism is made feasible with the help of and through all sorts of facilities provided by the state and by some of the private enterprises. It is observed that the benefit of social tourism goes to the national population as most of the tourism of this category belong to external tourism and very few to outgoing tourism.

18. According to the Range : Tourism may also be classified according to its ranges

On the Basis of Purpose of Visit

Tourism can also be classified on the basis of purpose of visit of the tourists

Holiday Tourism: There is a now a significant demand recorded by the tourist industry for active holidays, both national and international. In some pursuits, i.e. climbing and skiing, the element of risk is upper-most. Old resorts based their attraction on holidays and gambling and new resorts on holidays and sports. In holiday camps, a great majority of people showed a desire for a physical recreation and there was strong correlation between 'good behaviour and sports participation'. It is seen that optional vacation planning improved attitudes towards physical activities, both during holiday and on returning home. People have a great interest in hobbies and exciting holidays. Family walks and common vacation, as well as camping and any of the family tourist recreations are valuable.

19. On the Basis of Sociological Aspects : Some other terms have been often applied more or less discriminately to tourism in particular, mass, popular and social tourism, to which it is desirable to attach more precious meaning at the outset?.

Mass Tourism: When large numbers of people participate in tourism, it is called as mass tourism. It is essentially a quantitative motive and is based on the proportion of population participating in tourism or on the volume of tourist activity.

Popular Tourism: It is qualitative motion and by its nature it may give rise to mass tourism. It denotes activities meeting with a wide acceptance by people, because of their

attractiveness and availability. The acceptance by people may be as it meets their needs or tastes and its availability at a low price.

Social Tourism: When people of limited means participate into tourism or measures are taken to encourage them to participate or to make it possible, it is known as social tourism. The concept of social tourism is largely based on subsidies, special facilities and other measures. These are provided on a cooperative basis or by the state or by any other third party.

Dr. W. Hunziker proposed the following definition of social tourism:

“Social tourism is a type of tourism practiced by low income groups and which is rendered possible and facilitated by entirely separate and, therefore, easily recognisable services.”

According to M, Andhre Polimount: *“Social tourism is the type of tourism produced by those who could not be able to meet the cost without social interventions, i.e. without the assistance of an association to which the individual belongs.”* Thus, the essentials of social tourism are:

20. **Limited Means:** Social tourism is confined to manual workers and other workers who cannot save enough to pay for travel and accommodation because their income are too low and their commitments are too great.

Subsidised Tourism: Social tourism is subsidised by the states, local authorities, employees, trade union, clubs or other associations to which the workers belong,

Outside Travel: Social tourism involves travel outside the normal place of residence, preferable to a different environment.”

21. **Conference Tourism :** Conference tourism is gaining more and more importance. There are a number of international conferences, conventions, meetings of the statutory bodies of international organisation and an innumerable conferences, assemblies and national symposiums, which are held every year within different countries. Local, state, national and international conventions are continuously being held. Yearly meetings are held by national associations, union groups, fraternities and societies, educational associations, professional groups, educational advertisers, and corporations of all types. These

conferences and meetings sometimes out number hundreds and thousands of participants. These participants stay several days in the city of the host country. Many countries are aware of the serious economic aspect of conferences. They have to prepare appropriate premises and to build conferences halls with all the necessary modern equipment to ensure their satisfactory operation

- 22. Forms of Tourism :** There are various forms of tourism. The different forms are based on the duration, the number in the party and the economic effects of tourism. These varied forms can be categorized as follows:

According to the Number in Party: This distinction is based on how the individual elements of the trip are bought by the tourists,

Individual Tourism: Individual tourism is the case, when a person or groups of persons leave on journey for which they themselves establish the destination and programmes and which can at any time be freely altered. The tourist move about individually or as a member of the groups, irrespective of the way their travel and the stay is arranged. Transportation, accommodation and other elements are arranged separately either by the tourist himself directly with the carrier, hotel or other suppliers or through a travel agent for the individual or the family themselves. The individual or the family themselves take care of ensuring such provision or services as they might need. This is known as independent travel.

Group Tourism: Group tourism or organised collective tourism (organised tourism) or inclusive tour is where the tourist buys a trip, for which he is unable to distinguish the prepaid cost of his fare from the cost of accommodation and other elements. It is also known as a package tour. The tourist may move about as an individual or as a member of groups, according to the particular arrangements entered into. Thus, in this form of tourism, a travel agency offers to anyone interested, against payment of an inclusive sum, participation in a journey to a destination and following a programme and time table fixed in advance for an entire groups. The participants do not have to concern themselves with anything, all the provisions and services being assured by the organiser.

- 23. According to Arrangements :** Independent: Accommodation and transport arranged separately by tourists Inclusive or Packaged Tours.

According to Duration

In this case distinction can be based on length of stay or length of journey

Long-term Tourism: It implies a journey of long duration, say, several weeks or months for the tourist himself. In view of the extreme mobility of modern tourism, principally motorised, a long journey as a general rule means a visit to several countries, which results in the journeys being a service of short stay in each tourist places. The journeys or stay at destination should be at least 24 hours. It is also known as a trip or a visit.

Short-term Tourism: It covers brief journeys of a week to ten days. When numerous, their economic importance is considerable for the nation. Sociologically, this type of tourism suits a clientele who are unable to avail long holidays.

Excursion Tourism: It does not involve any overnight stay. These are usually described as day trips or day visits, both internally and internationally, Excursion tourism has been reintroduced into the WTO definition of tourism. It is thus a journey not exceeding 24 hours and without accommodation having to be provided. Excursion tourism is important in the areas where the favourable rate of exchange allows interesting purchase to be made at the time of journey. According to Means of Transportation Used

- Pedestrian Tourism (Hikers)
- Road Tourism (Motor coach)
- Motorised Tourism (Motor car)
- Rail Tourism
- Maritime Tourism (cruises)
- Air Tourism

24. On the Basis of Effect on Balance of Payment : Receptive Tourism: This is related to foreign tourist arrivals which brings foreign exchange into a country and this have an favourable effect on balance of payment.

Passive Tourism: It is a travel of residents of a country going abroad. They take out currency and thus there is a negative effect on the balance of payment.

Check your progress

I Each answer should not exceed 50 words

- (a) Cultural attractions
- (b) Amenities
- (c) Group tourism

II Each answer should not exceed 250 words

- (a) Bring out the tourist's inventory of tourist attractions
- (b) Write about the sociological aspects of tourism

III Each answer should not exceed 500 words

- (a) Explain about the elements of tourism
- (b) Discuss the kinds of Tourism

2.7 Let us sum up

The meaning and the nature of Tourism is understood by its phenomenon and its various Components of Tourism. The elements of tourism plays an important role in making a holiday pleasant or an unpleasant experience. Millions of tourists from countries travel a lot to escape from the extreme climatic conditions. Tourism is an economic product meeting the demand of the human beings and as such its market is created according to fluctuation of supply and demand. The majority of the demand of tourism enumerate the motives which can prompt a person to make a journey for tourist region which is clearly explained in the kinds of Tourism.

LESSON 3

MODES OF TRANSPORT

3.1 Learning Objectives

After reading this lesson, you will be able to

- ❖ understand how the technological development led to the advent of different modes of travel
- ❖ study how the emergence of railways, airways and roadways led to the growth of modern tourism
- ❖ learn about the different motivations for travel
- ❖ explore the socio-economic significance of tourism

Structure

- 3.1 Introduction**
- 3.2 Emergence of Railways**
- 3.3 Sea Route Travelling**
- 3.4 Industrial Revolution and Travelling**
- 3.5 Modern Tourism Trends**

- 3.7 Tourist Motivation and Related Theories**
- 3.8 Social benefits of Tourism**
- 3.9 Economic significance of Tourism**
- 3.10 Let us sum up**
- 3.11 Answers to check your progress**

3.1 Introduction

Nineteenth century witnessed a great technological development, first in England, and later on in Europe and America. This development had a profound effect on transport which resulted in the growth of travel in general. This great technological development led to the advent of the railway. The introduction of railways in the nineteenth century was a crucial landmark in history.

3.2 Emergence of Railways

The first rail link between Liverpool and Manchester was started in the year 1830. The newly completed railway track in England featured special provisions for carrying passengers in addition to freight. Later on, an extensive programme of construction of railroads to provide trunk lines between major centers of population and commerce and industry was taken up in England. Although the railway network in the beginning was responsible for carrying goods from industrial centers to the centers of trade and commerce, it had however, initiated the process of carrying the passengers which later on was to become a mass movement. Railways provided the necessary vehicle for the movement of the people from the place of their residence to newly formed and expanding pleasure spots like seaside resorts. These resorts for the first time were within the reach of many people who but for the introduction of railways, would otherwise not have been able to reach them.

1. Organised Rail Travel

The birth of the organised rail travel, however, came in the year 1841.

A Baptist preacher of Derbyshire on his way to a temperance meeting in Leicester was inspired with the idea of engaging a special train to carry the 'friends of temperance society' from Leicester to Southborough and back to attend a quarterly delegate meeting. The man behind this idea was none other than Thomas Cook who later on came to be known as one of the greatest travel organisers of the times and, in fact, a pioneer. Thomas Cook broached the idea to his friend and a few weeks later the idea culminated into collecting as many as 570 passengers who made a journey by the Midland Counties Railway at a specially reduced return fare of one shilling per passenger. Encouraged by the success of this venture, Thomas Cook

arranged similar such ventures by chartering trains to places which were now becoming popular with the excursionists. In the year 1843, nearly 3,000 school children were taken on a trip from Leicester to Derby. Many more excursion trips were arranged by Thomas Cook on a fully commercial basis. From the year 1848 to 1863. Cook conducted circular tours of Scotland with almost 5,000 travellers a season. By the year 1855, Thomas cook had extended his field of operations to other countries in the continent, organising the first all inclusive tours to the Paris Exhibition in that year.

2. Rail and Pleasure Travel

Another important development which can also be associated with Thomas Cook is the spurt in pleasure travel. The large scale movement of people to various pleasure spots like resorts and spas was a result of organised conducted excursion trips by Thomas Cook. It was however, the introduction of the railways which made all this possible for Thomas Cook to achieve and become a pioneer in organised travel.

3. Spread of Railways

Expansion in Europe: The news about introduction of the Liverpool and Manchester railway reached the neighbouring countries in Europe. Encouraged by this development many other countries in Europe opened the railway lines. Railway tracks were laid in France, Austria and Switzerland. Across the Atlantic the tracks were laid in America which ushered in the spurt of travel to and from places where tracks were laid. This great revolution in rail transport technology produced an immediate expansion in European travel. It was estimated that in the year 1881, the railways carried over 600 million passengers over the lines operated by over one hundred odd companies. All of them, however, were not excursionists. With the phenomenal success, the railways were now keen to stimulate travel further and also to improve the system. There was also now an element of competition and the various railway companies tried to make travel as comfortable as possible. (b) **Expansion in America:** In America, the first class railway travel was introduced in the early 1870s, by an American named G.M. Pullman, who developed the Pullman coaches with their luxury furnishings and dining facilities. The longer distances in America necessitated the ensuring of greater passenger comfort. Long-distance travel could now be undertaken in comfort and with pleasure. The Pullman coaches

manufactured in America were being imported by some railway companies in England and other countries in Europe. By the year 1872 the Pullman company had over 700 coaches working over 30,000 miles of railway track under contract with over 150 different railway companies.

Expansion in East: East was not far behind in catching up with the leaders in the area of rail-road construction. India took up the construction of railways in the same century. Soon after its introduction in England, the business community there was pressing the East India Company to introduce railways in the subcontinent of India. After prolonged negotiation with British rail-road companies, the GIP Railway Company could be incorporated in an Act of Parliament in 1849 and a contract signed between East India Company and the GIP Railway Company requesting them to raise the requisite capital required for the construction work. The contract for the actual construction was awarded to an English company, Messrs Faviel and Fowler. It was on April 16, 1853 that the first train in the east took off from Boribunder in Bombay to Thana, covering a distance of 33 kilometers. Four hundred guests selected from various segments were invited to travel by the first train in India. From a small beginning on April 16, 1853, when the first train steamed off from Victoria Terminus for Thane, 33 kilometers away, the Railway System in India has grown into the world's second largest system under one management, second only to Russia.

3.3 Sea Route Travelling

Like the railways, shipping made a significant contribution to travel during the nineteenth century. While railway were responsible for inland travel, especially in Europe, the steamship crossed the boundaries and made strides in intercontinental travel. The shipping technology made a number of innovations in the nineteenth century. In America a number of sailing ships were built which were considered to be superior to those built in England or elsewhere. The English felt a great need for improved communications across the Atlantic with America for the purpose of trade and commerce and passenger transportation. As a result of this there were great strides in the development of deep-sea shipping. The history of the Cunard Steamship Company in England demonstrates important features in the growth of North Atlantic Shipping. A subsidy in the form of the award of mail contract represented a recurring theme in the

development of passenger transportation. With the passage of time toward the last quarter of the nineteenth century, emigrant traffic became an important factor in North Atlantic travel. America was considered at that time the 'new world', full of opportunities and fortunes for people in Europe. A great number of people from the continent started going to America in search of fortunes. First, Great Britain and later Germany, along with other countries, became the principal generators of emigrants to the 'new world'. Many also travelled to see the new world.

Use of the ships in the cruising fashion for the charter and operation of cruises on a limited scale dates from the mid nineteenth century. One of the earliest cruises perhaps was described by Mark Twain in his first book, *The Innocents Abroad*, published in the year 1869. The year 1869 also brought about the possibility of a much shortened route between the West and the East as a result of opening of the Suez Canal. This in turn stimulated the introduction of better steamship carriage to the Far East. The worldwide growth of shipping companies towards the end of the nineteenth century led to the formation of shipping conferences which developed cartel-like agreements. These agreements were on fare-structure applicable to the carriage of passenger traffic and cargo to various territories to which the vessels of these companies operated.

3.4 Industrial Revolution and Travelling

The second half of the nineteenth century, in fact, witnessed the growth of travel as a result of development of industrial societies. These societies which developed in Western Europe and North America greatly felt the urge to travel purely for the purpose of rest and relaxation. This trend certainly gave way to what came to be known as the tourism phenomenon in the latter part of the century and in the twentieth century. The concept of modern-day tourism had its seeds in the development of industrialised societies of Western Europe and North America. Though an accurate analysis of the measurement of tourism can be traced back to only about half a century ago, the scattered figures published from 1855 onwards point to the direct relationship between the development of industrial societies and the expansion of tourist movements. This has also been supplemented by various official statements, observations by travel writers, and the various travel guides and other literature on sale from time to time. The

emergence of the industrialised societies was a direct result of the industrial revolution in the West, initially beginning in England. In its wake the industrial revolution brought about tremendous changes in the society and the tempo of change was quite fast and took a big jump.

The Industrial Revolution was responsible for changes both in the economic as well as social systems prevailing at that time. A large number of factory towns, both big and small, sprang up which in turn necessitated large scale migrations from the countryside to towns and cities. The Industrial Revolution was responsible for the emergence of the working class which was needed to run factories. In the beginning the working class was burdened with long working hours and poor working and living conditions and lower wages. The sudden concentration of population in towns and cities made matters worse.

3.5 Modern Tourism Trends

By the turn of the twentieth century all the main characteristics of modern tourism were evident in embryo. Changes in mental attitudes towards pleasure seeking, the recognised value of travel for education, increase in material wealth coupled with social prestige, a growing need to find relief for working routine, improvements in passenger transport systems-all these factors produced a fertile ground for the development of excursion traffic on a large scale.

1.Early Decades of Twentieth Century

Pleasure travel continued to expand in the beginning of the century. However, up to the first quarter of the twentieth century travel including pleasure travel was essentially a luxury commodity within the reach of privileged sections of the society having both free time and considerable purchasing power. The pleasure tourism had by now assumed a class and a charm of its own associated as it was with elegant luxurious hotels, Pullman coaches, prestigious nostalgic long distance trains, such as the 'Orient Express' and the 'Blue Riband' and transatlantic liners like the 'Queen Mary'.

2.World War I

World War I was responsible for a temporary halt to tourist movements. Tourism has always flourished in peace as it is a peace time activity. As such the war saw a considerable

decline in tourist travel not only within Europe but also all over the world. However, soon after the war, travel soon reached pre-war peak levels, and within the next three to five years, greatly exceeded them. Post-war period also brought in its wake prosperity coupled with large scale migration, and this period increased the demand for international travel. Gradual development of the mass communication system like the radio and the press played an important role in increasing travel by way of widening knowledge and interest of a large number of people about other countries. The post-war period also brought about attitudinal changes which were destined to influence the volume and nature of tourism. For example, the war was responsible for breaking down international barriers, resulting in the fostering of an ideal optimistic, peaceful internationalism-just the climate in which tourism is likely to flourish the most.

3. Post-World War-I Era

Post-war era also saw a rise in the standard of living of working and middle classes in America and certain other countries in Europe. Soon after the war tourists began to appear in countries where tourism had been practically unknown a few years earlier. The major tourist countries enjoyed an unprecedented boom in the twenties. In the year 1929 there were nearly one and a half million visitors to Switzerland, over one million to Italy and about two million to Austria. France; Spain and Great Britain also received a considerable number of visitors

4.Private Motor Vehicles

The unprecedented boom in tourist movements in the twenties, especially in Europe and America, can be directly linked to the introduction of the private motor car. The motorised private and public road transport and the improved road conditions led to a tremendous growth of travel. The invention of the private motor car and coach received its first great impetus in the ten years which preceded World War I. The motor car revolutionised holiday habits of the Europeans and Americans. It became increasingly important in the pursuit of leisure and tourism. The provision of good motor roads and the road services were important factors in the development of both domestic and international tourism.

5.Introduction of Paid Holidays

The concept of modern tourism emerged along with the introduction of holiday with pay. It was in the last quarter of the nineteenth century that increasing attention was paid to the

desirability of holiday with pay and at least of cheap holidays for working class people. This group had still largely failed to benefit from the new opportunities offered by rail travel. During this period a few factories gave paid holidays to their workers in some countries in the West. The introduction of annual paid holidays is very largely of English origin and this had important repercussions on the development of mass tourism. The annual paid holiday was established during the inter-war years as a reality for a considerable part of the working population. By the year 1939, in UK, some eleven million people were covered by the Holidays with Pay Act (1938)

6.Trade Unions and Paid Holidays

Modern tourism really got under way in the year 1936 when, at the instigation of its trade union representatives, the International Labour Organisation (ILO) adopted the first convention that was to support serious movements to promote paid holiday and, in turn, tourism.

7. Longer Holiday Trend

The right to paid holidays has universal recognition now. The trend is to grant longer holiday periods. The employers have realised that the paid holidays have not adversely affected industrial production. The legal minimum in many countries at present is three weeks. Some countries have even gone beyond this and grant four weeks of paid holiday.

8.Second World War

The encouraging trend in tourism witnessed during the post First World War period however, received a great setback as the Second World War intervened. As stated earlier, tourism and holidaymaking on global as well as national scale is a manifestation of prosperity and peace. It can occur on a large scale where a great majority of people enjoy prosperity and security. It is quite sensitive to world economic and political conditions. The Second World War, like World War I, brought in economic destruction and political instability-the two major deterrents to the growth of travel and tourism

9.Post-Second World War Period

The post-Second World War period brought in a rapid development of tourism. As the world began to settle down after the years of readjustments immediately after the war ended in

the year 1945, there was remarkably rapid increase in both domestic as well as international tourism, The United Nations reported that in the ten-year period between 1955 and 1965, the number of tourist arrivals in some sixty-five countries increased threefold from 51 million to over 157 million. This trend in the growth of international tourism continued till the mid-1960s. It continued to be determined by the living standards in the developed countries. The widespread introduction of the holiday with pay to a large majority of people during this period was yet another important factor responsible for growth of tourist traffic. In the year 1976, there were nearly 220 million international tourist arrivals in the world. This was an increase of more than 90 per cent over the year 1965. This was a period of intensive economic and technological development in most industrialised countries which had earlier suffered a great deal as a result of war. Most of the developing countries during this period were also able to benefit from the growing trend in the developed countries to engage in tourism

3.6 Air Transport

The late twentieth century period can thus be termed as a period which is responsible for introducing a phenomenon called mass tourism'. Although the enormous expansion of tourism has taken place primarily in the advanced industrialised countries, where tourism has become a part of the lifestyle and consumption pattern, it has also shown its might in the developing countries as well. The key role of air transport has been a major factor in the growth of international tourism, especially in respect of long distance and inter-continental travel. Although commercial travel was introduced even before the Second World War, air transport for the masses has essentially been a post-Second World War phenomenon. The principal period of growth, however, has been post '1950'. With the tremendous increase in speed, safety and comfort provided by the new civil aircrafts like Douglas DC-6s and DC-7s and Super-constellations, there was a noticeable increase in the long distance international as well as intra-regional tourism. In the year 1952 the two-class travel introduced was made possible by the larger capacity of new aircrafts. The increase in the aircraft capacity was also responsible for lower air fares. The steady fall in the cost of flying also resulted in the increased traffic across the Atlantic. This period also saw the first attempt to introduce a 'package holiday' around air transport which subsequently became the model for most of the present day's global tourism.

1. Jet Technology and Tourism

The most dramatic event which introduced an entirely new dimension of speed, comfort and efficiency to air transport and brought mass travel to its present level was the advent of the jet travel in the year 1958. As a result of the entry of advanced jet aircraft in the civil aviation industry, air travel from the year 1960 onwards grew tremendously. Great advances have been made in the aircraft jet technology with the introduction of newer and sophisticated planes with emphasis on comfort, luxury, speed and safety. New wide-body jets such as Boeing 747, the McDonnell Douglas DC 10, the Airbus A300, the Lockheed Tristar L-1011 and the latest all-computerised 'fly by wire' Airbus A320 are all part of the response to the requirements of the ever-growing travel market. Added to all this the technical brilliance of the supersonic aircraft like the Concorde and the Tupolev 144 have added glamour to the passenger aircraft industry. It will not be out of place to mention here that the international tourism as we know it today, has been largely shaped by air travel. Introduction of inclusive tours' is yet another decisive development during this period responsible for mass tourism. In all inclusive tours travellers are carried on charter flights at rates substantially below those of normal scheduled services.

3.7 Tourist Motivation and Related Theories

Motivation refers to the stimulation of emotions or desires that operate upon one's will, and direct it into an action or it is the inner state that directs behaviour towards a goal. While the term motivation is defined in tourism to denote the inner influences that are being generated in a person energizing or directing him/her to have a tour. Socio-psychological approaches of tourism recognize the significance of tourist's motive and its consequences on travel behaviour to know exactly-why people travel? What makes or influences them to go for a tour? How do they behave during their trip at the destination? Where do they really want to visit? When do they want to make a trip? All these questions should be mapped out by knowing the motive of traveller.

1. Changes in Travel Motives Over Time

Throughout the history, people have exhibited an unquenchable thirst or desire for travel; it may be for survival, trade, conquest or curiosity. Later with the development of civilization they moved to develop settlement in new land. While trade began among the other settlement.

During the middle age, an urge to explore new trade and new things became powerful motive because of trading and commerce. Pleasure and recreational activities appear during the Roman Empire as significant motivator and people exhibit interest in visiting spas and sea side resorts. The appearance of seaside resort and spa became strong motivators for those seeking tour for medical or health reasons. By the end of the middle age, travelling for religious or pilgrimage reasons by visiting different shrines assume significant importance. Later in the fourteenth to seventeenth centuries, during the grand tour, people visited mostly for intellectual reasons to broaden their knowledge and learn new culture, art and craft or system of administration. During the sixteenth century, holiday became a prime motive and people started to move to escape from routine to busy work life. Prior to industrial revolution in the past tourism was mainly treated as an activity practiced by the aristocrats.

Industrial revolution during late eighteenth and nineteenth century brought a change in economic and social system. Increased productivity and less amount of use of labour and working hour resulting in the discretionary time and money for people who became a dominating force or motive; resulting in the huge flow of travel to different destinations, which otherwise is regarded as mass tourism. Later in the twentieth century, the introduction of faster and larger aircraft, railways, luxurious cruise shipping with state-of-the-art facilities, advent of information technology etc. gave a new horizon to travel.

2.Travel Motivators

Travel motivator refers to the force that creates instinct or desire in people to undertake travel. In other words, these can be defined as internal psychological influences that affect individual's choice. Travel motives can have different faces which could be channelized in a number of ways and directed by one's belief, experience, attitude and behaviour. Different experts having their own view about travel motives classified it in their own way.

3.McIntosh and Goeldner's Classification

McIntosh and Goeldner (1994) have defined for categories of travel motivators. These are as follows:

1. Physical motivators: These are motives that are directed by desire for individuals physic or health and its wellbeing. Tourist may visit a destination to take rest and relaxed and recreate themselves by participating in sporting activities and mental rejuvenation or physical invigoration by taking trip to spas, sea side resort or any other treatment centre.

2. Cultural motivators: Which denotes desire to have a tour to learn about other cultures, society, their lifestyle, art, music, dance, fairs and festivals, etc.

3. Interpersonal motivators: These are directed by a desire to visit a destination to create a social bond with each other either by visiting friends and relatives, or new people to seek new relationship.

4. Status and prestige motivators: These motives direct anyone to keep his status and prestige in the society and neighbour. Travelling to distant land for business or professional reason, pursuit of hobbies are associated with this.

4. H. Robinson's Classification of Tourist Motivation

Another scholar, H. Robinson (1979) further clarified the above four classification and outlined new classification of travel motivator as:

1. Relaxation and refreshment of body and mind: Rest and relaxation refers to getting escape from the busy and tidy or monotonous way of life.

2. Health: Health motivator refers to travel originated with desire of getting cure.

3. Pleasure: Travelling to satisfy one's own need could be a dominate factor of travel and individual's having own beliefs in getting pleasure which is directed by experience and behaviour or other force.

4. Curiosity and culture: Since time immemorial people have a quest for new land and culture.

5. Interpersonal reason: These are related to a strong faith and belief on religious customs and rituals from the ancient time and still remain a strong force.

6. Professional or business: It refers to factor that direct individuals to go outside to participate in meeting, seminar, trade fair, exhibition or to launch new product.

5. Gray, H. Peter's Classification

Grey (1970) defined two types of travel motivating forces that specifically directs individual to seek pleasure tour. These are sun lust and wanderlust.

1. Sun lust: Sun lust refers to the desire for travel where a person expects better amenities and facilities than those of his usual environment. As the term defines lust or desire for sun indicates tourists are mostly motivated by sunshine and sporting facilities to recreate themselves.

2. Wanderlust: While, on the other hand, wanderlust denotes a deep or strong desire for wandering around to seek new and unknown things.

6. Prof. Eric Cohen's Classification

Prof. Cohen in 1972 highlights four types of tourist in terms of their behaviour. He mentioned it as follows:

1. Organized mass tourist: This type of tourist wants to remain encapsulated in an environmental bubble and has least interest in indulging or practicing unusual things, which leads them to make prior arrangement of facilities and services done by the travel organizers to remain relaxed and tension free during their trip.

2. Individual mass tourist: They are similar to the organized mass tourist as they are also inclined in using the same facilities but they keep little control over their choice not leaving fully it to be controlled by the travel organizer.

3. Explorers: As the form denotes, it implies that they are dominated by novelty and new experience although they also use same services used by the organized and individual mass tourist.

4. Drifters: This type of tourist wants to live a way that is totally different from those practiced by tourists. They seek to merge with the people where they visit and try to live their same life as they spend.

7. **Cohen** in 1979 gave another view in terms of travel experience as follows:

1. Recreational tourist: This type of tourists are directed by their motive to question their fundamental value rather they want to have a boundless travel experience they can boast of.

2. Diversionary tourist: This type of tourist want to escape to seek meaningless pleasures.

3. Experimental Tourist: As the term implies this type of tourist travels for sampling different authentic cultures while remaining an outsider.

4. Experiential tourist: This type of tourist also seeks authentic and new experiences. They visit to native cultures and enjoy their way of life without any intention of adaptation.

5. Existential tourist: Existential tourists visit to distant land and native culture and try to adapt what they feel authentic and new to them.

3.8 Social benefits of Tourism

Tourism also brings a number of intangible benefits. It offers educational, social, cultural and other political values. It brings in international understanding. Travel widens knowledge and reduces tensions. This very much applies to all the touristic regions specially like India, being a vast and diverse country with rich regions of culture and languages. The intra-region and inter-region movement of people is the main factor that has kept India together in the past and will help in shaping us into a fully integrated nation in the future.

1. Standard of Living

The visit by visitors to a country affects the living pattern of indigenous people. The way visitors conduct themselves and their personal relationships with citizen of the host country often have a profound effect upon the mode of life and the attitude of the local people. The most pronounced effects of this phenomenon are noted when visitors from developing countries travel in underdeveloped or developing countries having a primitive culture or a culture which is characterised by low (economic) standard of living and unsophisticated population.

2. “Passport to Peace”

International travel breakdown the barriers of suspicion and exclusiveness among the nations. It is a major force for peace, understanding and harmony in the world. The two-way travel is foremost catalyst for peace. The face to face meeting of the people erases frontiers between these nations and promotes greater understanding and a keen insight into the common problems. It contributes to an open world and free movement of culture and commerce for the benefit of all mankind. It is a most powerful force in promoting unity in the world and free movement of culture and commerce for the benefit of all mankind. It is a most powerful force in promoting unity in the world.

3. International Understanding

Travel has always enabled man to broaden his mental horizons. When people travel to distant lands, they gain an insight into the customs, traditions and ways of life of other people and are thus able to perceive the underlying unity of the human society.

While speaking on international relations, Mahatma Gandhi once said, “I do not want my house to be walled in all sides and my windows to be stuffed. I want the culture of all lands to be flown about my house as freely as possible. But refuse to be blown off my feet by any”.

These words reflect the true spirit which has been moving all of us to meet in an atmosphere of friendly cooperation and goodwill. In creating a better appreciation of other people's way of life and institutions, tourism may create a goodwill for a country, Tourism is the production of a nation's culture which has been defined as the sum total of its achievements, its expression of its own personality, its way of thinking and acting. Tourists are a mirror to the country they belong, in as much as they reflect the social conditions prevailing in their motherland.

4. Social Integration

Speakers at the 1965 IUOTO Congress spelt out the positive potential of tourism, as a factor influencing social integration. Tourism, it was felt, is a passport for peace. It has the objective of bringing mankind closer together. All vacations involve change and adaptation. Groups from different races, regions and political areas meet and intermingle.

5. Educational Value

The new education for today is 'tourism' for it fosters as feeling of love, understanding and goodwill. It generates international and emotional integration. With all the political and economic avenue unsuccessfully explored, the only hope for international emotional integration is pinned on tourism. In order to establish special unwritten and unspoken relationship with people of different types and having different ways of living, travel and tourism is the best answer.

6. Regional Growth

Tourism is an important factor in the regional development of nations. It brings employment and supplementary income to less developed regions of a country. In some region like resort areas, it can become a main economic source on which a large part of resident population depends directly or indirectly. The indirect impact of tourism on regional development could be as great as the direct impact. The economic exploitation of non-urban areas by tourist generally depends on the natural and economic resources of vast region more difficult to access, frequently involving problems of connecting infrastructure works, the supply of consumer goods and skilled labourer, etc.

7. Spiritual Value

Tourism is fundamentally the possibility of freedom to move about. Travel indulge in physical and intellectual escape, learning of foreign monuments and association with other people. Travel is an intellectual and spiritual art.

More and more vacation villages, yoga centres, spiritual centres, clubs and hotels have expanded greatly in recent years. In addition to offering sea, sun, room, board, companionship these villages have started organising special evenings, cultural outings across the country, discussions, conferences, music and even to provide discotheques and libraries.

India provides a unique example in third world countries for first building up an economic base and then building a tourism superstructure. Tourism offers many lessons on its economic, socio-cultural, and ecological consequences specially for a developing country. The tourism

industry without chimneys has acquired a phenomenal scale and reach the world over. Its short-term gains obscure its long-term economic, ecological and cultural costs. Since last two decades many third world countries who jumped into tourism race have begun to question how big a slice of the cake they ended up with. No doubt, tourism brought in foreign exchange but without an economic base, the industry relied heavily on imports, a substantial dollar drain, besides being in the hands of rich tourist generating countries who controlled hotels cartels, airlines, tours and agencies.

In nut shell, tourism contributes to the mutual knowledge of man and to the development of the sense of hospitality. It reduces distances between the social classes and the human races. It overcomes the isolation of people by encouraging them to vanish inauspicious prejudices through the encounter of civilization and culture, broadening the vision and acceptability for closer ties and mutual understanding, a socio-economic cultural interaction.

3.9 Economic significance of Tourism

1. Tourism as a source of National Income

Tourism has emerged as a key sector of the world economy and has become a major workforce in global trade. It has been making a revolutionary and significant impact on the world economic scenario. Tourism has been identified as the major export industry in the world. The multifaceted nature of this industry makes it a catalyst to economic development and helps balanced regional development. It is a low capital, labour intensive industry with economic multiplier and offers an opportunity to earn foreign exchange at low social cost. It is the largest service industry globally in terms of gross revenue as well as foreign exchange earnings. Tourism can play an important and effective role in achieving the growth with equity objectives which India has set for itself.

The economic benefits that flow into the economy through growth of tourism in shape of increased national and State revenues, business receipts, employment, wages and salary income, buoyancy in Central, State and local tax receipts can contribute towards overall socio-economic improvement and accelerated growth in the economy. Tourism is overwhelmingly an industry of Private sector service providers, although the public sector has a significant role to

play in infrastructure areas either directly or through public–private partnerships (PPPs) approach. It is a multi-sectoral activity characterized by multiple services provided by a range of suppliers. It is quite similar to manufacturing industry, where the supply chain is as important as the end product. The related sectors include airlines, surface transport, hotels, basic infrastructure and facilitation systems, etc. Thus, the growth of tourism cannot be attained unless the issues related to all the sectors are addressed simultaneously.

2. Employment generation

The growth in the tourism sector emerged as a very important contribution to the national economy and contributed quite a lot for employment generation in various tourism related activities. The not direct employment multiplier in the case of tourism is fairly high and is estimated as 2.36 which implies that direct employment of one person in the tourism sector creates employment to 1.36 persons in other sectors of the economy due to linkages with tourism. These linkages are in the sectors like agriculture horticulture, poultry, handicrafts, construction, sports etc. Further these directly/indirectly employed following the development of tourism may also need more goods & services as a result of such employment than what they would have demanded otherwise. Additional demand will thus generate more employment and further multiplier effect will come into force through successive chain of transactions. In fact investment in tourism has the potential to create more jobs compared to many other sectors and all the more at a lower level of investment. The labour/capital ratio is very favorable in tourism sector compared to many other industries with 47.5 jobs for a million rupee investment as has been seen in the survey conducted by the Ministry of Tourism (MoT), government of India (Kanjilal, 2006). The economic benefits that flow into the economy through growth of tourism

Tourism importance, as an instrument for economic development and employment generation, particularly in remote and backward areas, has been well recognized the world over. Tourism is one economic sector in India that has the potential to grow at a high rate and can make sure consequential development of the infrastructure of the destinations. It has the capacity to capitalize on the country's success in the services sector and provide sustainable models of growth.

LESSON 4

TOURISM AND CULTURE

4.1 Learning Objectives

After reading this lesson, you will be able to

- ❖ to bring out the important features of cultural tourism in India
- ❖ to highlight the people's basic instinct to travel
- ❖ to examine the economic activities of tourism

Structure

- 4.1 Introduction**
- 4.2 Cultural Tourism**
- 4.3 People's Instinct to Travel**
- 4.4 Tourism as an Economic Activity**
- 4.5 Let us sum up**
- 4.6 Answers to check your progress**

4.1 Introduction

Tourism covers all those aspect of travel whereby people learn about each other's ways of life and thought. Personal and international contact have always been an important way of spreading ideas about other cultures. Tourism is an important means of promoting cultural relations and international cooperation. Development of cultural factors within a nation can be viewed as a means of enhancing resources for tourism. The whole way in which a country represents itself to tourists can be considered its cultural factors. The food, drinks, hospitality, manufactured and craft products and other aspects of a nation's life, all appeal to travellers and visitors. The success of tourism depends not only on better transportation and hotels, but also on adding a particular national flavour in keeping with traditional ways of life and in projecting a favourable image of the benefits of such goods and services.

4.2 Cultural Tourism

Cultural tourism is characterised by a service of motivation such as the desire to learn and to study in a centre famous for its high standards of living and teaching, to study the habits, the institutions and the life of foreign people, to visit historical monuments (traces of past civilization) the great modern achievement, the art galleries, the great religion centers, to participate in art festivals and celebrations, to take part in or assist in music, theatre, dance, folklore, festivals, etc.

India is a large and popular country with a great past and great tradition. It can boast of some four thousand years of civilized life, and as such it must be ranked as one of the great civilization of the world. It is almost living civilization whose traditions arise directly from its past. For these reasons, for any foreigner a visit to India must have profound cultural impact, and in this first and broad sense, all tourism in India involved, at least an aspect of culture-contact and is, therefore, potentially cultural tourism.

Theatres, libraries, museums and other national institutions are a great asset in attracting the interest of visitors. Museum and monuments are among the expected features in tourism itinerary.

Cultural tourism will constitute one of the important features of the plan and it is proposed to evolve master plans of the areas surrounding some of the selected archaeological centres with the object of preserving their environment and natural setting. It is under the aegis of UNESCO and UNDP to assist in the preparation of these plans. The following monuments were included in the proposal:

1. Cave temples of Elephanta, Ajanta and Ellora
2. Buddhist Centres at Sarnath, Gaya, Nalanda, Rajgir, Kusinagar, Sravasti and Sanchi
3. Bijapur, Aihole, Badami, Pattadakal and Hampi; and Khajuraho, Bhubaneshwar, Puri and Konarak

1. Indian Art and Crafts

The fine arts of a country are those primary subject to aesthetic criteria or judgment or beauty and meaningfulness. Paintings, sculptures, drawings, architecture, water colour, graphic

acts and landscape constitute very important motivations for travel. The tourists to India have a far greater inclination to satisfy their artistic predictions, through what we call 'cultural shopping'. The purchases, for example, are taken home as souvenirs and, therefore, the sale assumes considerable importance.

The centres of crafts and arts form part of the cultural tourism in the sense that there are visitors who are interested to visit centres of traditional arts and crafts. For example, a group of 89 hoteliers, sponsored by Catering Time of London visited India in November, 1976. They were so much impressed that some of the members were staying behind to study more about Indian Jewellery

In the field of the applied arts, metal work, carving, jewellery and embroidery, the local artisans have always possessed a highly developed sense of colour and form. Much of this skill among the potter, the carpenter, the smith, the weaver, is due to the heredity nature of their occupation.

The glazed pottery of Punjab and Sindh is very famous. A fine coal-black pottery is produced in many parts of India. The Madura pottery is famous for elegance for forms and richness of colour. Gwalior pottery is much in vogue amongst Europeans.

India is famous for its arts and craft. We have dyer's houses near Sanganer at Jaipur, the 'himroo' weavers of Aurangabad, the skill weavers at Kanchipuram and Varanasi, the bronze founders of Swami Malai, the stone masons of Mahabalipuram, the Ivory gravers; of Mysore, Delhi, Travancore and Rajasthan, marble workers of Agra, the sandalwood carvers of Mysore and Bangalore, the hand-embroidered shawls of Kashmir, the brocade of Banaras and Murshidabad, the jewellery of Delhi and Jaipur, the in-laid metal-ware of Muradabad and Hyderabad, glass and bangles of Firozabad. A visit to shops where these handicrafts products are actually being made constitute a very appealing form of guest entertainment. If the visitors can see the handicraft items being made by craftsmen and then have the immediate opportunity to buy these products in an adjoining room and in a near vicinity a powerful sale technique can be created. The hotels can also display local art, craft and handicrafts objects within their building and in the immediate vicinity so that the guest may become acquainted with some expression of fine art of the local people. Art festivals can be arranged for the display of fine

arts and other forms of craft work, music, pageants, conventional military formations and other cultural attractions, which make a stimulating cultural experience.

2. Music

Music is the traditional item of a country. The musical expression and resources of a country are among its most appealing and enjoyable aspects. A tourist, when visiting a country likes to know about the country as much he can. Music is an important part of Indian culture. The Indian music provide a cultural and sophisticated entertainment to the tourists, particularly in the evening. Hotels can bring to the guests opportunity for enjoyment of local music at its best. Evening entertainment programmes, concerts recordings, and sound production systems all aid in this particular aspect of the art of the country. Parades and welcoming ceremonies with musical groups add to the enjoyment of sense of appreciation of local musical resources. Similarly, photograph of tape recordings which the visitors can purchase for use at his home provide another effective means of keeping in touch with the culture of a particular area and a reminder of the joy and beauty of the country's music.

3. Dance

Dances are one of the most exciting and appealing aspects of a country's culture. Dancing in its nature, or aesthetic forms provides beauty and interest to visitors. The colour, costume, music, setting and skill of form and execution all add to this type of appeal.

India have her own nature and ethnic dancing. The combination of dancing and ethnic music are definitely a part of the culture and should be used in tourist entertainment, Dance and entertainments should be part of hotel programmes.

The Russian Ballet, folk dance of the Eastern European countries, Ballet Folklore of Mexico, Thai dancing, Kabuki dances of Japan, dances of many African nations are all cultural expressions.

Indian music or dance, though they can hardly ever become a primary attraction, should be exploited as a subsidiary interest. Here encouragement of often musicians, singers and dancers by the tourist industry should serve useful purposes.

4.Agriculture

The agriculture of an area constitute an appealing and interesting aspect of the culture. Most of the visitors are interested in type of farming, livestock, poultry, dairy enterprises, crops, fresh fruits and vegetables, honey, drinks, and other farm products are readily enjoyed by the visitors. Agricultural development and services constitute an interesting aspect of local tours.

5.Gastronomy

There is a great potential in the exploitation of India's traditional wines, beers and spirits. We have many regional cuisines and healthy and natural drinks which may be of great importance for the tourists. Tourists enjoy the native foods and items which are of a local or ethnic nature. Catering industry can play a dominant role in making a lasting impression on the tourists. Purchasing preserved food, wines and liquors, freshly prepared food for consumption is an example of cultural interest in the food and drink.

6.Industry

One of the important motivation for travel is the industrial development of an area. Most of the international travellers are interested about the economy of any region. They like to see the industry, commerce, manufacturing products of the visiting country. Visits of the foreigners to the industries will develop an interest in the culture of the region and will also allure them to purchase the products as a souvenir. They may also purchase these products upon their return to their home.

7.Business

Shopping is one of the most important elements in tourism. If properly organised, shopping and business establishments may be the most important aspect of the visitors' experience in our country. Monumental Heritage It includes India's art and architecture. Most of the tourists from Europe and America have interest in this aspect. The monumental heritage can be divided into four principal subject groups:

- Buddhist monuments;
- Hindu monuments;
- Indo-Islamic monuments; and
- Monuments of European and British Association with India.

These all deserves to be exploited for purposes of cultural tourism. This class of tourism has a great potential for development and should be exploited to a far greater extent than it is at present.

8.Natural Heritage: Nearly 50% tourists feel that “beautiful and natural scenery” contributed largely to their desire to visit India.

Wildlife: The forests, lakes, and rivers of India are the home of many rare species the lion, tiger, one-horned rhinoceros, snow leopard, wild ass and variety of exotic birds. There are beautiful wildlife sanctuaries being maintained and preserved, where the nature lovers can have the opportunities to see birds and animals in their natural habitats.

9.Religious Tourism

The abodes of gods in the Himalayas, Haridwar—the Gateway to Heaven on the bank of holy Ganga, the temples of Mathura and Banaras, the historical places of India, the sculpture of Khajuraho, the caves at Ajanta and Ellora, all these beckon the travellers to come and enjoy the beauty. Large number of Hindus, Muslims, Christians, Buddhists, etc. go on religious pilgrimages to the various areas which are well-known in the religious literature. Majority of the people belong to Hinduism. From Hinduism grew three new religions Buddhism, Jainism and Sikhism. In addition, Muslims, Christians, Zoroaster, Jews also exist. Thus, India can well be described as the land of religions.

For any foreigner a visit to India must have a profound cultural impact and, in its broadest sense, all tourism in India involves at least one aspect of cultural contact and is, therefore, potentially cultural tourism. Foreigners wishing to know something of Indian culture should see the life of the people. A cultural tour of India could include a visit to the temple site where

national dances are performed, a visit to places manufacturing Indian Jewellery and products like the fabled Banaras brocades, where a foreigner comes to know something of her cultural-heritage, as well as her progress to modernism. In a series of interviews conducted by the Ministry of Tourism in 1969, it was discovered that 54% of the tourists enjoyed their stay because there was such a feast of “beautiful creation of man, buildings, temples and churches.”

Cultural tourism constitutes one of the important features of the five year plans and it is proposed to evolve master plans of the areas surrounding some of the selected archaeological centres with the object of preserving their environmental and natural setting. Some years ago India acquired the services of Dr. F.R. Allchein in cultural tourism under the aegis of UNESCO to assist in the preparation of these plans. The cave temples of Elephanta, Ajanta and Ellora, Buddhists centers at Samath, Gaya, Nalanda, Rajgir, Kushinagar, Sravasti and Sanchi, Bijapur, Aihole, Badami, Pattadki, Hamalpi, Khajuraho, Bhubaneshwar, Puri and Konarak were being taken under the plan.

Man undertook journeys to places which he considered sacred or where he thought his deity resided. And so began the practice of going on pilgrimages which has remained in vogue throughout the ages with, of course local variation and periodic adjustments. The fundamental concept has always been that the deity lives or exercises a peculiar powerful influence in some definite locality. The practice of religious expeditions to sacred places took deep roots among the Egyptians, the Jews and the Greek. It attained its zenith under Islam. The prophet proclaimed it to be the duty of every Muslim, at least once in his life, to visit Mecca, Mohammed's birth place.

Christian pilgrimages arose from devotion to the memory of Christ. The devotees made it a point to visit places which were invested with memories of their Lord's earthly life. Two of the most sacred places to which the Christians visit are Bethlehem and Jerusalem. As the number of pilgrims swelled, so increased the number of places to which they would like to visit.

India is one of the oldest country for pilgrimages. People have come to this subcontinent in all ages and from all parts of the world in quest of religious knowledge and spiritual satisfaction. Religious minded tourists have a deep interest in India's monumental heritage. There is no place in our country which is not held sacred for one reason or another. Its rivers and lakes,

mountains, sea beaches, towns and temples, are all attractions for domestic and foreign travellers. India has been the birth place of many religions. Hinduism, Buddhism and Jainism and today Muslims, Christians, Sikhs and Zoroastrians live and worship peacefully in the secular state of ours.

Pilgrims naturally form the overwhelming bulk in this group. We can sub-divide them into the following categories:-

1. The regular visitors and tourists of Indian domicile in various parts of the world, people who are anxious to discover the cultural centres of the religions of their forefathers.
2. The growing number of Buddhists from Japan, Thailand, Ceylon, etc. who visit the great centres associated with Buddha.
3. The Americans and Europeans who are interested in some aspect of Hinduism, Buddhism, Islam and Sikhism.

The Hindus, Muslims, Christians, Sikhs, Jains and Buddhists and the followers of other faiths and religions have their holy places which they must visit at least once in a life time.

Thus, we find that the pilgrims traffic is the biggest part of tourist trade. It is very common that the traveller fits a visit to holy site or a tourist resort into his business trips. This should ensure a steady stream of visitors to India from other countries.

Democratic government has some time back highlighted the importance of the development of religious tourism. We have neglected to make the most of the holy places attractive which are of interest to tourists. There is a considerable scope for promoting tourists from south-east Asian countries by offering different package tours of places of Buddhist interest. Such tours could cover Bodhgaya, where the Buddha attained enlightenment, Sarnath, where in the quietness of the Deer Park, the Buddha preached his first sermon, Sanchi which is great Stupa, and Rajgir in Bihar. Important Buddhist sites like Ajanta and Ellora and the ancient universities of Nalanda create interest among tourists.

There could be a wider tour of India, in which the visitors might see magnificent religious places-Christian churches in Orissa, richly carved temples of southern India, huge mosques at Delhi and Agra and beautiful golden temple at Amritsar, and the array of shrines, temples and

palaces, of Banaras. For religious tours to be successful, the guide must be handpicked, knowing something of the tenets of different religions and answering knowledgeably.

10. Buddhist Tourism

Buddhism which was originally destitute of ceremonials has adopted the cult of pilgrimage. The sites where the Buddha was born, where He received enlightenment, where He preached and where He went into Nirvana hold the promise of salvation to, those who visit them. Before His 'Pariniravano' the Buddha spoke of four places which a pious believer should visit. They are the Lumbini grove where the Master was born, Buddhagaya where he attained enlightenment, the Deer Park of at Sarnath where he set into motion, the wheel of the Law; and Kushinagar where he passed into 'Nirvana". In Buddhist sacred lore, there are four other places-Sravasti, Sanaksya, Rajgir and Vaisali together with first four, make up the right sanctified spots.

Pilgrims through the age have visited these places concentrated by the Buddhas' presence there. The Emperor Ashoka was one such pilgrim and he called such pilgrimages "Dharmayatra" or "Tours of Piety". The modern pilgrims undertaking the ancient pilgrimage include in their tour, the great centres of Buddhist art Sanchi and Bharhut, Amravati and Nagarjunakonda, Ajanta and Ellora, Karla and Bhaja. These centres represent a wealth of painting and carving sculpture and architecture arts and drew their inspiration from the life and teachings of the Buddha. The splendour and magnificence of these have attracted domestic as well as foreign visitors regardless of their faith. These places are monumental testimonials to the creative force of Buddhism.

4.3 People's Instinct to Travel

1. Economic Causes

The principal causes of the rapid growth of demand for tourism in the highly developed industrialized countries in the course of recent decades can be summed up as economic, social and technological in nature. Rising per capita incomes, coupled with increasing prosperity, had given higher purchasing power and an increase in discretionary incomes to a large majority of people. As a result this has made tourism and travel accessible to many. A larger proportion of people can now afford an 'annual holiday'. In fact, many can even afford to take a 'second

holiday' for a shorter or a longer duration. The economic prosperity has also resulted in many more people owning a private motor car. Increased mobility as a result of use of motor car for travel, therefore, is yet another important economic factor which is responsible for growth in tourism in Europe and North America.

2.Social Causes

The social causes of the rapid growth of tourism on the other hand can be linked with new attitudes towards travel and leisure. Traditionally considered a luxury, travel now is considered to be a normal activity and an indispensable part of lifestyles and consumption patterns of a large majority of people enjoying a higher standard of living. The present day tourist, having a different kind of a background than a traveller of the past, is much more informed. His ideas about travel are quite different and he comes from a wider social background. His tastes and desires are much more varied. A large number of people are now going abroad to participate in more exciting, challenging and exotic activities like mountaineering, water skiing, trekking, winter sports, underwater swimming and the like.

3. Technological Causes

The technological causes of the rapid growth of tourism can be associated with the advancements made in modernising transport and communication systems. The impact of the modern transport technology, especially in the aviation field has brought about a completely new meaning to travel and tourism. Travel to even remote destinations has now become a reality. The technological developments have now made it possible for an increasing number of people to travel to faraway places which only a few decades ago.

4.4 Tourism as an Economic Activity

There are numerous debates within the tourism literature on the extent to which tourism is a business, an industry, a service or just a phenomenon. The WTTC outline the extent to which the terms of tourism industry and tourism economy can be defined, where the 'travel and tourism industry' describes the direct effect of travel demand and relates to services such as accommodation, catering, entertainment, transport and attractions. WTTC portray this as the

tip of the iceberg. In contrast, the 'travel and tourism economy' refers to the wide effects of flow-through of travel demand across the economy. This includes the 'travel and tourism industry' but also those industries which support it, such as printers, publishers, wholesalers, utilities, administration, computing and security.

One of the main justifications for tourism development is the potential of economic benefits. Tourism is often encouraged to draw in much needed foreign exchange, generate employment and improve economic and social prospects in a destination area. There are a number of characteristics of tourism which distinguish it from other industries, goods and services. These are as follows:

- Tourism is an invisible export industry- there is no tangible product and consumers tend to make a purchase without seeing the product first hand.
- Tourists require supporting goods and services - the expansion of existing infrastructure and services may be required or new ones created.
- Tourism is a fragmented product- It consists of a number of elements, such as transport and accommodation as well as landscape and cultural resources.
- Tourism is a highly price and income elastic product.
- Tourism is a perishable product- If a hotel room is not booked one night, then income is lost.
- Tourism is a subject to unpredictable external influences, such as currency, politics, tourist motivation and taste, and these features are discussed in more detail.

1.Income

As Tourism stimulates economic activity in a destination, it assists in improving the overall economic status of a country. The measurement of economic production and nation wealth is gross domestic product (GDP). Tourism can lead to increases in GDP. The Asian countries and GDP has recovered since the Asian economic crisis and SARS crisis. For example, The Caribbean and Pacific Islands, over 40 percent of GDP for many islands is derived from tourism, which rises to 88 percent in the Maldives.

Mules(1998) examined the economic contribution of tourists by identifying three components: number of tourists, length of stay, and average expenditure and how tourism expenditure changes over time. The results have implications for government policy aimed at achieving higher GDP through tourism.

2.Employment

There are three types of employment which may be generated by tourism:

- direct employment- jobs created as a result of visitor expenditure and directly supporting tourism activity, e.g. hotels.
- indirect employment- jobs created within the tourism supply sector but not as a direct result of tourism activity.
- induced employment- jobs created as a result of tourism expenditure as local residents spend money earned from tourism.

Several factors influence tourism-related employment patterns. The type of tourist activity has an effect on employment as some forms of tourism are more labour intensive than others. Farm tourism, particularly farm accommodation, does not necessarily create new employment , whereas resort development will create a variety of new jobs. Employment opportunities for host communities may also be questioned as the benefits of tourism employment may not always be widely felt by local people. Employment of local people will be based on the local skill base. In most cases , there will be few managerial posts in local tourism development but many jobs requiring minimal skill with low pay and little reward. Managerial grade jobs may be advertised across a wide geographic area to attract well qualified and experienced candidates and, in less developed countries and small island states , expatriate workers are often imported on higher salaries. Employment benefits may often be disguised as tourism jobs to attract people from other sectors or people not normally part of the economic workforce. This includes those who take second jobs , holiday work or those who generate extra revenue from an existing business. This underlines the economic significance of tourism in developing and developed countries.

3. Inflation

Tourism development often creates inflationary effects on local economies, relating to land, property and goods. The increased demand for land increases the price. While this is beneficial to those selling the land, there is a negative side effect on the local population, particularly those who are not involved in tourism. Local people are then forced into competition for land and housing with tourism development interests.

4. Opportunity Costs

Opportunity costs relate to the time, effort and money of developing tourism at the expense of other activities or areas of investment. If a government invests in tourism, then the money spent is unavailable for other uses. This may be detrimental to the well being of local communities. Tourism investment can, of course, benefit local people through improved infrastructure, services and employment potential. This necessitates a cost benefit approach to the analysis of tourism impacts, which is often expressed in terms of the leverage of additional investment or tourist spending where a public sector investment occurs.

5. Dependency

Heavy reliance on a single industry in any region or country is a risky strategy in the long term. Economic dependency on tourism is a much criticized policy, particularly for less developed countries and peripheral regions in the developed world. Some less developed countries rely on tourists from a small number of generating countries, which is the case for many small islands. Changes in their markets are not controllable and decreases in demand for tourism will have huge effects in the receiving country. The Concentration index is used to identify the level of the dependency on one or more generating countries and is calculated as follows:

$$\frac{\text{Tourist arrivals from primary markets}}{\text{All Tourist arrivals}} \times 100$$

It is more favourable destination to attract a broad base of tourists so that, if there is a down turn in one particular market, then the consequences are not so damaging.

6. Seasonality

Seasonality is one of the major disadvantages in tourism and can cause negative economic effects on a destination. Although the high season may bring the opportunity to generate significant revenue from tourism, the economic gain must be sufficient to allow an income which will support individuals and the economy throughout the year. A high incidence of seasonality generally means the employees have jobs for only one part of the year. It also means the investment made in the tourism business is idle for part of the year. So, profits have to be made in a shorter time period than in most industries and spread across the year may not seem as lucrative as imagined. Some hotels, attractions and other tourism related enterprises close down entirely in the off peak season. Others, depending on location and climate, attempt market diversification, promotion and incentives to retain more even business or may stage events.

7. Leakage

In many cases, foreign exchange generated by tourism activity may not benefit the economy of the destination. Foreign investors in the shape of multinational corporations (MNC) which control accommodation, travel and tour organisation receive substantial proportions of tourist spending. Leakage may occur through :

- repatriation of profits generated from foreign capital investment
- vertical integration
- not sourcing services and goods locally
- payment for holidays made in the generating country
- ownership of transport

Bull(1995) notes that large, well developed destinations demonstrate the lowest leakage rates as they contain supply industries which can compete with foreign imports and therefore retain more money within the local or regional economy. In less developed countries, there is a higher propensity to import due to a lack of supporting industries. Here, tourism multiplier effect cannot develop to its full potential as most of the tourist revenue filters out of the destination.

8. The Tourism Multiplier

A multiplier is a statistical expression of how much income or employment is generated by a certain amount of tourist spending. The multiplier concept is based on the premise that tourist expenditure will inject additional cash flow into the regional economy and increase regional income. The size of the multiplier is based on the proportion of additional income spent within the region and so on. The income multiplier is the ratio of income to the tourist spending that generated it. There are three types of spending

- direct spending- this is the money spent by tourists on the services they need on a holiday, such as accommodation, food, shops, attractions.
- indirect or general spending- this represents the expenditure of tourism business on goods and services.
- induced or additional spending- this is expenditure by the resident community of income earned directly or indirectly from direct spending

9. Alternative Measures

One of the newer techniques used to rectify these imperfections in estimating the economic impact of tourism, is the computable general equilibrium (CGE). Whilst the CGE incorporates an IO framework, it also models a wider range of elements, ranging from basic to more complex forms, and may be static or dynamic. But CGEs are often expensive to undertake, despite the availability of computer models.

Tourism is a major global industry that provides huge opportunity for economic growth, foreign exchange earnings, employment and income generation. It has been seen that tourism results in a range of economic impacts, both positive and negative, depending on the location and socioeconomic foundation of a destination. Future challenges for the industry include:

- reducing leakage of tourism revenue from destination economy
- ensuring wider and more equal distribution of economic benefits
- developing strategies to ensure appropriate return on investment
- balancing the needs of commercial operators with socioeconomic stability in destination areas.

For any government seeking to develop tourism, greater attention to those aspects will assist the tourism industry in striving towards a more sustainable future. All too often, a critical awareness of the true economic costs of tourism to host communities and regions are obscured or glossed over in attempts to develop employment in declining regions or cities as well as in the less developed world. Yet for tourism to reach its full potential, developing a tourism product and visitor industry based on the local economy and environment to support tourism related growth needs careful planning and management. The economic aspects of tourism cannot be seen in isolation from the wider economic growth and development of countries, regions and places since they need to be carefully integrated into the existing social and cultural structures. In this respect, development planning in less developed countries needs to adopt a broader evaluation of tourism so that the expected benefits are balanced with the costs and impacts to the are being developed.

Check your progress

I Each answer should not exceed 50 words

- (a) Define cultural tourism
- (b) Buddhist Tourism
- (c) Leakage

II Each answer should not exceed 250 words

- (a) Briefly mention about the people's instinct to travel
- (b) Highlight the importance of Tourism Multiplier

III Each answer should not exceed 500 words

- (a) Explain in detail about the scope of cultural tourism in India
- (b) Describe about the economic activities of Tourism

4.5 Let us sum up

For any foreigner a visit to India must have profound cultural impact, and in this first and broad sense cultural tourism potentially plays an active role is explained in cultural tourism

aspects. The principal causes of the rapid growth of demand for tourism in the highly developed industrialized countries in the course of recent decades can be summed up as economic, social and technological in nature is considered as a basic instinct for travel. Tourism stimulates economic activity in a destination, it assists in improving the overall economic status of a country. The measurement of economic production and nation wealth is gross domestic product is learnt in the economic activities of Tourism.

LESSON 5

TOURISM AS A MERCHANDISE

5.1 Learning Objectives

After reading this lesson, you will be able to

- ❖ understand the concept of tourism merchandise and learn the sales promotion activities
- ❖ study about the employment potentials of the tourism industry
- ❖ learn about domestic and international tourism
- ❖ know about the various tourist destinations in India

Structure

5.1 Introduction

5.2 Tourism Product

5.3 Sales Promotion

5.4 Domestic Tourism or Internal Tourism

5.5 International Tourism (Foreign Tourism)

5.6 The distinction between domestic and international tourism

5.7 Employment Potentials in Tourism Industry

5.8 Tourist Centers of India

5.9 Lets sum up

5.10 Answers to check your progress

5.1 Introduction

Merchandising is the activity of promoting the sale of goods and services at retail. Merchandising activities may include display techniques, free samples, on the spot demonstration, pricing shelf talkers, special offers, and other point of sale methods. According to American Marketing Association, merchandising encompasses “planning involved in marketing

the right merchandise or service at the right place, at the right time, in the right quantities, and at the right price’.

5.2 Tourism Product

The activity of making people more aware of your products and increasing sales through advertising, special displays or events etc. Tourism is a very complex industry because of its multi-faceted activities which together produces the “tourist product” . It is complex because of various sub sectors that are in themselves complete industries, if considered independently (lodging, transport, etc). Its complexity, furthermore, lies in the fact that tourism promotion in its various forms has to be directed at large numbers of people in various lands of different socio-economic structures, having different needs, tastes, attitudes, expectations and behaviour patterns.

5.3 Sales Promotion:

Concept

Sales support activities are all those activities and measures which establish personal or indirect contact with customers or trade intermediaries. In the field of tourism, it is considered to be all intermediaries. In the field of tourism it is considered to be all those promotional activities designed to transmit to the public and to the travel trade specific and detailed information on aspects like transport, accommodation prices, attractions etc. concerning the tourist services to be promoted in the tourist markets. In addition, the sales support is also a process of training employees of an organisation to be sales-minded. In other words through the process of information dissemination regarding a product the sales team becomes motivated to participate in the product sale. Sales support has certain distinct closely related functions which neither advertising nor public relations can be expected to fulfill effectively. It is a channel of communication between the manufacturer or the producer of a tourist service (accommodation unit, transport company etc) and the distributor or the seller of that service. Secondly it aids and assists the seller to do his job more effectively with the support of different techniques.

1 Aim of Sales Promotion

The aim of the sales support activities is:

- (a) To inform the customers (tourists-both actual and potential) or trade intermediaries, travel agents, tour operators, airlines etc) about the various services available, their price and quality, etc.
- (b) To assist them in selling these services to the ultimate users;
- (c) To motivate them to devote a sufficient level of sales activity to the service promoted.

2 Factual Information to be Aware of

- (i) the country's tourist facilities such as, existing as well as new establishments, accommodation capacities, price schedules for various services.
- (ii) Various travel regulations and formalities such as visa regulations including different certificate needed, customer rules , rates of exchange for currency.
- (iii) The various transport and communication services available. The schedules of airlines, railways, road transport services, shipping services (where applicable), their rates.
- (iv) Weather conditions at different times of the year, and types of clothing required during different seasons.
- (v) The utilisation (occupancy rates) of existing tourist facilities at different times of the year.
- (vi) Plans for opening of new destinations, hotels, transport routes (railways, airline, etc) and also plans for expansion for existing tourist facilities.

3.Sales Support Techniques

Sales support techniques can be grouped into the following three main areas

- 1) Printed Material
- 2) Special Offers and
- 3) Newsletters

4. Printed Material

(a) Brochure: Brochure is a document bound in the form of a booklet. It is a voluminous publications with special emphasis on the quality of paper, the reproduction of illustrations, graphic design of the cover and the layout of the pages. Special emphasis is laid on the quality of the paper and the printing.

The brochure contains:

- (i) Quality of Paper
- (ii) Layout
- (iii) Quality of printing
- (iv) Photograph
- (v) detailed itineraries
- (vi) Special features
- (vii) Weather conditions
- (viii) Maps of areas
- (ix) Tour condition
- (x) Tips

5. (b) Folder: A folder is a single piece of illustrated paper which can be folded. As compared to the brochures the folder is less voluminous and its production is less time consuming. These are usually printed on a single sheet and then its production is less consuming. These are usually printed on a single sheet and then folded ranging from a simple centerfold to more complicated folds. It is perhaps, the most widely used sales tool by official tourist organisations and by tourist service enterprises. It can be used alone or in conjunction with a 'Sales Letter'. It is less expensive and can be used in a variety of ways. While producing, special care needs to be taken about the quality of the paper and printing. The folder as compared to the brochure is short, tastefully illustrated and attractively designed and produced.

6. (c) Shell Folder: Shell folders are blank folders interspersed with pre-printed photographs and are provided free of at a low cost by airlines or national tourist offices o

encourage tour operators/travel agents to run programmes using their services or destinations. Tour operators travel agents can overprint a suitable text describing their programmes. Since only the text needs to be added, a one colour print run at low cost meets the requirements of tour operators etc. The use of a shell folder is a convenient way to reduce printing costs and is suitable for limited capacity tour programmes or ad hoc special tours.

7. (d) Sales Letter: Sales letter is a direct mail material. It is a tool through which an attempt is made to gain agreement or favourable action towards a product. The sales letter offers many opportunities for selling travel services. These could be used alone or in combinations with travel brochure or folders. "These are sent out to those people whose addresses have been selected according to the likelihood of their being potential users of the services offered. A proper mailing list is a prerequisite for effective use of this tool. Sales letter require very little time to prepare and to distribute. The effectiveness of a sales letter can be measured very rapidly from the response it draws. This is done by way of a reply card which is included with which the recipient can request further information and also travel literature.

8.(e) Display Material: Display material includes posters, dispensers for sales literature, cardboard stands articles of handicraft, exhibits, etc. This material is used in the agency's office or in the travel agents sales-rooms. The material is displayed in such a way that it attracts the attention of a visitor as soon as the enters the office. In many cases, cinema slides are also used, either fixed or on an automatic projector for display purposes.

9. Special Offers

Temporary price reductions, free gifts, premiums and various types of contests are being used extensively in competitive industries like cosmetics, packaged foodstuffs, etc. The tourist industry has also started to adopt these techniques as an additional sale support tool. Reduced airfares for students, 'affinity group' special off-season rates at hotels and tourist reports are the examples of some of the special offers in the tourist industry.

10. Newsletters

Newsletter is yet another important promotional medium utilised extensively by tourism organisations. Its main purpose is to get the organisations message across. A newsletter can

be considered to be a major advertising medium. It is a persona reminder to regular clients that a company is still in business. Newsletters are also the best possible instruments for image building. The strength of the newsletter is in the continuity they create. Published monthly, a newsletter maintains a running dialogue with customers. It is also an inexpensive form of media to inform about staff etc.

11.Creativity

If a firm/hotel/travel agency is creative and innovative, it can get a regular stream of orders. Similarly, if the staff of a firm engaged in the business(public or private) are creative, their employers are certainly likely to gain. Brand image is improved and cash counters sales increase if creative forces of the organisation are put to use.

According to John F.Meal, "Creative thinking is the process of bringing a problem before one's mind clearly as by imaging, visualising, supposing, musing, contemplating or the like and then, originating an idea/concept, realization or picture along new or unconventional lines. It involves study and reflection rather than action."

There are 5 stages in the creative process, as follows:

- (a) Saturatison
- (b) Preparation
- (c) Incubation
- (d) Illumination
- (e) Verification

The concepts of havelis, farm tourism, eco tourism and adventure tourism were the outputs of creative brains. The marketers designed old havelis as new destinations and added a touch of ethnicity to these settings/premises of the year. As the results were quite encouraging. Similarly Place on Wheels, Royal Orient, Euro Rail, Amtrak, Star Cruises and Frequent Flier programme are the living examples of creativity of a handful of people. Of creativity were eliminated from the area of tourism, we would not find any customers in this field. Creative design patterns and art objects of the year attract the attention of millions. So, tourist long for a creative touch in everything they buy, eat, drink, see or enjoy. They want to switch off the

routine; and a tour is an ideal concept to break free. If this concept is given inputs of creativity, the tourists may not leave the tourist spots but stay there forever.

12. Communication

All the persons involved in the travel and tourism trade ought to learn at least three languages. These are the mother tongue, the national language and at least one international language. They must also learn to empathise with tourists, visitors or hotel guests. Polite speech, decent body language and suave personality are the vital elements that make a person a successful seller. Letters fax messages and E-mail message must be written clearly and also sent in time. Courtesy calls must also be made in this field.

The person must allow the visitor to speak. If language is a barrier, the travel agent should show some standard pictures (eg Car Food, Hungry, Thirsty, Going, I Cannot, I can , Train, Airline, Ticket, Coach, Water, Wine, Doctor, Police Etc) to the tourist s that he may be able to express his need. Documents related to travel to travel or stay must be neatly typed. Advertisements should be in a language that the targeted customers understand with ease.

13. Self-Motivation

The staff engaged in various sectors of tourism a must be self-motivated to work and deliver concrete results. Motivation and morale are closely related. If a person morale were high, he would be motivated to work and give sterling performance. If his morale were low, he would not give good performance at all. People are motivated by different factors; such factors would also combine with their mental make-ups backgrounds, education, family status, economic condition etc. The management has to identify the chief motivating factors for a person. Accordingly, it must define a set of motivating factors for each person instead of treating them with the same set of such factors. This person-to-person treatment would develop the organisation.

14. Team Building

Teams are very much vital for the success of any business/organisation. Some of the reasons have been given by Wendell L French and Cecil H. Bell as follows,

- (a) Most individual behaviour is rooted in the socio cultural norms and values of the work team. If the team changes those norms and values, the effects on the individual behaviour are immediate and lasting.
- (b) Many tasks are so complicated that these cannot be performed by individuals, So, people must work in teams to complete such tasks. Rome was not built in a day; Rome was not built by one more either!
- (c) Teamwork leads to synergy, which means that two plus two is equal to five and not four. So, the output of the team is far greater than those of its members taken on an individual basis.
- (d) If people work in teams, their social, affiliation and interaction needs are satisfied. They also get status, recognition and reverence; these are the things human beings long for.

In the parlance of tourism, team building has great significance. There are two reasons for this phenomenon as follows,

- (a) Generally, several different organisations or firms join hands to provide products/ services related to tourism. If they do not work in teams, the entire system cannot meet its goal.
- (b) Even within an organisation, which has its presence in several countries, the staff must work and perform as parts of teams. The organisation has to deliver concrete results. But a single person cannot deliver results on his own. So teamwork is necessary.

Hard work, discipline, dedication to purpose, willingness to adopt new technologies/ procedures and cooperation are some of the few features of a team. Groups become teams by conforming to disciplinary norms. They share a common purpose, agree on performance goals, define a common working approach, develop high levels of complementary skills and hold themselves mutually accountable for results. Teams would become much more important in the future than they are today, even in this era of individualism.

Team building studies are a part of Organisational Development. The latter has become one of the most fascinating subjects of management during the recent times.

5.4 Domestic Tourism or Internal Tourism

In this case people travel outside their normal domicile to other areas within the country. People find it easy to travel domestically because there are no language services as a medium of communication. The currency which is used in everyday life continues to be the media of exchange. There is no need to meet particular requirements of payment implications. It is a substitute for foreign tourism and results in the saving of foreign currency for the country of residents .

5.5 International Tourism (Foreign Tourism)

It is a kind of tourism wherein people travel to a country other than that in which they normally live and which forms separate national unit within its own political and economic system. Due to different currencies, international tourism has repercussions on the balance of payments as each country has to balance its transactions with the rest of the world. There are also obstacles put by the authorities for crossing the national frontiers, with the result, there is a need for documentation—passports, visas, and other conditions of entry and movements. This all regulates the flow of the tourists.

5.6.The distinction between domestic and international tourism

It is of degree rather than of substance. Now a days, due to the improvement in the language skills, currency and customs and the growing free movement of people between developing countries, the distinction between domestic and international tourism is diminishing.

International and domestic tourism, long and short distance tourism are the most important types. An international tourist crosses the frontiers of many countries, uses different currencies and faces different languages. Larger countries are likely to have greater attractions for international tourism. It is simple to state that longer distances will have to be covered in this type of tourism. Yet for small size countries like Netherlands, Bangladesh, Nepal or Sri Lanka, crossing into a neighboring country involves very short distances.

On the other hand, domestic tourism concerns travelling within the home country. It does not face the problem of seeking a passport and visa or the conversion of one currency

into another. Scope for its expansion is generally more in a large size country like India with rising standards of living of its people. The distinction between these two types is getting reduced with the greater ease of movement between countries. A large number of countries in Europe are now included in the groups called the 'European Union'. So from January 1993, all travels of the citizens of its member states are classed as domestic. The lowering of barriers between friendly countries like the USA and Canada may also decrease this distinction for practical purposes. Even in case of Pakistan and India, travel is becoming easier as compared to many earlier years. Yet travel between India and Nepal has been generally free of such hindrances.

5.7 Employment Potentials in Tourism Industry

1 Travel Agencies: These institutions facilitate travel and other services for all individuals travelling for vacations or business purposes. Providing information about the destination, hotel ratings, the cheapest and the fastest mode of transport, visas, foreign exchange etc. is the job of a travel agent. Travel agencies are divided into roughly four departments-The Accountants, Tours, Travel and Cargo, A course in travel and tourism will help you to get a suitable job.

2 Tourism Department: This department consists of reservation and counter staff, sales and marketing staff, tour planners, tour guides, information assistants and officers in the Directorate and Department of tourism. These officers for the Directorate and Department of Tourism are chosen from the civil services and their job is to promote and plan tourism. Information assistants provide knowledge concerning destinations and plan itineraries. They are selected through a competitive exam which is held by the staff Selection Commission. Guides too are divided into three categories namely regional, state and local. In order to be a guide, you must have knowledge about history, art, architecture and language.

3. Hotels: Hotels provide travellers with food and accommodation services. This service industry requires skilled and professional individuals and its manpower requirements are vast. Jobs related to front office, operations, housekeeping, food and beverages, accounting, management and public relations are available. A course in hotel management would help you to get a suitable job.

4.Transport: Transport refers to means to travelling from one place to another. Air, railways, road and sea are the basic categories that transport is divided into.

5.Road Transport: Coaches and tourist cars provide scope for self employment. Drivers with good conversation skills and knowledge of different languages are ideal for this job.

6. Airlines: This sector of the travel and tourism industry is in great demand. The ground staff and the airlines need smart and presentable professionals with a degree in hotel management or travel and tourism. Traffic assistants, reservation and counter staff, air hostess & flight pursuers, sales and marketing staff and people to provide customer services are all required. Airlines like Indian Airlines, Emirates, British Airways and Air India pay attractive salaries and provide a number of added benefits too.

7. Tour Operations: These individuals organize tours and manage travel and stay of their clients. They conduct tours to known tourist attractions and some of them help the tourists indulge in adventure sports like river rafting and rock climbing. To do this job, you have to have a pleasant personality, detailed knowledge concerning travel and language skills.

8. Time Share Companies: These companies own/manage holiday resorts with time shares owned by different members of these companies. It leads to another set of companies which provide services relating to sale/transfer/exchange of these time shares with an international network of resorts. You have the option of working with resort owning companies or time share exchange companies like RCI.

9. Holiday Consultants: This is a relatively new career option in the travel and tourism industry. These professionals provide all the information to their clients. They sell the holiday, plan the itinerary, make the travel plan, book the tickets and provide all the other details which are required.

10. Banks: Banks require people to assist tourists and travellers on foreign exchange. Usually MBA professionals are preferred for this job. Banks help in hotel and ticket bookings also.

5.8 Tourist Centres of India

India is a land of religions. India is known for roots of several religions like Hinduism, Sikhism, Buddhism and Jainism. There is no religion in the world which is not professed in India. Most significant religions practiced in the country are Hinduism, Islam, Christianity, Sikhism, Buddhism, Jainism.

1. Hinduism Pilgrimage Circuits

Badrinath: Badrinath is located in the North Indian state of Uttarakhand. It is in the Garhwal hills, on the banks of the Alaknanda River. Badri refers to a berry that was said to grow abundantly in the area, and nath means Lord. The legend goes that Shankara discovered a black stone image of Lord Badrinarayan made of Saligram (black basalt) stone in the Alaknanda river. He originally enshrined it in a cave near the Tapt Kund hot springs. In the sixteenth century, the King of Garhwal moved the idol to the present temple.

Dwarka: Dwarka located in the West is in the state of Gujarat, India. The city derives its name from word Dvar meaning door or gate in the Sanskrit language. It is located close to where the Gomti River merges into the Gulf of Kutch. The city lies in the westernmost part of India. The legendary city of Dwaraka was the dwelling place of Lord Krishna. It is believed that due to damage and destruction by the sea, Dvaraka has submerged six times and modern day Dwarka is the 7th such city to be built in the area.

c. **Jagannath Puri:** Puri is located in the eastern state of Odisha. Puri is one of the oldest cities in the eastern part of the country. It is situated on the coast of the Bay of Bengal. The main deity is Shri Krishna, worshiped as Lord Jagannatha. It is the only shrine in India, where goddess, Subhadra, sister of Lord Krishna is worshipped along with her brothers, Lord Jagannatha and Lord Balabhadra. The main temple here is about 1000 years old and constructed by Raja ChodaGanga Deva and Raja Tritiya Ananga Bhima Deva. Puri is the site of the Govardhana Matha, one of the four cardinal institutions or Mathas established by Adi Shankaracharya. This is the plume for Oriya people to celebrate a special day in this Dham which is also known as Rath Yatra, the Chariot Festival.

d.Rameshwaram: Rameswaram is located in the South Indian state of Tamil Nadu. It is situated in the Gulf of Mannar at the very tip of the Indian peninsula. According to legends, this is the place from where Lord Rama, built a bridge Ram Setu to Lanka. The Ramanatha Swamy Temple dedicated to Lord Shiva occupies a major area of Rameshwaram. The temple is believed to have been consecrated by Shri Rama. Rameshwaram is significant for the Hindus as it is said a pilgrimage to Benaras is incomplete without a pilgrimage to Rameshwaram. The presiding deity here is in the form of a Linga with the name Sri Ramanatha Swamy, it also is one of the twelve Jyotirlingas.

2. Buddhist Pilgrimages

Buddhism is a religion that encompasses a variety of traditions, beliefs and practices largely based on teachings attributed to Siddhartha Gautama, who is commonly known as the Buddha.

These following are the four holiest sites in Buddhism;

- Lumbini, Nepal - The birthplace of the Gautama Buddha
- Bodh Gaya, Bihar - The site of the enlightenment of Gautama Buddha
- Sarnath, outside Varanasi, Uttar Pradesh - The site of the first sermon
- Kusinagar, Uttar Pradesh - the site of the Buddha's par nirvana

Jain Pilgrimages

Jainism as a religion prescribes a path of non-violence towards all living beings. It is one of the oldest religions of the world finding its roots in ancient India.

North India: Hastinapur, Taxila, and Ashtapada

South India: Shravanabelagola, Moodabidri, Humbaj, Anantnath Swami Temple near Kalpetta

Eastern India: Shikharji, Pawapuri, Champa, Pundravardhan

Western India: Palitana, Girnar, Mount Abu, Mahavirji, Shankheshwar, Mahudi

Central India: Vidisha, Kundalpur, Sonagiri

3. Islam Pilgrimage Centres

Islam is the second-most practiced religion in the Republic of India and Muslims believe that God is one and incomparable and the purpose of existence is to love and serve God. Islam came to India with Islamic invasions and Arab trade to the Malabar Coast in the 7th–8th century. Islamic expansion arrived in north India in the 12th century and Islam has since become a part of India's religious and cultural heritage. Over the years, there has been significant integration of Hindu and Muslim cultures across India

Fatehpur Sikri located in district Agra, Uttar Pradesh was founded in 1569 by the Mughal emperor Akbar. Fatehpur Sikri is one of the best preserved collections of Mughal architecture in India

4. Sikh Centres of Pilgrimage

Sikhism was founded during the 15th century in the Punjab region, by Guru Nanak Dev.

Golden Temple: Also called as the Harmandir Sahib or Darbar Sahib, the Golden temple is located in the city of Amritsar, Punjab. The temple was built by the fifth Sikh guru, Guru Arjun Dev, in the 16th Century where the holy scripture of Sikhism, Guru Granth Sahib is being installed. There are four doors to get into the temple, symbolizing the openness of the Sikhs. In the early nineteenth century, Maharaja Ranjit Singh covered the upper floors of the Gurdwara with gold, which gives it its distinctive appearance and English name the Golden Temple.

5. Religious Centres Related To Christianity

Christianity was world's largest religion. The three largest groups of Christianity are the Roman Catholic Church, the Eastern Orthodox Church, and the Protestantism. The Roman Catholic and Eastern Orthodox patriarchates split from one another in the schism of the 11th century, and Protestantism came into existence during the 16th century. Popular and Important Christian Pilgrimage Sites in India are explained below.

Basilica of Born Jesus: The Basilica of Born Jesus is located in Goa and has been declared as a UNESCO World Heritage Site. This basilica holds the mortal remains of St. Francis Xavier. The church is located in Old Goa, which was the capital of Goa during Portuguese

rule. The Jesuit church is India's first minor basilica, and is considered to be one of the best examples of baroque architecture in India.

5.9 Heritage tourism

Heritage tourism occupies a significant proportion of the 'cultural tourism' spectrum, and while it often overlaps with and links to other tourism product, the historic or human dimensions considerably inform and shape all parts of the spectrum. In this sense, heritage provides an 'overarching' component or common thread for many tourism products in a country or localised area.

1.Red Fort of Delhi

The largest of old Delhi's monuments in the Lal-Quila, or Red Fort, the thick red sandstone walls of which bulging with turrets and bastions, have withstood the vagaries of time and nature. The Lal-Quila rises above a wide dry moat in the northeast corner of the original city of Shah Jahanabad. Its walls extend up to 2kms and vary in height from 18mts on the riverside to 33mts on the city side.

2. Hawamahal of Jaipur

It was built in 1799, the Hawamahal, or palace of the winds, is one of the major landmarks of Jaipur. This five-storey building, which looks out over the main street of the old city, is a stunning example of Rajput artistry, with its pink semi octagonal and delicately honeycombed sandstone windows. It was originally built to enable ladies of the royal household, to watch the everyday life and processions of the city without getting noticed by anyone. The palace was built by Maharaja Sawai Pratap Singh

3. Qutubminar of Delhi

Qutubminar is in Delhi and was built by Qutub-Ud-Din-Aibak of Slave Dynasty. It is excellent example of Afghan architecture. The Minar is a 72.5 mts high victory tower. The construction of this tower was started in 1206 A.D and was completed by his successor Illututmish.

4. Taj Mahal

Located in the district of Agra in Uttarpradesh, Taj Mahal is an architectural wonder. An epitome of love and romance Taj Mahal was built by the fifth Mughal emperor, Shah Jahan, in loving memory of his wife, Mumtaz. This is also believed as one of the Seven Wonders of the World.

5.Konark Temples

Approved as a United Nations (UNESCO) World Heritage Site, the temple at 65 km from Bhubaneswar is dedicated to the Sun God and depicts Orissa's medieval architecture.

6.Mahabalipuram

The erstwhile second capital of the Pallava kings of Kanchipuram, this tiny seaside village at 58 kilometers from Chennai is renowned for its sea shore temples and rock-cut architecture.

7.Khajuraho Temples

The master piece of intricate medieval Indian architecture of Nagar style, these group of temples were built during AD 950 and AD 1050 at the time of Chandela kings.

8.Ajanta-Ellora Caves

One of the choicest travel destinations for tourists around the world, these caves, outside the city of Aurangabad, about 400km northeast of Mumbai, represent the evolution of Buddhism, from 200 BC to 650 AD

9.Charminar of Hyderabad

The Charminar is as much the signature of Hyderabad as the Tajmahal is of Agra. Mohammed Quli Qutb Shah, the founder of Hyderabad built Charminar in 1591 at the center of the city. A legend has it that it was built as charm to ward off a deadly epidemic raging at that time. Built with granite and lime-mortar, the Charminar is a fine example of Indo-Islamic architecture.

Natural Heritage of Kerala

10. Alleppey is a place adorned with scenic beauty such as beach, back waters, canals and lagoons, it was considered as the 'Venice of the East' by Lord Curzon. Backwater of Alleppey is quite renowned almost all over the world and is the most distinguished tourist attraction of Kerala. A houseboat cruise in the backwaters always gives an exotic experience to the tourists. The other alluring attractions of this area are Sri Krishna Temple, Edathua Church, Champakulam Valia Palli, Krishnapuram Alappuzha which attract millions of tourists to Kerala in every year both domestic and international

11. Munnar is undoubtedly one of the most beautiful hill stations of India situated at 1600 m above from the sea level. The amazing beauty of Munnar gives the blissful feeling of joy to the tourists. Once it was the summer resort of the British. It is filled with coffee and tea plants. The other attractions are the waterfalls, trekking paths, the Indo Swiss dairy farm project, the palatial buildings and cute cottages add more glamour to this place

12. Wayanad itself shows how marvelously the nature has decorated herself. The word Wayanad is derived from the word Vayal nadu, Vayal means paddy field and nadu means land interpreted as the land of paddy field. Wayanad is full mountains, rocks, dense forests and the residence of many animals. Wayanad is an ideal place for the passionate adventurers. It gives an outstanding experience to the tourists.

Check your progress

I Each answer should not exceed 50 words

- (a) Define Merchandise
- (b) Define domestic tourism
- (c) UNESCO heritage sites

II Each answer should not exceed 250 words

- (a) Discuss the aims of sales promotion
- (b) Describe domestic and International tourism and examine the differences between them

III Each answer should not exceed 500 words

- (a) Explain in detail about the sales support techniques in tourism sector
- (b) Bring out the employment potentials in the tourism sector

5.9 Let us sum up

This lesson begins with merchandising, it is an activity of promoting the sale of goods and services at retail. Tourism merchandising activities may include display techniques, free samples, on the spot demonstration, pricing shelf talkers, special offers, and other point of sale methods. Domestic and international tourism and the difference between them are explained. Employment potentials in various sectors related to tourism industry are discussed in detail. India is a land of religions. India is known for roots of several religions like Hinduism, Sikhism, Buddhism and Jainism. Hence the religious monuments and heritage sites are explained in this lesson.

LESSON 6

TOURISM INFRASTRUCTURE

Learning Objectives

After reading this lesson, you will be able to

- ❖ understand the tourism infrastructure and its significance in the development of tourism industry
- ❖ study about the emergence of hotels and other supplementary accommodations

Structure

6.1 Introduction

6.2 Touristic infrastructure

6.3 Accommodation

6.4 Emerging Dimensions of Accommodation Industry

6.5 Let us sum up

6.6 Answers to check your progress

6.1 Introduction

The term 'tourist Infrastructure' denotes to all those built in services which are essential for modern social life and economic development. It includes all the transport facilities such as, roads, railways, and airports, water supplies and sewerage systems, supplies of energy such as electricity and gas and communication facilities. These are commonly supplied by the public authorities.

6.2 Touristic infrastructure

Tourist infrastructure means the development of the accommodation sector, transport system touristic sports, travel agencies, tour operators, the entertainment industry, arts and

crafts, the souvenir industry and so on. Basically, infrastructure includes all forms of construction on and below ground required by any inhabited area in intensive communication with the outside world and as a basis for extensive human activity within. Economists frequently put stress on the development of the touristic infrastructure as it is the pre-requisite for its accelerating economic growth. And, that is why it is observed that high level of capital investment in building infrastructure is a characteristic of all the developing countries. The existing infrastructure in India does not cope with the need of serving the touristic economy. In this connection, provision of hotels and other supplementary accommodation facilities can be regarded as the key-note to promote tourism in India.

Touristic Infrastructure is an essential feature of the developing economy for its rapid growth and development. Tourism is one of the important factors for eradicating unemployment, earning foreign exchange and it also plays a vital role in the regional development of a nation. In the rural areas where anticipated returns on public and private investment of the development of the touristic activity by itself in reality may turn out to be nil, if the employment is not realistically planned and done in stages. Therefore, one must be cautious in planning the provision of touristic infrastructure in these areas. The economic exploitation of these areas by tourists generally depends on the natural and economic resources of vast regions more difficult to access, frequently involving problems of connecting infrastructural work, the supply of consumers goods and skilled labour, etc.

India faces a lot of problems in building the necessary touristic infrastructure which plays a crucial role in accelerating economic development. The state should exert all-pervading pressures on the entire economy to make good hotels, transport, power, electricity and all other services needed for this purpose. An increase in the power meets the basic requirements of the economy and above all of the industry. As the industry develops, the demand for electric power rises. The development of tourism requires such factors like financial resources and technical personnel for large scale exploitations and evaluation of the tourist areas. This will certainly determine the possibility of modern tourism.

Lack of technical personnel's has also been one of the greatest running of this highly specialised industry. Initially there were institutes at Delhi, Mumbai, Kolkatta and Chennai and now a number of Hotel Institutes and Food Craft Centres have been opened which are training

young men and women to take assignment mainly in the accommodation sector. There is a growing need for personnel in the field of tourism management. Tourism education has largely been neglected but the proper and efficient functioning of tourist industry requires a complete knowledge about the latest techniques developed in the field. In the framework of planning the integrated economic development in the regions, it is of utmost importance to accord priority to the construction of regionally adequate infrastructure along with the measures of land and water resources development of the regions. There is also an urgent need for a detailed research relating to the different aspects of tourist industry, in order to lay a sound base for its future development

INFRASTRUCTURE

The place of tourism in national planning, varies according to the priority accorded to it. Many countries regard it as luxury industry and accord it a low priority in their national plans. The plans of nation are based on the priorities, infrastructure, inputs available and the importance of balanced social economic development. The successful setting up of the tourism industry is dependent basically upon the growth and development of the general economic infrastructure of the nation.

The infrastructure requirements may be divided into the following groups

1. Those which provide lines of access and communication with the outside world.
2. Those which enable the movement of people at the destination
3. Those which supply essential services of lighting heating power, water, drainage and sewage disposal for the development.

Tourist may reach a particular destination by road, rail or water or by air or by a combination of these modes of transportation. To provide the necessary infrastructure may accordingly call for the construction of the roads, railway lines, harbours, airport runways. These all are required to carry the required volume of traffic to and from the tourist areas. There is also a need for telecommunication and other means of communication. The access work has to be extended to provide means of communication and movement within the area. In addition, network of utility services extending over the whole area of development has to provide for the public conveniences and night lighting, etc.

The underground and service installations described above are of paramount importance to successful tourism. Construction of these require considerable period of time.

It is best to build roads of adequate dimensions initially instead of small inadequate road which later have to be torn up and replaced with better and more adequate facilities. Great care should be taken in the construction of roads. They should be hard, all weather surfaced, be properly graded and drained. They should be safe and built to international standard. Service installations such as road side facilities, road side parks, road side picnic facilities, rest park which include toilet facilities, scenic turnouts, auto repair and service facilities are all needed for tourism.

The airport runways should be built to international standard. The runways may be used for the new super-jets and there may not be heavy expenditure on modifications in future. Roadside parks, picnic tables, rest areas, scenic turnouts and similar road side park type facilities should be regularly maintained to keep the park in a neat orderly condition.

Service stations should be provided in sufficient quantity. The attendants at these stations should be courteous, hospitable and friendly. They must have the knowledge of tourist stations in their immediate vicinity and advise tourists concerning accommodation, shopping and entertainment in their community.

1. State and Touristic Infrastructure

The states have started taking part in almost all the spheres which are related to the welfare of the public. Tourism is no exception to this. The state creates services which are indirectly useful to tourism. It encourages and supports the private sector and creates a few pilot schemes. The importance of tourism in the national economy is gaining a place in almost all the countries of the world. It is an expanding industry. Expansion of tourism increases the level of employment by creating new jobs. Construction of new building is one of the part of tourism activities which constitutes a capital investment and provides work for a number of people. This is a market for certain products produced in the country and with the application of multiplier effect and accelerated effect, almost all the sections of the society are benefited.

Thus tourism is a public utility infrastructure. The public authorities have an important role in the creation of necessary infrastructure for tourism. Tourism infrastructure consists of all the units that exist for handling tourist traffic. Tourist demand causes the creation of transport and communication facilities, urbanism, irrigation, etc, resulting in a general economic improvement of benefit to all the inhabitants.

Intervention by public authorities to support and promote national tourism has assumed a completely new appearance over the last few years. State intervention takes the form of setting up bodies for controlling tourism activities by giving financial support to private organisations operating in the sector for setting up advertising agencies abroad, for creating tourism study centers and for the development of research and survey in order to gain a better knowledge of internal and external markets.

Thus, tourism infrastructure is usually understood to include:

1. Supply of network and mains: This includes water, electricity, gas, telecommunications, sewers, garbage, etc.
2. Basic public utilities and services: This is the administration of religious places, health, education, culture, commerce, police, etc.

The infrastructure ensures the operation of facilities essential to modern life like health, communication, supplies, administration safety, etc. To meet the needs of tourist, it is not enough to see that they reach their destination comfortably and quickly and are suitably housed and fed. They make trip for a particular purpose. Such facilities, therefore, be afforded to them. Along with transport and accommodations, there is a whole range of supplementary units for the utilisation of tourist resources. Some events, i.e. international games, exhibitions, conferences, lead to the construction of several permanent structure. After the event is over, the buildings remain and are used for other purposes.

A country wishing to receive tourists must give them the best of reception by making available the necessary public services. Roads are needed for travel. Car park, beaches, health services, security services, port, post and telephone facilities are very much needed. At any place, the tourists may be in the need of all these facilities. These services should be provided in such a way that tourists do not feel any inconvenience and the quality should be of at least of that standard which the tourists enjoy in their own country.

Some of the infrastructure helping tourism may not have been created for purely tourist purpose, but their smooth running will help for the reputation of the country in the field of tourism. Water, gas and electricity services should be provided. There must be postal connections and places must have medical facilities. For example, clinics should be established at winter resorts, children's nurseries and game rooms have to be built. The economic activity of a country benefits from the existence of correct infrastructure. This is particularly in the countries which are at developing stage.

In addition to the above, the state also provides specialised tourist equipment at the resorts, e.g. equipment at ski-resorts, small pleasure ports and air field in the tourist areas.

These installations are beyond the scope of private enterprise as the initial investment is much higher as compared to the returns. The setting up of a museum, restaurants, work of art and safeguarding the countryside can only be financed by public funds.

Thus we find that the state takes number of activities which are a must for tourism development in a country. Some of these activities are social responsibilities and some of them are beyond the scope of private sector. The extent of the state's role in tourism varies according to the conditions and circumstances peculiar to each country. The politico-economic-constitutional system, socioeconomic development, degree of tourism development etc. vary from nation to nation. In general, in almost all the centrally planned economies, the state is the sole initiator, executor and administrator of all tourism programmes.

6.3 Accommodation

The institution of hotel had its beginning in the early fourteenth century. The first hotel in the classical sense, the forerunner of the present day existing complex unit, is said to have been created in Paris, in the year 1312. Other similar hotels were soon established in France, Holland, Italy, Germany and many other countries

1. Emergence of the Hotel

Although the earliest hotels date back to the eighteenth century, their growth on any scale occurred only in the following century when the railways created sufficiently large markets to make large hotels possible. During this period a large number of hotels grew up at important destinations. The hotels were developed along the main railway and highway routes in major towns. Substantial development of the hotels thus awaited the volume and the type of traffic only the railways could bring. With the development of railways systems in many other countries within and outside Europe, the number of hotels also increased. These hotels catered to the increasing volume of traffic. The 1860s also saw the introduction of Thomas Cook's railway and hotel coupons. Starting in 1868 Cook arranged regular circular tours of Switzerland and Northern Italy from England. By the 1890s, 1,200 hotels throughout the world accepted hotel coupons. Thus we find that railways greatly influenced the development of hotels during the early twentieth century.

The demand for accommodation of tourists was thus met by a variety of facilities ranging from inns, taverns, private houses to hotels. The main changes in the demand for tourist accommodation have come about from changes in tourist transportation and in the popularity of different forms of holidays. After the introduction of the motor car and the aircraft, a large number of hotels sprang up at various tourist areas and destinations. The growth of hotels continued until the 1950s. Hotels as a unit of accommodation dominated the scene all over the world.

2. Definition

Hotels may be defined in following ways:

1. Hotels provide accommodation, meals and refreshments for irregular periods of time for those who may reserve their accommodation either in advance or on the premises.
2. In broad terms, hotels provide facilities to meet the needs of the modern traveller.
3. The dictionaries refer hotel in several ways: 'a place which supplies boarding and lodging', 'a place for the entertainment of the traveller', 'large city house of distinction,' and 'a public building.'
4. The common law states that a hotel is "A place where all who conduct themselves properly, and who, being able and ready to pay for their entertainment, are received, if their be accommodation for them, and who without any stipulated engagement as to the duration of their stay or as to the rate of compensation, are, while there, supplied at a reasonable cost with their meals, lodging, and such services and attention as are necessarily incident to the use of the house as a temporary home."
5. A definition of the hotel as a business entity worthy of study was presented by hotel operators during the consideration of the hotel business to authorities of the National Recovery Administration, in Washington in 1933. This definition, as formulated by Stuart McNamara, was:

"Primarily and fundamentally a hotel is an establishment which provides boarding and lodging, not engaged in interstate commerce, competitive with or affecting interstate commerce (or so related thereto that the regulation of the one involved the control of the other), but is a

quasi-domestic institution retaining from its ancient origin certain traditional, and acquiring, in its modern development, certain statutory rights and obligations to the public, where all persons, not disqualified by condition or conduct, prepared to pay for their accommodation, are to be received and furnished with a room or place to sleep or occupy if such accommodation are available, and with such services and attention as are incident to their use of the hotel as a home, and/or with food, at stipulated prices, and with or without contract as to duration of visit, and which conducts, within the confines of its physical locations, this business of supplying personal services of individuals for profit. Incidental to such fundamental and principal business, the hotel may furnish quarters and facilities for the assemblage of people for social, business or entertainment purposes, and may engage in renting portions of its premises for shops and business whose contiguity is deemed appropriate to an hotel”

3. Classification of Accommodation and Hotels

According to the organisation for Economic Cooperation and Development (OECD) there are eleven different types of accommodation plus two ‘other’ categories. The ‘other’ categories refer to other “hotels and similar establishment” and “supplementary means of accommodation.” Following are the main categories of accommodation;

- (i) International Hotels
- (ii) Commercial Hotels
- (iii) Residential Hotels
- (iv) Resort Hotels
- (v) Floating Hotels
- (vi) Capsule Hotels
- (vii) Airport Hotels.

4. International Hotels

International hotels are the modern western-style hotels located in almost all metropolitan and other large cities as well as principal tourist centres. These hotels are luxury hotels and reclassified on the basis of an internationally accepted system of classification. The hotels are

placed in various star categories. There are five such categories ranging from five star to one star, depending upon the facilities and services provided. These hotels provide, in addition to accommodation, all the other facilities which make the stay a very comfortable and interesting experience. These facilities include well-appointed reception and information counter, banquet halls, conference facilities, etc. There are also a number of shops, travel agency, money changing and safe deposit facilities. Restaurant facilities, bars and banqueting are an integral part of the business of a hotel. The various services provided in these hotels include international and local cuisine, food and beverage service and specialty restaurant service. These hotels also provide entertainment for the guests in the form of various dance and music programmes, sport and games.

A number of these hotels belong to the luxury category. These are some international chains which own a large number of such luxury hotels. Hotels belonging to international chains are mostly owned by public companies and controlled by a Board of Directors. These hotels have various departments which are managed by persons qualified and experienced in the field of hotels. The chief of the hotel designated as General Manager is responsible for the overall management and operation of the hotel through his departmental heads. International hotels are suitable for metropolitan cities and for other large business and commercial towns and principal tourist centres. The potential of these hotels is therefore limited to these areas. A number of this type of hotels have conference/convention facilities and are suitable for holding meetings, conventions and conferences.

5. Resort Hotels

Resort hotels cater to the needs of the holiday-maker, the tourist and those, who by reasons of health, desire a change of atmosphere. Resort hotels are located near the sea, mountain and other areas abounding in natural beauty. Rest, relaxation and entertainment are the key factors around which resorts are built. The primary motive of a person visiting them is rest and relaxation which he is looking for, away from his routine, busy work life. The resort hotels, in order to provide special services to the visitors, are built to give a visitor special welcome and an atmosphere of informality. The type of services and amenities located in resort property include recreation facilities such as swimming pool, golf course, tennis courts,

skiing, boating, surf-riding and various indoor sports. Other important amenities include coffee shops, restaurants, conference rooms, lounge, shopping arcade and entertainment. Emphasis in resort hotels, however, is on recreational facilities. The clientele of resort hotels is mostly persons with considerable income looking for relaxation and recreation. Resort hotels rarely attract commercial patronage.

Resorts can be of various types and can be classified on the basis of climate and topography. Broadly they fall in the following categories: (1) Summer resorts, (ii) Winter resorts, (iii) Hill resorts, (iv) All season resorts, and (v) Health resorts.

All majority of the resort hotels are seasonal establishments which work to capacity during the high tourist season. Generally the high tourist season is the period when there are holidays at educational institutions. However, in recent years many of the resort hotels, with a view to extend the season, provide certain special facilities and various other concessions to the guests. The concessions provided include reduced tariffs, free entertainment, sightseeing, gifts, etc

6. Commercial Hotels

The commercial hotels direct their appeal primarily to the individual traveller as compared to international or resort hotel where the focus is on group, travel. Most of the commercial hotels receive guests who are on business although some have permanent guests. As the hotel caters primarily to people who are visiting a place for commerce or business, these are located in important commercial and industrial centres of large towns and cities. These hotels are generally run by the owners and their success depends on their efficient running and the comfort and facilities they provide. In some of the large industrial towns, fully licensed commercial hotels exist complete with restaurants, grill room, functional accommodation and a garage for those travelling by automobile.

7. Residential Hotels

These hotels can be described as apartment houses complete with hotel services. These are often referred to as apartment hotels. The tariff of rooms in these hotels is charged on monthly, half yearly or yearly basis and is charged for either furnished or unfurnished accommodation. These hotels, which are located mostly in big cities, operate exclusively under

the European plan where no meals are provided to the guests. These hotels were developed in the United States of America where people discovered that permanent living in hotels offers many advantages. Services and amenities provided in these hotels are comparable to those of an average well-regulated home. These are very popular in the United States and western Europe where these are also popularly known as Pension.

8. Floating Hotels

As the name suggests, these hotels are located on the surface of the water. It may be on the sea or on a lake. All the facilities and services of a hotel are provided here and these are very popular in many countries. In some countries old luxury ships have been converted into floating hotels and are very popular among tourists. The atmosphere they provide is exclusive and exotic. In India, floating hotel in the form of houseboats are very popular with tourists.

9. Capsule Hotels

Capsule hotel is the newest innovation in the budget hotel market. The first of its kind was opened in Osaka in Japan in the year 1979, as a spin-off of the 1970s fashion in Japanese architecture for capsules. These have now sprung up in increasing number in big cities of Japan.

The capsule is a box made of glass-reinforced plastic or cement, open either at one side or one end, in which are concentrated some of the functions of a traditional hotel room - bed, a clock, radio, TV, flexible lighting, a box for valuables and miniature table for writing. Rooms in a capsule hotel generally are lined up in double-decker fashion along a central aisle as in a sleeping compartment of a train. Toilets and washrooms, vending machine room, and lounge are close by on each floor, of the hotel. The functions of each capsule are controlled and monitored by a central computer system and the security is controlled by close circuit TV cameras. The hotels cater mainly to business travellers. The low tariff and vintage locations are the major factors for their popularity. The hotels are well located near transportation centers in Japan's largest cities.

10. Airport Hotels

Airport hotels, as the name suggests, are located near the airports primarily to cater to the needs of transit passengers, airport crew as also passengers of delayed or cancelled flights. The various facilities provided in these hotels are designed to offer comfort and convenience to the air travellers. The various services may include parking and shuttle service to and from the airport terminal. The hotels may also provide services for business travellers for organising meetings, conferences and conventions etc.

11. Space Hotels

Space tourism is probably just another decade or so away. A brand new phenomenon in the hotel stay to be available in space travel would be called 'Skotel'. It would perhaps be the world's first airborne hotel. In the initial stages, space travel may start off as suborbital flights which would mean taking off in a shuttle and staying put in space for a few days. It may limit to flying off from an airport orbiting the earth once and then landing back on it. According to the International Institute of Tourism Studies, space tourism is broadly applied to the concept of paying customers travelling beyond earth's atmosphere. It can include parabolic flight, vertical suborbital flights, orbital flights lasting up to three days or week-long stays a floating space hotel, including participatory educational, research and entertainment experiences as well as space sports competitions.

6.4 Emerging Dimensions of Accommodation Industry

Although hotels have been and still are the principle form of accommodation, there has been a growth and development of some other forms in various parts of the world. These can be classified on the basis of its location, type of construction, type of management, etc. and are commonly known as supplementary accommodation. These may be described as the premises which offer accommodation, but not the services, of a hotel, services provided here are minimal and not comprehensive as in the case of hotel establishments.

All establishments in this type of accommodation are designed to offer the possibility of stay overnight and meals in return for cash payment per day and on the basis of services provided. The standard of comforts is modest compared to that of a hotel. It plays a very

important role in the total available tourist accommodation in a country and can cater to both international as well as domestic tourist traffic. The following are some of the principal forms of supplementary accommodation:

- (a) Motel
- (b) Youth Hostel
- (c) Camping Sites
- (d) Pension
- (e) Bed and Breakfast Establishments and
- (f) Tourist Holiday Villages.
- (h) Resort Properties and Timeshare Establishments

1. Motel

The concept of motel and motel-hotel originated in the United States of America. Motel was meant for local motorists and foreign tourists travelling by road. Primarily designed to serve the needs of motorists, motels almost exclusively meet the demand for transit accommodation. They serve the function of transit hotel except that they are geared to accommodate motor travelling guests for overnight stay. The important services provided by motels include parking, garage facilities, accommodation, restaurant facilities, public catering and recreational facilities. Hence all motels are equipped with filling stations, repair services, accessories, garages, parking space, elevator service to the automobile, restaurants, etc. There are also equipment and tools available which the guest can use himself if he wishes to repair his vehicle. The price charged for accommodation and meals/ refreshment is much cheaper as compared to that in hotels.

Motels are mostly located outside the city limits in the countryside along the main highway and preferably at an important road junction. Since these establishments cater mainly for persons travelling by road, their development is linked with the development of new motorways along which these are necessarily located. Motels are of different types. Some provide just the minimum services while others are well-furnished, with comfortable accommodation and excellent facilities.

The accommodation provided is of a chalet type, which is furnished, having a dining hall and fixed menu. Shopping facilities for travelling public are also provided.

In many countries, especially the United States of America, motel accommodation is ranked 'with hotel accommodation and subject to general standards applicable to the hotel industry. In countries like Norway, France Ireland, Turkey, etc., specific legislation has been introduced for motels. This includes requirements for the approval of plans, easy access of cars, minimum capacity, provision of restaurant where necessary, minimum standards for facilities and provision of petrol pump or service station where they exist and model classification standards similar to those for hotels. For instance, in France, there are three categories designated by stars, the classification being based on location, sanitary fittings and collective amenities. An increasingly important segment of the accommodation industry, motels are looked upon as a distinct assets, as these have enabled the industry to meet the changes in travel patterns and personal preferences of the modern day traveller.

2 Youth Hostels

Youth hostels made their first appearance in Germany in the form of a movement in about the year 1900. The movement which spread rapidly all over the world was based on the need of city youth to travel throughout the country. In order to provide some sort of accommodation and services the dormitories in the inns were equipped with cots, mattresses, sheets and blankets. Large rooms in inns were used as dining and living places providing full board at low cost to the guests. There was also provision of additional kitchen where travellers could prepare their own meals. Since the movement was started with a view to encouraging youth to travel in order to learn and know more about the country and also to socialise, it had an educational value. As such, no service was provided in the inn. The persons staying in the inn were themselves required to look after the inn, Subsequently, exclusive youth hostel building were constructed to accommodate young travellers.

The International Youth Hostel Federation has laid down certain minimum requirements for accommodation in the youth hostels. These include:

- (i) Separate dormitories for men and women with separate entrances;
- (ii) Separate toilets and washrooms for men and women with separate entrances;
- (iii) A members' kitchen where hostellers can prepare their own meals;
- (iv) A common room, separate from member's kitchen, wherever possible;
- (v) Living accommodation for warden (s), on the premises wherever possible.)

3 Caravan and Camping Sites

Caravan and camping sites constitute a significant accommodation category in many holiday areas. These are very popular in some European countries as in the United States of America. These are also known as open-air hostels, tourist camps or camping grounds. Camping, originally practiced by hikers on foot, is increasingly giving way to car camping. The sites are usually located within the large cities in open spaced. Equipped to receive mobile accommodation in the form of caravans, the camping sites provide facilities for parking, tent pitching, water, electricity, toilet, etc. Though the services provided generally include restaurants, recreational rooms, toilets and at certain places a grocer's shop, the type of service often vary from place to place. Some countries have enacted legislation establishing the minimum facilities that must be provided and these include health and sanitation standards, prices to be charged for parking and use of various services and facilities.

4. Pension

This type of accommodation is very popular in certain European countries. Particularly in Italy, Austria, Germany and Switzerland these establishments are used extensively by the tourists. Pension is also described as a private hotel, a guest house or a boarding house. Catering facilities are optional and are usually restricted to the residents. Many of them stay for longer and definite periods such as week or a fortnight. The reservation of accommodation is made in advance. Mostly managed by a family, a pension is much cheaper than a hotel.

5. Bed and Breakfast Establishments

Also known in some countries as apartment hotels and hotel garnis, they represent a growing form of accommodation units catering for holiday as well as business travellers. These

establishments provide only accommodation and breakfast but not the principal meals. These are usually located in large towns and cities, along commercial and holiday routes and also resort areas and are used by an route travellers. Some of these are very popular with holidaymakers.

6. Tourist Holiday Villages

Tourist villages were established in some European countries after World War II. These are situated at warm seaside and in the regions which offer certain facilities for tourists. In Italy and Spain, tourist villages are located in the regions not economically developed, thereby helping the region economically. The villages are mostly promoted by important clubs, social and tourist organisations.

The village complex is a centre of accommodation providing extensive sports and recreation facilities, riding, swimming, tennis, volleyball, football, sauna, mini-golf, badminton, table tennis and yoga. These provide both board and lodging. The atmosphere in these villages is kept as informal as possible. Telephones, radios, newspapers and TV are banned unless there is an emergency. Wallets and other valuables are locked away at the beginning of one's stay. The staff are chiefly educated young people who live on an equal basis with the holiday-makers. The accommodation provided is usually in multiple units and many provide for self-catering. The furnishing provided in the rooms is minimal. The easy mixing of guests is encouraged by the banning of advance booking of tables in the village restaurants. One rarely finds oneself sitting with the same group twice.

The holiday villages are usually based on family units, each providing a convertible living room, bath/shower and sometimes a kitchen. The villages are self-sufficient, providing almost all necessities required by the residents. There is also a small shopping complex where one can buy articles of daily need. The services of a doctor are available. The accommodation is sold for a week or a fortnight at an all-inclusive price. In Spain and Italy, these are classified into three categories according to the services and amenities provided.

7. Resort Properties and Timeshare Establishments

Through timeshare and condominium concepts a tourist has a unique range of options for resort holiday and lodging. In the case of condominiums, a tourist owns a room or a suite

within a condominium or hotel complex and uses the same as required by him or it can be rented to other tourists. The owned condominiums usually are within the complex of rooms or suites that are rented as regular hotel or resort rooms. It is difficult to tell the difference between an owned and a rented room.

Timeshare on the other hand is a modification of condominium ownership. The units are owned partially. The timeshare owner may own one-fifth of a unit thereby sharing the unit's use and costs. In some cases the owner may only purchase a certain set of weeks to use the unit. In other cases, a group of investors may jointly own a property through actual deeds. The timeshare title implies that the unit is shared with others throughout the year.

Timeshare offers flexibility of use and a variety of experience through exchange options as also peripheral benefits offered through an exchange company.

Check your progress

I Each answer should not exceed 50 words

- (a) Define Tourist infrastructure.
- (b) Define Hotels.
- (c) What is a Pension?

II Each answer should not exceed 250 words

- (a) Briefly write about motels
- (b) Briefly describe about the Youth hostels

III Each answer should not exceed 500 words

- (a) Explain the importance of Touristic infrastructure in the growth of Tourism
- (b) Explain the Various accommodation facilities available for the tourist

6.5 Let us sum up

In this lesson we have dealt with Touristic infrastructure, which means the development of the accommodation sector, transport system, touristic sports, travel agencies, tour operators,

the entertainment industry, arts and crafts, the souvenir industry and so on. Basically, infrastructure includes all forms of construction on and below ground required by any inhabited area in intensive communication with the outside world and as a basis for extensive human activity within. Economists frequently put stress on the development of the touristic infrastructure as it is the pre-requisite for its accelerating economic growth. We have also studied about hotels and supplementary accommodations,(ie) Hotels provide accommodation, meals and refreshments for irregular periods of time for those who may reserve their accommodation either in advance or on the premises Although hotels have been and still are the principle form of accommodation, there has been a growth and development of some other forms in various parts at the world. These can be classified on the basis of its location, type of construction, type of management, etc. and are commonly known as supplementary accommodation.

LESSON 7

TRANSPORT

7.1 Learning Objectives

After reading this lesson, you will be able to

- ❖ understand the types of transportation and its role in the tourism industry
- ❖ learn about the growth and latest development in the transportation industry

Structure

7.1 Introduction

7.2 Transport and Tourism

7.3 Rail Transportation and Tourism

7.4 Water Transportation and Tourism

7.5 Road Transportation and Tourism

7.6. Let us sum up

7.7. Answers to check your progress

7.1 Introduction

Transport has an important role to play in the development of an economy and tourism as a part of economy is not an exception. Transports help to deliver raw material that are required to produced goods and services by different industry at right time and also to distribute those finished goods and services to the right customer at the right time at right place which if not provided will lead to the heavy wastage and financial loss, and hence hinder in the growth and development of industries and trade in an economy. As tourism refers to some kind of travel, this necessitates the importance of transport in tourism. Transport also helps in the production and distribution of goods and services that are being catered to meet the need of tourists, and more importantly, it helps tourists (consumer of tourism industry) to reach the destination.

7.2 Transport and Tourism

According to UNWTO survey reports, more than half of the travellers arrived at their destination by air (52%) in 2012, while the remaining travelled by surface transport (48%) – either by road (40%), or rail (2%) or over water (6%). Over the time, the trend has changed and now the tourists are travelling by air transport more often as compared to the surface transport, and hence increasing the share of air transport.

Transportation services used by the tourist are categorized into four basic types. They are as follows:

- Air transportation
- Water transportation
- Rail transportation
- Road transportation

7.2.1 Air Transportation Services and Tourism

Air transport has an important contribution in the growth and development of tourism. It is certainly be a key factor in the growth of long haul and international travel. Air transport is being recognized as the mostly utilized transportation mode used by the tourist. According to UNWTO, it accounts to nearly 51% in 2011 means over half of travellers used air transportation to arrive at their destination.

7.2.2 Growth and Development of Air Transportation in the World

The history of air travel can be said to have its origin in 1783 with the use of balloon as aircraft to carry human by the French. However, appearance of air transport in more structured form came with the invention of first air plane led by internal combustion engine in December 1903 by Wright Brothers, near Kitty Hawk, North Carolina. Although commercial air travel took place before the World War, but air transport for the mass people has essentially a post war phenomena.

The first commercial air services took place in the year 1920 by KLM Dutch airline between Amsterdam and London. It inaugurated another services to the Far East destination, like Jakarta

in 1929, and within a next few years it started to operate to the most major west European destinations. Later Swiss Air started to operate Douglas DC2 engine carrying as many as 16 passengers between Zurich and London.

Air transportation may be divided in terms of its forms of operation namely, scheduled air transportation services, and Charter air transportation services.

1. Scheduled air transportation services: As the term implies it refers to the air services that are being operated based on the agreed and pre-defined schedule. In other words, these are the services in which everything about its operation is pre-defined like when does it operate? Where does it originate and destined? Scheduled air services may have two types of operations: international and domestic. **2. Charter air services:** The basic reason in the evolution of charter services was to offer passengers comparatively a cheaper air transportation option than the normal scheduled service. It refers to those air services that are not being operated maintaining an agreed and pre-defined schedule. Another distinguishing feature of charter flight is that a passenger or even a group can hire the whole aircraft for their travel which in normal cases of schedule airlines not being done.

7.2.3 Warsaw convention

Another important convention in the field of air transportation is Warsaw Convention that was being held at Warsaw Poland on 12 October 1929. However, it was being rectified and modified in Hague, Netherlands on 28 September 1955. The most distinguishing feature of this International convention is its vision and objectives because the objectives and policies that were being outlined by Chicago Convention and Bermuda Agreement highlighted on the rights of the participation nation and carriers while Warsaw convention look after the right of the passengers flying by air. The objective of this convention was to define the legal responsibility and obligation of an airline or air transport operator towards its passengers. In other word this convention outlines the liability of an airline to its passengers in case of death or injury of the passenger or partial or full damage or loss of passenger's belongings or baggage. The convention has also set a limit on how much an airline is liable to pay in case of personal injury or death or delay, damage or loss of baggage. The norms that were being enacted at Warsaw Convention are applicable on those journey that involves an ultimate destination or a stop in

country other than in which the journey originates and even be applicable in case of partial segment of the journey that may occur within a single nation.

1. Liability in case of personal injury or death: The convention states that the airlines liability to its passenger would not exceed US \$75000 per passenger for those passengers whose journey involve an agreed origin, stop or transit in United States of America. While this amount to be decreased to US \$10,000 or US \$20,000 for passenger whose journey does not involve an agreed origin, stop and transit in the United States of America.

2. Liability in case of delay, damage or loss of baggage: The airlines are liable to its passenger in case of loss or damage of checked baggage up to US \$20/kg while in case of unchecked baggage this amount may be US \$400 per passenger for most international travel. However, the limit for journey which takes place wholly within United States may be US \$1250 per passenger.

7.2.4 Airport Authority of India (AAI)

Airport Authority of India was formed after the merger of National Airports Authority of India and International Airport Authority of India on 1 April 1995. It is responsible for the provision of safe and efficient air traffic services and aeronautical communication services for the effective control of air traffic in the air space in India. It also manages 11 international airports, 89 domestic airports and 26 civil aviation enclaves at defense airfields. Besides, it manages the Indian air space that is beyond the territorial limits of the nation. It does according to the norms stipulated by International Civil Aviation Organization.

7.3 Rail Transportation and Tourism

The History of rail transport dates back to nearly 200 years. Rail transport, which made use of the steam locomotive, was the first form of mechanized land transport, and it remained the primary form of mechanized land transport even after 100 years.

The introduction of railways in nineteenth century is regarded as an important landmark in the history of travel. Modern rail transport systems first appeared in England in the 1820s. The newly created railway track between Liverpool and Manchester in England featured special

provisions for carrying passengers in addition to freight. However, the introduction of organized rail travel was made by Thomas Cook in 1841. In the early 1870's, first class railway travel was introduced by an American known as G.M. Pullman.

However, today almost every country has installed railways as an important means either for its contribution on trade and commerce or as a means of public transport to serve the people. In terms of rail network, United States of America occupies the first place in the world, while Russia is on second. India reserves the fourth place with a vast network of nearly 66,000 km.

1. Some Notable Rail Transportations Network in the World

Eurail

Eurail is a portmanteau of the two connotation European and Rail. Eurail is a Group and a joint endeavour of some European railway service operators and few shipping companies that sales passes and tickets for European rail carriers and associated shipping companies to facilitate easy and convenient travel for the resident of European nations while travelling to their bordering countries.

Britail

British Railway or popularly called Britrail is the operator of most of the rail transport services in United Kingdom. It came into existence after the nationalization of big four British Railway Company and lasted until the gradual privatization of Britrail in stages between 1994 and 1997. Britrail offers number of passes and point to point ticket which can only be purchased from outside the nation. Those passes offer great value, convenience and flexibility to explore the fascinating destination in England, Scotland and Wales.

2. Rail Transportation in India

The possibility of connecting India by railway was conceived in 1943 under the British rule. The construction work of rail transportation in India was initiated by the then Viceroy of India, Lord Dalhousie in 1850. The responsibility to construct railway was given to East Indian Railway Company and The Great Peninsular Railway company which were established in

England. However, the transportation system by rail was started on 16 April 1853. The first recorded rail travel in India was made between Boribunder near Mumbai to Thane, connecting Byculla and Sion station, covering a distance of nearly 33.2 km. The first train of the eastern region was started to operate between Howrah and Hooghly in 1854 and in south India connecting Royapuram and Walajabad of Arkot, in 1856. Kolkata was linked to Delhi and Mumbai in 1866 and Mumbai linked with Chennai and Cochin in 1872. Darjeeling Himalayan Railway was started to operate as the first hill passenger railway system in 1881. In 1891 toilet facilities were introduced in first class rail compartment and in 1902 electric lights were introduced. The first train services operated by electric engine was started in 1925 by the Great Peninsular Railway at Mumbai. In 1936 the first air conditioning facilities were provided in passenger coaches. The first ever full AC train was launched between Howrah and Delhi in 1956 and to offer safety and security to rail passenger Railway Protection Force were appointed in 1957. The fastest ever train services were introduced with inauguration of Rajdhani Express in between Howrah and Delhi in 1969. The National Rail Museum for preservation and promotion of heritage tourism, education and entertainment was opened to the public in 1977. The first Metro Rail service was introduced in Kolkata in 1984. In 1985 Indian Railway introduced computerized reservation system. The first Shatabdi Express was introduced between New Delhi and Jhansi in 1988. In 1998 'Fairy Queen' the oldest working locomotive honoured with Guinness certificate. Konkan Railway was opened to serve the western coast in between Roha near Mumbai and Thokur near Mangalore. To better serve the tourist using railway services, Indian Railway formed another subsidiary organization called Indian Railway Catering and Tourism Corporation (IRCTC) in 1999. In the same year, UNESCO declared the Hill Passenger Railway services as the world heritage sites. In 2002, another train services introduced in the name of Jan Shatabdi.

To lure the growing number of international and domestic traveller, Indian Railways has introduced a number of products and services. Primary among them are the super luxury train services like Palace on Wheels, Maharaja Express, Royal Orient, Deccan Odyssey and Golden Chariot, Rail Pass, different organized tour programmes to explore India and many more.

3. Super luxury train services

a. Palace-on-wheels: Palace on Wheels is treated among the ten most luxurious train journey in the world. The train originates from New Delhi and covers nearly 14 tourist spots of

Rajasthan and Uttar Pradesh. The destinations covered by Palace on wheels are Jodhpur, Jaisalmer, Bikaner, Udaipur, Sawai Madhopur, Chittorgarh, Bharathpur and Agra. The train has 14 fully air conditioning coaches equipped with world class amenities that enhances the pleasure of travelling. Those coaches are made up of 104 passenger berths in double bedded cabin. Each coach is equipped with latest musical and entertainment aids, a small library with good collection of books, uninterrupted hot and cold water supply, a shower and attached toilet facilities. The train also has a well-stocked bar supplying beverages of Indian and international brands. The coaches are designed keeping in view the traditional way of life of the Royal Rajputs of the past. It offers two lavish restaurants called Maharaja and Maharani that serve a mixed blender of continental, Indian and Rajasthani cuisine.

The tour itinerary that is being offered by Palace on Wheels is as follows: New Delhi – Jaipur - Jaisalmer - Jodhpur - Sawai Madhopur - New Delhi - Agra - Bharatpur - Udaipur - Chittorgarh

b. Royal orient: This train is run by a joint venture programme of Indian Railway and Gujarat Tourism Development Corporation. The train offers an ambience like a five star category of hotel. It is equipped with all the latest amenities and facilities, like watering hole bar with availability of the favourite drinks, uninterrupted supply of running hot and cold water, clean and comfortable cabin and spacious bath. The train also has a multi-cuisine restaurant and a library.

The tour itinerary that is being offered by Royal Orient is as follows: Delhi Cant – Chittorgarh – Udaipur - Mehsana - Ahmedabad - Udaipur - Sukhrej - Palitana - Ahmedpur - Mandvi Sasangir - Jaipur - Delhi Cant.

c. Deccan Odyssey: It is a joint venture programme of Maharashtra Tourism Development Corporation and Indian Railways. The itinerary offered by this super luxury train includes the World Heritage Sites of Ajanta and Ellora, breath taking pristine beauty and lush green fields of the Konkan railway route and the alluring beauty of Goa. The train offers 21 fully equipped cabin each with channel music, intercom, wall-to-wall carpeting, health spa, bar and conference facilities.

The tour itinerary that is being offered by Deccan Odyssey is as follows: Mumbai - Ratnagiri - Sindhudurg - Goa – Pune

Mumbai - Nasik - Aurangabad

d. The fairy queen: Fairy queen is one of the oldest operating rail engine in the world which was being built by erstwhile East Indian Railway in 1855. It has been accorded its place in the Guinness Book of World Record. It has 60 seated specially designed air conditioned chair car. It offers the facility to hire it for a charter travel. It offers 2 nights and 3 days package.

The tour itinerary that is being offered by Fairy Queen is as follows:

New Delhi – Alwar - New Delhi

e. Maharaja express: It is the most expensive luxurious train journey in India. This is being operated under a cooperative endeavour of Cox and Kings India Ltd. and Indian Railway. This luxurious train journey started its operation from March 2010. The train is equipped with two ornate restaurants, an observation lounge cum shop. The train has 43 cabins and suites with each cabin spread over 110 sq.ft. and is designed with decorative arched ceiling. The all-inclusive one night stay for one person at Maharaja Express costs around US \$800 to US \$2500. It offers different types of packages, like heritage of India, Treasures of India, Gems of India, Indian Panorama and the Indian Splendour. Destination covered by this train includes: Mumbai, Ajanta, Balasinor Udaipur, Jodhpur, Bikaner, Jaipur, Ranthambore, Gwalior, Orchha, Khajuraho, Varanasi, Lucknow, Agra and Delhi.

f. The golden chariot: It is another special train that is being run by the initiative of the Karnataka Government and Indian Railway to connects and explore the beauty of Karnataka. It also operates its services in the different destinations of Goa. The destination covered by Golden Chariot include: Bangalore - Mysore Kabini - Belur - Hampi - Badami - Goa

g. The Mahaparinirvaan express: Indian Railway Catering : and Tourism Corporation, a subsidiary of Indian Railway has introduced this train with the aim of catering to the need of Buddhist tourist from both India and foreign nations. It has 18 First Class AC, 92 Two Tier AC and 256 of Three Tier AC berths. It connects all major Buddhist tourist sites located in India and also one site of Nepal through a seven days trip and runs on ones or thrice in a month only.

h. Mountaineering railway: The vast stretch of Indian Railway has spread over the coastal part of the country in the south to the Himalayan foothills in the north. These of which last since the British Rule. The unique feature of Indian Railway that stretches over the mountain area have been awarded as the World Heritage Sites by UNESCO on 1999. The following railway systems consist of:

- **Darjeeling Himalayan railways:** The train runs from a city called Siliguri in Jalpaiguri district to the heart of the Darjeeling city both in West Bengal covering distance of around 83 km. Darjeeling Himalayan Railway is the first and is one of the most outstanding examples of hill passenger rail service. It was started to functioning in 1881.
- **Kalka Shimla railways:** The Kalka Shimla Rail system is a mixed blender of technical and material efforts run over 96 km long single track working rail link. It was built in the mid 19th century. The main objective for setting up of this railway system was to provide a connection to the highland town of Shimla. **Nilgiri mountain railways:** The uniqueness of this railway system lies on that it is believed to be one of the steepest in whole Asian continent. It is located in the south and connects Mettupalayam with Udhagamandalam (Ooty) both of which are in Tamil Nadu. This rail system run over a distance of nearly 46 km on 1000 millimetre gauge rail track. It was started to functioning on 1899, however it was connecting only Connor and later on in 1903, it connects Ooty with it.
- **Indarail pass:** The concept of Indarail pass or Indian Railway Pass has its originated from the European nation. As like as Europe's Eurail Pass and United Kingdome's Britrail Pass Indian Rail has also introduced it to lure the foreigners towards India and explore India's vibrant culture, history, art, architecture, etc. through the eyes of Indian Railway. The pass are available in its different form ranging from half day to even for three months also. The pass can only be purchased by foreigner and Non Residential Indian (NRIs) after the payment of convertible currency like United States Dollar, Great Britain Pound Starling, and Japanese Yen, etc. The pass offers the traveller to travel within the entire Indian Railway system without paying any additional charges.

The travellers who wish to obtain this facility can avail it from the Air India's overseas outlet or from General Sales Agent affiliated abroad in countries, like Oman, Malaysia, United

Kingdom, United Arab Emirates, Nepal, Sri Lanka, Bahrain, Germany etc. Indian pass are also available for sale at selected points in India mostly at the important railway stations tourist bureau.

7.4 Water Transportation and Tourism

Water accounts to nearly 71% of the earth's total surface area and this presupposes the unmatched potentiality of water as an effective mode of transportation. It has been revealed that around 90% of the world trade is transported through water by ship and a significant amount of ship also carry human along with goods.

A cruise ship or cruise liner is a passenger ship that is used for pleasure travel, where the travelling by sea to different destinations all along the way itself and the ship's amenities are part of the experience. Cruises are mainly concentrated towards short sea journeys of about a week. Cruising has become a significant tourist industry; big cruisers are like floating resorts where guests can enjoy luxury and entertainment while moving towards their multiple destinations. The cruise of the Augusta Victoria in the Mediterranean and the Near East in 1891, with 241 passengers including Albert Ballin, is often stated to have been the first ever cruise.

The global cruise industry carried about 19.1 million passengers in 2011, and 18.3 million tourists in 2010, up from 7.2 million in 2000. The global growth rate of the cruise industry has been enduring and stable, at around 7% per year in spite of economic cycles of growth and recession.

The cruising industry is highly concentrated. The major player in the global cruising industry are: Carnival Cruise Line which accounts 49.2%, Royal Caribbean Line accounts 23.8%, Norwegian Cruise Line about 7.1%, MSC Cruises to 5.8%, Disney 2.9%, Star Cruises 1.8% others 9.4.

The Caribbean and the Mediterranean are major markets accounting for more than 70% of the global capacity of the cruising industry. The North American region remains the dominant nearly 40–50% of the global cruising disembarkation during summer.

1. Water Transport in India

India has a vast geographical area covered by Bay of Bengal in the East, Indian Ocean in the South and Arabian Sea in the West while a number of water bodies within the mainland. These include river canals, backwaters, etc. Indian water transportation network may be classified into three categories. They are:

1. Inland Waterways
2. Coastal Shipping
3. Ocean Going Traffic (Cruise)

Inland waterways

India is a river irrigated nation and a number of well-known rivers have stretched throughout the nation besides the less known,

primarily among them are the Ganges, the Brahmaputra and the Indus. Beside rivers, a number of lakes, backwaters that are used for transportation of goods and people. People from very early ages are using water bodies with their handmade or later with machine run vessel to move from one place to another for business and even for holiday reason. It has inherent advantages, if applied in use because it is the cheapest mode of transport, use of energy consumption required less and after all it does not require much amount to invest in to start operation etc. Presently, there are nearly 14,500 km of navigable waterways that are used for transportation however only around 5200 km of river and 485 km of canals are served by motorised vessels. These waterways mostly include river, lakes, backwaters etc. However, the organized use of water transportation is not properly distributed throughout the nation in the equal way. These are centred around the Ganga-BhagirathiHooghly Rivers, the Brahmaputra, the Barak River, rivers in Goa, the backwaters in Kerala, few inland waters in Mumbai and the deltaic regions of the Godavari-Krishna Rivers and on few less known river and canals. The share of inland waterways in the country's total transportation is only about 1%. To give thrust on the development and promotion of inland waterways Indian government upgraded few waterways into the status of national importance and defined those as National Waterways (NW). Presently, there are five national waterways in India. They are as follows:

- National waterway 1: This is the longest national waterways which stretch over 1620 km starting from Allahabad in UP to Haldia in West Bengal established in 1986. It connects three river system, namely the Ganges, the Bhagirathi and the Hooghly.
- National waterway 2: This is located on Brahmaputra river connecting Sadiya and Dhubri with a total distance of 891 km set up in 1988.
- National waterway 3: It connects Kottapuram and Kollam of the West Coast Canal, Champakara Canal and Udyogmandal covering a distance of 205 km continuing since 1993.
- National waterway 4: This is the second longest national waterways in India established in 2008 with a length of 1095 km connecting Kakinada-Pondicherry and run over Krishna-Godavari river system.
- National waterway 5: It connects Talcher to Dhamra stretch of the Brahmani river, the Geonkhali to Charbatia stretch of the East Coast Canal, the Charbatia to Dhamra stretch of Matai river and the Mangalgadi to Paradip stretch of the Mahanadi river delta covering a distance of 623 km.

To make the effective use and proper regulatory control of navigable waterways and to enhance the growth and development of it, Government of India has set up an Inland Waterways Authority of India (IWAI) on 27 October 1986 as a statutory body that will deal with regulatory measures in the field of waterways in India. Besides, as a regulatory mechanism, it is also responsible for the development of infrastructure and facilities that require for the development of waterways in the country, inspection and supervision of the different waterways developmental project that are in hand, etc. It is run by its head office situated at Noida, Uttar Pradesh, along with four regional offices located at Patna, Kolkata, Guwahati and Kochi and five sub-regional offices located at Allahabad, Varanasi, Bhagalpur, Farrakka and Kollam.

2. Cruise tourism scenario in India

India is becoming an emerging destination for luxuries cruise travel. India's growing performance in the global economic map and India's good image among the outside tourism

world, a number of finest and pristine beaches and islands and ports have lured both cruise operator and tourists towards India. Besides beaches and islands, India's inland waterways have also shown its potential as luxurious cruising option by means of river cruising, backwater cruising, etc.

7.5 Road Transportation and Tourism

The road transport plays a significant role in tourism as it provides sufficient flexibility in terms of tourist own pattern of use, affordability in terms of cost in comparison to air travel, availability of transportation vehicles and frequency, accessibility in terms of getting accessed to remote location directly.

Tourist transport in terms of road usage are divided into two segments (Figure 4.10), car rental transportation and coaches. Car rental services have different façade and varies from operator to operator in terms of vehicle size, comfort, facilities, etc. However, these are mostly defined into self and chauffeur driven basis, while buses also varies in terms of service and comfort characteristics.

7.5.1 Scenario of Road Transport Used by Tourist

Road transports, like buses, cars, etc. play a major role in short distance movement and mostly from where tourist accommodated to the different sites or as a transfer connecting.

Car rental service

Car rental service is an integral part of tourist transport system in many nations in the world today. Car rental operators are offering their car either on the basis of self-driven or chauffeur driven. Travellers fly to different country and take car on rental basis from car rental company. These rental operators may have their offices at the major stations, airports, hotels from where the traveller can rent it and drive to different city, destination or sites. The car can also be booked through travel agent, tour operators, global distribution system etc. Car rental industry is huge. There are around ten globally operating companies. Primary among them are Avis, Budget, Alamo, Dollar, Thrifty, National, Hertz, Europe car rental. Hertz the world's largest car rental company having its operation in nearly 5000 locations with around 42,000 cars.

Entrepreneur occupies the first place in terms of service, comfort, fleet size, etc. as whole published by recent study on consumers using rental services.

1. Self-driven car: In this type of rental services the traveller drive the vehicle of his own. The most important feature and benefit of this rental system is that the traveller does not require to return back to the office or outlets from where he/she booked or collected the car. However, in some countries there are certain laws governing the eligibility of the traveller to become a driver. Many rental firms expect that the traveller should be of minimum age of 25 and have a valid driving license to ensure that he/she is proficient in driving.

2. Chauffeur-driven car: In this type of system the traveller is offered car with a driver too.

Car rentals are offered in terms of travelling pattern of customer and their usage. These may be in terms of length of travel like:

1. Daily rentals: This refers to the booking for a maximum period of 24 hours and returning the vehicle within it.

2. Weekend rental: It defines the rental that is being made for weekend days starting from Friday afternoon to till Monday morning.

3. Weekly rental: This is offered for a week ranging from five to seven days.

4. Monthly rental: It is meant for one month ranging from 25 to 31 days.

5. Mileage rental pattern: In this pattern travelling mileage taken into consideration. These are of:

- *Every mileage rentals:* In this system the rentals are charged on the basis of total distance travelled by traveller and multiplying it with a rate that is defined by operator for every mileage.
- *Fixed mileage:* In this system a certain fixed amount is charged from the traveller for rental where the operator also define the distance to be covered within that charges, travelling beyond this requires extra payment and as per the operator norms.

6. Unlimited mileage: In this system the traveller does not have any restriction on travelling distance, and is charged on the basis of agreement, which is being made priority between operator and traveller before travel. Beside car rental services there are a number of other transportation services that cater to the need of travellers like luxury buses and normal buses operated by public sector undertaking and private operators, etc.

7.5.2 Car rental Industry in India

Hertz's Indian franchisee, Carzonrent India, is the leading car rental operator of self-driven car, which accounts to nearly 18% share in 2011. The company has the largest fleet of self-driven cars, and offering long- and short-term car rentals to its customers. Next to Carzonrent, Mercury Car Rentals (Avis) is the second largest operator, with a 9% share. While Mercury is followed by International Travel House.

Buses

Buses are used for intercity travel as one of the economical and safest mode of transportation. However, these are not a popular mode of transport for holiday travel in economically affluence western nations. These are mostly favoured by older people who are reluctant to drive and have limited earning. Buses often used by price sensitive budget tourist for their inter city tour. The major bus service operators in the world are located in USA and of which evolved as brand are Greyhounds and Travel ways, etc.

In India, buses are operated by different public sector state transport undertaking owned by state and central government, like India Tourism Development Corporation, which operates 12 transport units and State Transport Development Corporation and State Tourism Development Corporations and private operators. Buses take up over 90% of public transport in India. However, this share of buses is only 1.3% in terms of use for touring purposes; while cars, taxies and jeeps account for nearly 7.8% of the total road traffic, this presupposes the inadequate development of road transport facilities. The share of luxury coaches and car rental services have only a symbolic representation and mostly used by the foreign tourist in and between metros. Indian domestic travellers mostly use buses for day trip or excursion.

Check your progress

I Each answer should not exceed 50 words

- (a) Airport Authority of India
- (b) Eurail
- (c) Palace on Wheels

II Each answer should not exceed 250 words

- (a) Write short note on Warsaw convention 7.2.3
- (b) Brief about Cruise tourism in India

III Each answer should not exceed 500 words

- (a) Explain in detail about the Rail transportation and luxury train services in India
- (b) Describe the Road transport scenario in India

7.6. Let us sum up

In this lesson we have studied about the types of transportation and its significance in tourism. As tourism refers to some kind of travel, this necessitates the importance of transport in tourism. Transport also helps in the production and distribution of goods and services that are being catered to meet the need of tourists, and more importantly, it helps tourists to reach the destination.

LESSON 8

ROLE OF TRAVEL AGENCIES

8.1 Learning Objectives

After reading this lesson, you will be able to

- ❖ study about the origin and growth of various travel agencies
- ❖ learn about the role travel agencies and the functions of a travel agent
- ❖ examine the role of IATA-UFTAA in the travel and tourism industry

Structure

- 8.1 Introduction**
- 8.2 Origin Growth and Development**
- 8.3 Functions of Travel Agency**
- 8.4 Requirements for Setting-up Travel Agency**
- 8.5 The Tour Operations Business**
- 8.6 Approval from Organisations and Institutions**
- 8.7 Let us sum up**
- 8.8 Answers to check your progress**

8.1 Introduction

Travel agency sector can be considered to be a link between the producers of various travel services like tour operators, airline companies, transport operators and hoteliers on the one hand and their customers on the other. Today the travel agent has become an important, integral, part of the travel and tourism industry worldwide. Majority of people are using the services of travel agents for organising their travel both international as well as domestic. It is estimated that worldwide almost 70% of all international travel and 45% of all domestic travel

are arranged by the travel agents. The figure however, may vary from country to country. The important role of the travel agent in the modern world is summarized in the principles of professional conduct and ethics of the American Society of Travel Agents.

8.2 Origin Growth and Development

Thomas Cook the Founder

Any discussion on sale and organization of travel must begin with the pioneer named Thomas Cook. The history of the business of the present Thomas Cook Group Limited can be traced back Thomas Cook, who not only was the first organised Travel Agent in the world, but who it could be said, invented the travel business. A book salesman, a baptist preacher of Derbyshire was on his way to a temperance meeting in Leicester when he was inspired with “the idea of engaging a special train to carry the friends of temperance from Leicester to Loughborough in England and back to attend a quarterly delegate meeting.” He thought that it was a sounder proposition to persuade a railway company, then in its infancy, to carry a train load of passengers at a very cheap fare than to run the train at ‘standard’ fares, but possibly only a quarter full. The man was Thomas Cook and his idea was put into operation with characteristic speed and efficiency. A few weeks later 570 travellers made the journey by the ‘Midland Counties Railway at a specially reduced fare. This venture was soon followed by excursions to various other places, and in 1843, 3,000 school children were taken on a trip from Leicester to Derby in England.

8.2.1 Thomas Cook the Mass Excursionist

Thomas Cook’s real beginning as ‘mass excursionist was, however, the Liverpool-Caernarvon trip of 1845. The tourists travelled by rail to Liverpool, from where they took a steamer to Caernaryon. The advertisements for the trip caused a sensation and the response was so overwhelming that a second trip had to be arranged. Cook thought of every detail. He made a preliminary survey of accommodation and facilities and produced a handbook of the trip to Liverpool. The excursionist invasion of Scotland soon followed in 1846 and 1847. From 1848 to 1863 Cook conducted circular tours of Scotland, with 5,000 tourists a season. With the citadels of the landed aristocracy falling before him, he saw more enticing prospects opening

before him: "I had become so thoroughly imbued with the tourist spirit that I began to contemplate Foreign Trips, including the continent of Europe, the United States and the Eastern land of the Bible."

8.2.2 Holidays Away From Home

By the mid-nineteenth century 'Holiday away from home' had become customary for a larger social group than ever before. Cook's initiative and organising genius provided the final impetus. In the winter of 1850-51, Cook was already negotiating for a tour of America, but his attention was diverted when he was offered the opportunity of conducting excursion trains to the Great Exhibition of 1851. Altogether, Cook conducted 1,65,000 people to and from the Crystal Palace. In 1856, Cook succeeded in organising his first grand circular tour of the continent. The tour was so successful that it had to be repeated six weeks later.

8.2.3 Package Tours

Thomas Cook's conquest of Europe began in 1862 when he made arrangements with Brighton and South Coast Railway for passenger traffic to the continent. Cook's Paris excursions are the first true 'package tours'; all the details of transport and accommodation were pre-arranged. In 1863 Cook visited Switzerland where his ideas were greeted with enthusiasm by hoteliers and railway proprietors. His next stop was Italy. Cook first made a personal survey of Turin, Milan, Florence and Genoa, to familiarise himself with their touristic attractions and facilities. In 1864 the first guided tour of Italy left England with applications far in excess of the available tickets. The 1860s also saw the introduction of Cook's 'railway and hotel coupons'. Cook personally examined the system by travelling through Italy to Vienna, down the Danube into Hungary and from there into Switzerland. By the 1890s, 1,200 hotels throughout the world accepted his coupons. Starting in 1868 Cook arranged regular circular tours of Switzerland and Northern Italy.

8.2.4 The Eastern Prince's Department The first official London Office of Thomas Cook and Sons was established in 1865. John Mason Cook now joined his father as a permanent partner and took charge of the London office. From that year on, the history of Thomas Cook and Sons was one of continuous expansion. In the year 1880 John Mason Cook left for India

and established offices in Bombay and Calcutta and formed the 'Eastern Princes' Department. In 1887 this department arranged the visits of Indian princes to Queen Victoria's Jubilee Celebrations.

8.2.5 Tourism as an Industry

By taking advantage of nineteenth century advances in transport technology, Thomas Cook and Sons had effected a revolution in tourism by the end of the century. No longer the preserve of the rich and the aristocrats, tourism was now an industry. Armed with Cook's hotel and rail coupons, the tourist could demand uniform prices and standards of service and accommodation. This new standardisation had distinct advantages. It meant comfort and convenience and less need for decision making on the part of the individual tourist. The tourist was less likely to experience discomfort or embarrassment.

8.2.6 Cook's Company

The management of the Company passed on to John Mason Cook's three sons in the year 1898. At the time of John Mason Cook's death, the business included three main aspects of travel-selling tours, banking and shipping. Soon after the Second World War, the British government acquired the principal interest in the Company. In the year 1972, the British Government sold the company to Midland Bank Consortium.

Today, Thomas Cook Group is the parent company of a worldwide group of companies which are partially or wholly owned. The company also has a close trading relationship with Companies International des Wagon-Lits et Tourism, and the combined worldwide network of these companies, together with their authorised agents. The company also introduced traveller's cheques which were originally called 'circular notes'. Members of the Thomas Cook Group of companies now issue cheques as principals in different currencies and are associated with partner banks in various countries. It is also a large trader in the buying and selling of foreign currency bank notes. Thomas Cook Group Limited today provides a wide range of services to its customers in over 150 countries worldwide through their network of over 1,200 outlets. The company is considered to be one of the largest travel companies selling a wide range of travel services

Much has changed since the year 1841, when Thomas Cook chartered a train to carry 570 travellers at a specially reduced fare from Leicester to Loughborough in England, Cook, who bought the railway tickets in bulk and resold them to members of his group, can be credited with being the first bona fide travel agent to work as a full-time professional. However, neither Thomas Cook & Sons, nor American Express Company or Cox & Kings were then a retail agent as the modern complex distribution chain had not yet evolved in any trade including travel.

8.2.7 Development in Scope and Work

The scope and the role of the travel agency was limited in the beginning since mass tourism as we w it today had not yet begun. It was, however, the introduction of the air travel which gave a boost to the travel agency business. The introduction of an economy class by various airline www.panies crossing the North Atlantic heralded the era of travel agency and was responsible for their growth. The introduction of an 'economy class' in effect was nothing more than a projection of Thomas Cook's original idea of adjusting prices to encourage full capacity use of every means of transport.

Rapid development of transport system, especially the jet travel, improved living standards combined with reduction in working hours is the root cause of today's upward surge in travel. Side by side with the rapid improvements in industry and technology, practically all aspects of life have become more and more complex particularly during the past half a century. This is certainly the case in the travel industry in which, only a century ago, the job consisted almost entirely of arranging a simple reservation for the travellers in some means of transport. Today the functions and duties of a person at the travel agency counter are vastly different and more varied. He is now called upon to perform a variety of duties rather than just issue tickets and reserve seats in a train, aero plane or accommodation in the hotel. Travel today is no longer the privilege of the few, but is sought by millions. No longer does the travel agency exist for the sole purpose of selling tickets from one points to another. The travel industry developed along certain well-defined lines as the worldwide demand on its services increased. The urge to travel became very intense over the years resulting in wide - spread growth of travel agencies in the world. Most of the travellers wished to have their travel arrangements made in advance

and to be relieved of the difficulties of coping with various pre travel arrangements of which they had only a very limited knowledge.

8.2.8 Modern Concept

Over the years the range and activities of a retail travel agent have increased manifold. In the modern context, the role of a travel agent is rather different to that of most of other retailers selling merchandise. The travel agent does not purchase travel with a view to reselling the same to its customers. It is only when a customer has finally decided on the purchase of travel that the agent approaches the principal on behalf of his customer. The retail travel agent, unlike most other retailers, does not carry an inventory or stock of travel products in his premises.

The main role of retail travel agents is to provide to their customers a convenient location for the “purchase” of various elements of travel like transport, accommodation and several other ancillary services associated with holiday and travel. The travel agents act as booking agents for holidays and travel and disseminate information and give advice on such services. This role can be summed up as follows:

- (i) to give advice to the potential tourist on the merits of alternative destinations, and
- (ii) to make necessary arrangements for a chosen holiday which may involve booking of accommodation, transport or other relevant services associated with his travel.

A travel agent, in order to give an advice to his potential customers on the merits of a destination, must possess knowledge, expertise and up-to-date information about that destination. Besides, a travel agent has close contacts with providers of services, i.e., their principals from whom they purchase services for their customers. In other words, a retail travel agent is an intermediary providing a direct link between the consumer and the suppliers of tourist services, i.e., airlines, transport companies, hotels, auto rental companies, etc. The retail agent is the one who acts on behalf of the principal, i.e., the original provider of tourist service such as an airline company, hotel company, shipping company, insurance company, railways or a tour operator. An agent sells the principal's services and is rewarded by a commission.

8.3 Functions of Travel Agency

The scope and range of travel agency operations would depend on the size of an agency, If the company is large in size, the range of activities will be more comprehensive. In this case the agency will have specialised departments, each having to perform different functions. To deal with the subject of a travel agency, the best method of approach is, perhaps, to consider its functions. These may be broadly classified as follows:

8.3.1 Travel Information Counseling

One of the primary functions of a retail agent from the point of view of the tourist or the general public is to provide necessary information about travel. This information is provided at a convenient location where the intending tourist may ask certain questions and seek clarifications about his proposed travel. This is a very specialised job and the person behind the counter should be a specialist having excellent knowledge of various travel alternative plans. He should be in a position to give up-to-date and accurate information regarding various services and general information about travel, etc. The presentation to the potential customer must be forceful, and exciting variations must continually be devised to help sell tours. A good travel agent is something of a personal counsellor who knows all the details about the travel and also the needs and interests of the intending traveller. Communication plays a key role in dissemination of any type of information. This is equally true in the case of dissemination of travel information. The person behind the travel counter should be able to communicate with the customer in his language. The knowledge of foreign language, is an essential prerequisite for personnel working in a travel agency.

8.3.2 Itinerary Preparation

Tourist itinerary is a composition of a series of operations that are a result of the study of the market. A tourist journey is characterised by an itinerary using various means of transport to link one locality with another. Preparation of different types of itineraries is another important function of a travel agency. A travel agent gives advice to intending travellers on the type of programmes which they may choose for their holiday or business travel. The study and the realisation of the itineraries call for perfect organisation (technical and administrative) as also

knowledge of the desires of the public for a holiday and the propensity to receive tourists by receiving localities.

8.3.3 Tours Costing/Pricing

Once the contracts and arrangements have been entered into, there comes the task of planning and costing tours, both for inclusive programmes and to meet individual requirements. This job is intensely interesting and at the same time challenging. It calls for a great deal of initiative and drive, for travel to those places which are to be included in the itineraries. Paradoxically many of those who do this type of work visit comparatively few of the places included in the itineraries they prepare. This is essentially a job for a meticulous person and calls for considerable training and ability. Many agencies, with the cooperation of airlines and other transportation companies, take the opportunity of arranging educational tours for such staff to destinations with which they deal.

Many large agencies have experts who are authorities on particular countries and, in addition to a general programme, many will issue separate programmes dealing with specific territories. Separate programmes, dealing with holiday offers based on specific forms of transportation, e.g., air, rail, road or sea, may also be prepared. Programmes also have to be prepared to cover different seasons of the year.

Publicity is an important part of the programme. Having spent considerable time and money on preparing all that goes into the issue of a programme, publicity must feature considerably in the activities of a travel agency and more so if the agency happens to be a large one. The majority of large travel agencies have their own publicity departments under the management of an expert in the publicity field.

8.3.4 Marketing of Tour Packages and Income Sources

Product Sale

The main function of a travel agency is the product sale. Product sale is very complex subject especially when the product happens to be a tourist product. Because of the special nature of the tourist product and the multiplicity of manufacturers of the product, selling assumes

greater importance. In addition, the distribution channels through which the tourist product finds its way to the consumers are multiple and varied. The tourist product, as we have discussed earlier, consists mainly of attractions, transport and accommodation. The producers of elements of the above products include air, sea, road transport companies and carriers, hotels and other forms of accommodation units, and the organisations which are responsible for putting together attractions both natural and man-made.

In most of the countries product sale is conducted through a distribution system controlled mostly by a network of retail travel agents, tour operators and wholesalers. The individual elements of a tourist product like international air tickets, domestic air to train tickets are also mostly sold through agents or representatives of airlines and railway companies, and purchased directly by consumers. The consumers have, therefore, a choice between direct booking and using the services of an agent. In addition, there are alternative channels available to the consumers through which they may buy their tourism products. These channels include clubs and societies, mail order, travel shops in supermarkets and departmental stores, tourist fairs and exhibitions and, more recently, electronic booking methods like computers.

8.3.5 Ticketing

Selling tickets to clients using different modes of transport like air, rail and sea is yet another important function of a travel agency. This calls for a thorough knowledge of schedules of various modes of transport. Air carriers, railways and steamship companies have hundreds of schedules and the person behind the counter should be conversant with all these. Ticketing is, however, not an easy job as the range and diversity of international airfares is very complex and varied. These are several different types of fare combinations on the North Atlantic route alone. Changes in international as also in the local air schedules and additions of new flights from time to time makes the job of the travel agent one of constant challenge. An up-to-date knowledge about various schedules of air companies, steamship companies and railways is very essential.

Computerised reservation system has in recent years rather revolutionised the reservation system, both for air and rail seats, and also a room in a hotel. Many large travel agencies are using this both for air and rail seats, and also a road system. This system comprises a computer

network that can be used by the travel agent to reserve an air or rail accommodation as also accommodation in a hotel. Through a wide network, confirmation of reservations are available in a matter of second,

8.3.6 Settlement of Accounts

Linked with the function of ticketing and reservation of accommodation in a hotel is the settlement of accounts of the clients. Accountancy plays an important part and is one of the major duties to be performed by the travel agency. Dealing with the settlement of accounts in all parts of the world calls for a thorough knowledge of foreign currencies, their cross-values and, above all, the intricacies of exchange control regulations, which vary from country to country.

8.3.7 Provision of Foreign Currencies

Provision of foreign currencies to intending travellers is another specialised activity of a travel agency. Some of the larger travel agencies deal exclusively in the provision of foreign currencies, travellers' cheques, etc. This is an important facility to intending travellers as it saves them a lot of time and energy in avoiding visits to regular banking channels.

8.3.8 Insurance

Insurance, both for personal accident risks and of baggage, is yet another important activity of the travel agency. Some of the larger travel agents maintain sizeable shipping and forwarding departments, aimed at assisting the traveller, to transport personal effect and baggage to any part of the world, with a minimum of inconvenience.

The multifarious activities mentioned in the above paragraphs show that the travel agency's range of services in modern times has expanded a great deal. The field of expertise is quite large and is constantly growing with the fast changing travel needs of the people. The job description of a modern travel agency can be summed up as follows:

- (i) Preparation of individual pre-planned itineraries, personally escorted tours and group tours and sale of pre-paid package tours.

- (ii) Making arrangements for hotels, motels, resort accommodation, meals, car rentals, sightseeing, transfer of passengers and luggage between terminals and hotels, and special features such as music festivals and theatre tickets.
- (iii) Handling of and giving advice on the many details involved in modern day travel, e.g., travel and baggage insurance, language study material, traveller's cheques, foreign currency exchange, documentary requirements (visas and passport) and health requirements.
- (iv) Possession of professional knowledge and experience, as for instance, schedules of air and train connections, rates of hotels, their quality, whether rooms have baths, etc. All of this is information on which the travellers, but for the travel agent, will spend days or weeks of endless phone calls, letters and personal visits.
- (v) Arrangement of reservations for special interest activities such as conventions conferences, and business meetings and sports events etc.

8.4 Requirements for Setting-up Travel Agency

Organised Travel

There are various activities which a travel agency has to perform in order that an intending traveller undertakes his proposed journey and enjoys a holiday of his choice. There are various steps involved from the time a traveller visits a travel agent by buy a ticket until he returns home after visiting a place of his choice.

Organised travel by a travel agency can be of two types, i.e. (i) single client, and (ii) group client. In order to effect the journey, the following main elements (in both types of travel) need to be considered:

- (a) Study of the journey,
- (b) Estimate of expenditure,
- (c) Execution of the journey, and
- (d) Presentation of accounts.

8.4.1 Individual or Ordinary Trips

The following steps are involved in organising individual or ordinary trips:

- (i) The client turns to the travel agent to organise for him a particular journey (cultural, natural, business, religious, etc.)
- (ii) The agency from this angle will examine as to what will be involved, e.g. scope of journey, when the journey is to take place, various services needed and the accessories required.
- (iii) Based on the above evaluation and other elements in his possession, the travel agent will suggest an itinerary and will then communicate to the client the estimated maximum cost for the client's approval.
- (iv) The travel agent will then compile the definite estimates, a total of a series of various costs added up, e.g. transport, accommodation, the services such as those of guides, operative costs such as (postage, telex, telefax, E-Mail, telephone, etc.)
- (v) The travel agent then will present a document of the amount of money to be paid in duplicate to the customer. The client returns one of the debit copies signed on acceptance accompanied with a deposit (in anticipation). The deposit normally is about 25 per cent of the total cost.
- (vi) Once the client's approval has been obtained, the travel agent's operation department then executes the journey.
- (vii) The operation department's task now it to book for the established dates the transport and various other services. After the booking confirmation has been received, the travel agent issues the vouchers.
- (viii) The travel agent prepares the 'tourist itinerary' which will accompany the client through the entire journey. It will indicate the tickets to be used, the hotels and other services booked and will include vouchers, etc. Normally the itinerary is made in triplicate: one for the client another for the agency and the third for the hotelier or those who will provide the required services paid by means by vouchers.
- (ix) The last formality is the delivery to the client of the vouchers, confirmed tickets, the technical itinerary.

- (x) When the group is particularly large, e.g. for sports, etc. the travel agent needs to take extra care by way of informing public authorities for purposes of security, etc.

Travel agents in a highly developed market cover all the above activities and range of services which depends upon the extent of the economic development of that country. The travel patterns of the population in advanced countries are different as compared to those in developing countries. The services of travel agents are increasingly utilised in developed countries. In some of the advanced countries like the USA, Canada, Germany and Japan a very large percentage of tourists are utilizing the services of travel agents.

8.5 The Tour Operations Business

The dramatic growth of tourist traffic to the Mediterranean countries of Europe is a principal feature of the history of mass tourism in the last forty years. A major contributing factor in this growth of air travel holiday tourism has been the development of 'inclusive tour, a method of packaging a holiday. The idea of buying a package of travel, accommodation and perhaps some ancillary services such as entertainment etc., became established in Western Europe in the 1960s. Essentially an 'inclusive tour' is a package of transport and accommodation and perhaps some other service which is sold as a single holiday for an all inclusive price. This inclusive price is usually significantly lower than could be obtained by conventional methods of booking transport and accommodation separately from individual hotel and transport tariffs. The principal feature of the inclusive tour is that the tourist may buy, for a single price, a holiday which is much cheaper than would be possible for the holiday maker if he bought the components of his holiday separately and directly from individual hotels and from transport companies or from a retail travel agent.

The chief functionary or the principal in this system is the tour operator. It is the tour operator who buys aircraft seats and hotel beds and certain other facilities such as surface transport of entertainment and makes up the package. Historically, the tour operator has mostly emerged from retail travel agency. However, today a clear distinction must be made between tour operator and a travel agent. The latter, the retail travel agent, undertakes to sell the travel services of his principal, who will be airline companies and other transport undertakings, hotel

groups, shipping lines and the providers of such ancillary services as traveller's cheques, etc. Unlike the travel agent who is the retailer of the tourism product, the tour operator is a manufacturer of a tourism product. He plans, organises and sells tours. The tour operator makes all the necessary arrangements - transport, accommodation, sight-seeing, insurance, entertainment and other matters and sells this package for an all inclusive price. A package tour is designed to fit a particular group of travellers. These may be special interest tours, i.e. mountain tours and can be escorted. Escorted tour normally includes transportation, meals, sightseeing, accommodation, guide services, etc. It is the escort or the group leader who is responsible for maintaining the schedule of the tour and for looking after all the arrangements.

8.5.1 Group Inclusive Tour (GIT)

This is the most popular form of tour in this category where people travel in groups of 15 or more persons. These tours are available for any destination. The terms and conditions for group inclusive tours are laid down by IATA. The escort for such groups normally travels free as the airline provides him with free passage and accommodation. 'Foreign Inclusive Tours' (FIT) on the other hand are unescorted package tours. These tours are comparatively more flexible. The traveller can buy a predetermined package with arrangements for sightseeing, hotels and certain meals, where necessary. He does not tour with a group. He can make his own arrangements and programmes according to his liking. The inclusive tour is one of the several devices which enable tourists to enjoy the lower prices.

How does the tour operator manage to sell the package to the traveller at such a low price? The low price of the package holiday or inclusive tour is made possible by reason of the lower unit costs obtainable both for the air travel and for the hotel accommodation. The tour operator enters into long-term contracts for aircraft seats and similar contracts with hotels for booking rooms. By mass producing holidays in the form of package tours, the tour operators are able to procure substantial discounts from carriers, hoteliers, etc., and offer their package deals at much lower rates. The profits of the tour operators and the success of his operations, however, depend on achieving of very high load factors for the aircraft and very high occupancy rates for the hotel. In this way, unit costs can be maintained sufficiently low to enable the tour operator to offer his package at a price which is often less than the cheapest available fare

alone. A breakthrough in the business of tour operation came when airlines recognised that tour operation can fill the empty seats and introduced special fares for use exclusively by tour operators for combining into an inclusive tour.

The tour operator has thus emerged as the true manufacturer of the inclusive tour product packaged, standardised and mass-produced. The tour operator may sell this product directly to the public or through the channels of the retail travel agencies. It can be marketed successfully in the tourist generating countries to a mass market just because it is standardised, packaged and quality controlled. The product is therefore susceptible to the similar marketing techniques that are applied to the marketing of consumer goods.

8.5.2 Handling a Client-WATA Guidelines

The agent's role in handling a client is very important. Once a client enters the agency it becomes necessary for an agent to properly anticipate his needs and requirements. The client also has come with a pre-determined notion about a destination he is visiting. WATA, the World Association of Travel Agencies, has prepared comprehensive guidelines for handling a client. These guidelines are based on the WATA Master-Key, an annual publication of the World Association of Travel Agencies. Updated and published yearly, the WATA Master-Key is a selectively comprehensive source of travel information. Individual agency tariffs given in the publication, represents the selling tool for members, incoming and outgoing services. Along with the tariffs the Master-Key gives a country description sheet containing a wealth of useful background information of destination. In addition, the Master-Key also gives detailed information about some hotels located in important cities and tourist centres together with prevalent confidential tariffs and other relevant information for travel agencies.

8.5.3 WATA Master Key

The WATA Master-Key is a valuable reference material for travel agents. Its presentation makes it easy for the users to extract the information they need. The guidelines as enumerated in the Master Key are as follows :

1. Sale of Tour

It should first be determined whether the client who wants to book a tour prefers to :

- (a) Join an escorted tour, or
- (b) Choose a FIT, combining leisure and activity according to his individual tastes and interests.

2. FIT/Your Relations with Client

If your client wants a “tailor made” tour, let him make the suggestions, without imposing your own views, on the following points:

- (a) Itinerary
 - (i) Determine the cities to be visited.
 - (ii) Number of days (overnights) in each place.
 - (iii) Mode of transportation between cities.
 - (iv) Establish a rough time schedule, taking into consideration the time at this disposal.
- (b) Transportation
 - (i) Air transport should be used when time is limited and for long distances.
 - (ii) Surface transportation should be recommended for shorter distances.
 - (iii) For trains, determine whether advanced reservation is necessary. Indicate stations where trains are to be changed.
 - (iv) Bus should be recommended in some countries, as it usually allows additional sightseeing
 - (v) When arranging timetables, remember that your client is on vacation, and therefore avoid early departures.

(c) Hotel Accommodation

1. Category of Hotels. Examine with your client which category of hotel he wants to stay at Deluxe, First Class, Standard or Economy class. It is preferable that he is accommodated

in a maximum rate room; however, if he must consider the cost, then rather suggest a lower grade hotel with best available room.

2. **Type of Rooms:** Examine whether your client wishes a special room on a special floor, with or without bath/ shower, sea view, outside or inside, etc. Draw his attention to the fact that in high season a room with a bath may be difficult to obtain in some places. In some cases a double room for single occupancy can be suggested, a single room being often small or not well situated. If your client insists on having a particular room, he may have to pay a supplement.
3. **Meals:** Ask your client whether he wants to have accommodation on bed and breakfast, demi-pension or full pension basis. If accommodation is on bed and breakfast basis, keep in mind that in certain resorts, demi or full pension is compulsory.
4. **Check-in Time:** Remind your client that check-in time at hotels is usually after 12 noon. Immediate occupancy on early morning arrivals can only be secured if the room is reserved for the previous night. If your client leaves late in the evening you may propose to him to pay for an additional night.
5. During periods of festivals, fairs or congresses, hotel space may not be available, rendering it necessary for your client to change the dates in those places, cabled hotel confirmation should, therefore, be suggested,
6. During periods, such as important festivals and events, a minimum stay of 5-7 days may be required. The same is applicable to some winter resorts, where a minimum stay of two weeks is required at Christmas and New Year.

(d) Transfers

1. The need of transfers upon arrival or departure results from the fact that it is often difficult to find one's way at airport, piers or stations with which one is not familiar.
2. Transfers by agencies include interpreter meeting and assistance, accompanying clients (unless otherwise specified), portage and transportation of 2 pieces of hand luggage per person between airport, station, bus or air terminal and hotels or vice versa, as well as tip to driver, but it does not include tip to hotel porter.

3. Type of vehicle varies according to cities, generally by private car or taxi/cab.
4. Airport transfers are naturally more expensive, but also the most convenient ones.
5. When opting for transfer from city air terminal, your client must know that there will be no assistance at the airport, that he will have to tip for baggage at the airport and pay for bus between the airport and the city terminal.
6. Bus Arrivals: Certain bus companies stop at the major hotels to drop or collect clients, the disadvantage of this being the clients' dependence on time schedules and waiting for his turn to be dropped off. In addition, it will be necessary for the client to contact the local agency if other services are not to be provided in that city.

(e) Sightseeing/Excursions/Tours

1. The advantage of arranging sightseeing in advance is that your client does not have to waste his time, queuing up in the local agency. Also, a balance can be established in advance between leisure time and sightseeing, as well as for tours of the city and countryside.
2. Motor Coach Tours: Apart from the economic viewpoint, there is the advantage of meeting other travellers, but clients have to arrange their own transportation to meeting points, as pick-up is very seldom done on motor coach tours.
3. Private Car Tours: Your client is picked up at the hotel, has the choice of time of departure and can stop wherever he likes, but this is the most expensive solution. In some places there are regular private car tours, or else sightseeing can be done on a seat-in-car basis.
4. Hire of Private Car with Chauffeur.
 - a) City hire-must be recommended to deluxe clients, whose time is limited between trains, boats or planes, or who already know the city and want to see only special places or go shopping. Since very often the chauffeur cannot act as a guide, a private guide will be needed for sightseeing.
 - b) Touring hire-if a private car is used for travelling from one city to another, local guides in each place will be sufficient. Distance covered daily should not exceed 250 km. Client's attention has to be drawn to the fact that he will have to pay for

empty run of car (return to point of departure). The full daily basic charge is due, even if the vehicle is picked up in the evening.

5. Motor Launch Tours/Boats Trips: The same applies here as for motor coach tours. Deluxe clients will be picked up at the hotel by private car and driven to embarkation pier.
 6. Self-driven cars can also be provided when clients fill the necessary conditions and if wanted, a local guide can be placed at their disposal.
- (f) Music Festival, Theatre and Concert Tickets: Clients must be told that advance reservation is necessary. Confirmation of requested tickets cannot be guaranteed and tickets are not refundable unless they can be resold.

8.5.4. Quotation

- (a) Land Arrangements: On the basis of all details furnished by your clients, it will enable you to make an estimate of the land arrangements
- (b) Transatlantic/Pacific Transportation: To the land arrangements, the cost of flight/boat tickets for Transatlantic/Pacific transportation has to be added.
- (c) Cost Price: Items a and b above give you the cost price. (d) Selling Price: In order to obtain the selling price you have to add your handling fees or mark-up, as well as a margin safeguarding any possible increase.

8.5.5. Suggested Itinerary

- (a) A suggested itinerary should be drafted of what has been agreed with your client and submitted to him, together with the final price. The accompanying letter should clearly specify what is included in the price :
 1. Price and type of land arrangements.
 2. Price and class of air/sea/rail tickets, indicating that they are subject to change without notice.
 3. The agency's conditions regarding handling charge, cancellation fees, possible deposit request, etc.
- (b) It should also point out what is NOT included, such as cost of passport, visa, gratuities, tips to hotel porters, beverages, laundry, taxes (government, landing, embarkation), etc.

- (c) Acceptance of suggested itinerary should be requested to enable you to proceed with reservation, and a deposit should be asked.

8.5.6 Customer-Suppliers Relationship

Reservation Procedures

- (a) Once you are in possession of the client's agreement you can start reservations with carriers and hotels.
- (b) In case your client requests only hotel reservations in a few places, it is advisable to make the reservations directly with the hotels.
- (c) However, if transfer, sightseeing or other services are also requested, then it is preferable to go through the local agent, who is in a better position to replace a hotel by a similar one, in case of full occupancy.

(a) Transfers: Due to frequent changes in time schedules and /or due to changes your client may require, it is NOT advisable to send transfer requests earlier than one month prior to final documentation. An exception can be made if a special service is required and rate confirmation is needed.

1. Transfers should be requested by vouchers, indicating the following items
 - (a) Full name of client (s) and number of passengers (for a child or an aged person give their age also).
 - (b) Date of transfer.
 - (C) Full description (indicate type of car, name of airport, city air terminal or station, exact flight or train number and arrival/departure time).
 - (d) Name of hotel the client is staying at.
 - (e) Town and date of issue.
 - (f) If you do not have the rate of service, request the rate of confirmation on the voucher copies.

(b) Transportation: Whenever possible, obtain all tickets for rail, bus, boat, cruise, sleeping cars, etc. that may be required locally from agencies of foreign railroads, bus companies, steamship lines, etc.

(c) Hotel Accommodation:

1. Depending on the time you have, hotel reservations can be made reservation requests, by telex or cable (give paid reply), through hotel representatives, or through a WATA office. If you reserve through a hotel representative or WATA office, their conditions should be respected.
2. Once you have a hotel confirmation, issue a voucher for reconfirmation, indicating the following items:
 - (a) Full name of client (s) and number of persons (for a child or an aged person give their age also).
 - (b) Type of room.
 - (c) Arrival and departure date, time of arrival and flight/train number.
 - (d) Meal condition - clearly indicate whether rooms only, bed and breakfast (Continental or American/English), half or full pension.
 - (e) Always mention on hotel vouchers: "All taxes and service charges included".
 - (f) Method of payment-indicate who will pay the bill. If the client settles the bill directly with the hotel, even when a deposit has been sent, hotels do not always pay a commission
 - (g) Always ask for a re-confirmation of the rate on the voucher copies.
3. If the best room is required, it should be determined as DELUXE, and a 10 per cent supplement foreseen.
4. If a suite is required, it can be estimated at 2 1/2 times the normal tariff.
5. Whenever necessary, an extra night is to be foreseen for early arrival or late departure. Indicate on voucher early a.m. arrival the following day or request additional night or day use, advising the exact departure time.

6. In case the split stays at the same hotel, a separate voucher should be issued for each day.

(d) Sightseeing/Excursions/Tours: The same applies as for transfers – regular sightseeing tours should not be requested earlier than one month prior to the final documentation, except when a special service is required (e.g., sightseeing starting at airport) or for excursions/ tours of two or more days duration.

1. Sightseeing/Excursions/Tours should be requested for WATA affiliates by vouchers, indicating the following items:
 - (a) Full name of client (s) and number of persons (for a child or an aged person give their age also).
 - (b) Date of sightseeing/excursions/tours.
 - (c) Reference number of tour (if given), tour designation and title.
 - (d) By private car or by regular scheduled motor coach.
 - (e) For regular tours, give time and place of departure for private car tours, indicate “pick-up at hotel”.
 - (f) Name of hotel client is staying at.
 - (g) Town and date of issue.
 - (h) In case a complete description does not appear in the agent’s tariff, ask for additional information and rate confirmation.
2. If your client wants to start a sightseeing tour from airport or station, add transfer-rate to sightseeing rate.

(e) Chauffeur Driven Car Hire

1. If private car hire with chauffeur is required, it has to be reserved in advance on the basis of rates quoted in the Master-Key. If rates are not given, apply to the agency for rates and details.
2. For request, issue voucher, indicating the following details :

- (a) Full name of client (s) and number of passengers.
 - (b) Type of car (year of construction if available).
 - (c) For city hire : Date and time of beginning of hire, length of hire time of termination.
 - (d) For touring hire : Date of beginning and termination of hire, starting time of hire and termination points, as well as stopovers.
 - (e) Special requests, such as automatic cars, air conditioning, luggage, rack, etc.)
 - (f) Name of hotel client is staying at.
3. City and Touring hire must be issued on separate vouchers, as tariffs and minimum daily averages are not the same. Also, if more than one day city hire is required issue one voucher for each day.
 4. Touring rate is established on the basis of a reliable map. Ten per cent of total mileage should be added for detours. If there are overnight stops, an additional 20 miles should be foreseen for possible use of car during the stay in city.
 5. For empty runs, it should be noted that the law does not authorise chauffeurs to drive more than 310 miles/500 km. per day, therefore, the total distance should be divided by this authorised maximum to reckon the number of chauffeur's overnights to be added to the touring rate.
 6. For chauffeur's accommodation, the rate appearing in the tariff has to be multiplied by the number of days the car has been used (special rates if outside the country).

(f) Self-Driven Cars: If given, use rates appearing in the WATA Master-Key otherwise, apply to the agency or consult Hertz, Avis, etc., for details and rates, whenever so indicated.

WATA Master-Key is a valuable document for a travel agent. The guidelines given in 'Key' make the job of a travel agent a lot easier. As a comprehensive source of travel information it facilitates the work of a travel agent. The destination profiles provide a wealth of background information not only for a travel agent but also for a traveller. The 'Key' is updated every year making it a valuable reference material.

8.6 Approval from Organisations and Institutions

IATA Accreditation for Travel Agency

Travel agents are the marketplace intermediaries responsible for selling the services of airlines worldwide. Considering the role and importance of air transport which is at the heart of travel and tourism selling, its services becomes the key motivation for engaging in travel agency business. Therefore, the importance of IATA approval for a travel agency is essential to enable it to sell the services of airlines.

For setting up a travel agency business there are no legal requirements. In some countries, however, governments exercise some kind of a licensing control over agencies. Most principals license the sale of their services through the issue of an agency contract, or agency agreement. In the absence of such a contract or an agreement, a travel agency will not get any commission from selling the services on behalf of the principal. The income of a travel agent is derived only from a commission which he receives from the principal after selling their services.

A license is required by a travel agency for a commission to be payable on the sale of services of air carriers who are members of the International Air Transport Association. Domestic air services are, however, exempted from this. Most airlines want to sell their services worldwide but cannot do so on their own as it is not economically viable for them to set up extensive network of sales offices in every city of the world. It is the travel agents who are the marketplace intermediaries who make the sale of the services of the airlines possible worldwide through their own network.

As IATA travel makes up a substantial proportion of a total sale of travel agency turnover, it is important for the travel agent who wishes to offer his clients the full range of travel services to obtain the necessary IATA approval or appointment.

8.6.1 IATA-Controlled Approval

The travel agency approval of IATA is controlled by its Agency Administration Board. This Board is made up of a number of IATA members operating from a particular country. Before approval is granted by IATA, a travel agency has to fulfill certain condition. The most important

condition is the demonstration by an agency of its financial soundness or financial standing. It has to prove that it has sufficient finances to settle the accounts of various airlines whose business it is handling. Another condition which an agency has to fulfill is to ensure the suitability and security of its premises. The premises of a travel agency are to be centrally located preferably in the centre of the town in a commercial district having proper security. The security aspect is very important as the agency has to keep the ticket stock of various airlines and this is quite expensive.

Proficiency of the staff of a travel agency is another important aspect which is considered by IATA before giving an approval. The staff has to be professionally trained in the handling of airlines business. IATA in association with UFTAA conducts the International Travel Agents Training Programme to meet the growing demand for a professionally trained manpower for the travel industry. The IATA-UFTAA training programme operates under the authority of the Passenger Agency Training Board. IATA's Agency Training Services (ATS) located in Geneva (Switzerland) is responsible for the general administration of the programme.

In the field, the training programme is administered by a Local Coordinator who is responsible for the promotion of the training courses, the distribution of the training materials and the organisation of the examinations. The Local Coordinator is provided by the local IATA Agency Services, the National Airlines or the National Travel Agents Association in a particular country.

The IATA-UFTAA training courses have been designed primarily for travel professionals who work in IATA accredited travel agencies and whose main task is to sell agencies and whose main task is to sell international air transportation on behalf of IATA member airlines. The agents' staff can demonstrate proficiency by completing an IATA/UFTAA (passenger) training course.

The applicant's ability to generate new business is another requirement to be taken into consideration by IATA before considering an application for approval. This is to ensure that an agent is capable of generating new business in the market and has sufficient contacts to do so. To sum up, any travel agency, in order to get IATA approval for selling the services of IATA airlines worldwide, has to ensure the following:

- (i) Financial standing
- (ii) Suitability of the premises
- (iii) Security for control of ticket stock
- (iv) Proficiency of the staff
- (v) Ability to generate new business.

After considering the above aspects and if the IATA's Agency Administration Board is satisfied, necessary IATA approval is accorded to an agency. Once approved, a Passenger Sales Agreement is issued and a numeric ticket validation code is provided which will be stamped on all tickets issued by that IATA-approved agent.

IATA approval enables the agent to do business on behalf of all IATA members. It enables the agent to sell the services of all IATA member airlines throughout the world. The entire process of getting IATA approval can be quite time-consuming and lengthy and in the meantime agents applying for IATA approval are expected to generate business without getting any commissions.

8.6.2 Additional Appointments

In addition to the IATA approval which is basic for a travel agency, there are certain other approvals/ recognitions required for running a travel agency. These approvals, however, will depend on the extent of activities and range of services which a particular agency would like to offer to its clients. For instance, in order to make commissionable sales on the services of railways, domestic airlines services and other principals such as car hire companies, shipping and cruise services, necessary approval is to be obtained. These approvals will enable travel agents to sell services on behalf of these principles with remuneration.

Check your progress

I Each answer should not exceed 50 words

- (a) Define Travel Agency
- (b) Thomas cook
- (c) Define Itinerary

II Each answer should not exceed 250 words

- (a) Write a short note on the package tours
- (b) Discuss about the WATA guidelines

III Each answer should not exceed 500 words

- (a) Discuss in detail about the functions of a travel agency
- (b) Explain the requirements for setting up a Travel Agency

8.7 Let us sum up

The topics discussed in detail in this lesson include Travel agency, functions of a travel agent and requirements in setting up a travel agency. Today the travel agent has become an important, integral, part of the travel and tourism industry worldwide. Majority of people are using the services of travel agents for organising their travel both international as well as domestic. The functions and duties of a person at the travel agency counter are vastly different and more varied. He is now called upon to perform a variety of duties rather than just issue tickets and reserve seats in a train, aero plane or accommodation in the hotel.. The importance of IATA approval for a travel agency is essential to enable it to sell the services of airlines.

LESSON 9

TICKETING

9.1 Learning Objectives

After reading this lesson, you will be able to

- ❖ Understanding the process of ticketing especially airline ticketing
- ❖ Study about the various commissions, MPM-mileage calculation, Cargo and baggage handling

Structure

9.1 Introduction

9.2 Airlines Ticketing

9.3 PSA

9.4 MPM Calculation

9.5 Cargo Handling

9.6 Let us sum up

9.7 Answers to check your progress

9.1 Introduction

Selling tickets to clients using different modes of transport like air, rail and sea is yet another important function of a travel agency. This calls for a thorough knowledge of schedules of various modes of transport. Air carriers, railways and steamship companies have hundreds of schedules and the person behind the counter should be conversant with all these. Ticketing is, however, not an easy job as the range and diversity of international airfares is very complex and varied. These are several different types of fare combinations on the North Atlantic route alone. Changes in international as also in the local air schedules and additions of new flights from time to time makes the job of the travel agent one of constant challenge. An up-to-date knowledge about various schedules of air companies, steamship companies and railways is very essential.

9.2 Airlines Ticketing

Airline ticketing is the process of booking airline tickets for a customer according to his preplanned tour itinerary. A travel agent normally performs this job on behalf of his client (traveller). This travel agent may be a PSA, GSA or subagent of a PSA or GSA. The airlines of the world operate their flights to and from airports. Their departure and destination airports are clearly defined and there cannot be any drastic change in their flight schedules unless they encounter some serious problems. On the other hand, the customer also has some tour plans and requirements. The process of travel must be in tune with the entire itinerary of the customer. The job of a travel agent is to book the air tickets for the customer so that the objectives of the airline as well as those of the customer could be met. In this process, the travel agent earns a commission from the airline. If the travel agent is also planning the tour itinerary for his customer, he is entitled to get commission from the hotel or another travel agency that executes the tour of the customer at the tourist spot. But his commission on the airline ticket is paid by the airline. If he is a subagent, his commission is paid by the agent (PSA or GSA).

1. Operational Perspectives of Ticketing

Travel agencies are responsible for the task of purchasing air tickets, cruise line tickets and coach tickets for their clients. They plan the tour itineraries of their clients in advance, get their approvals and then, proceed to procure tickets from the airlines. The clients can also directly procure tickets from airlines. But that is the case when the passenger does not buy any tour package and is on his own during the course of his journey. We have observed that business travellers normally buy tickets only. They are well versed about those places that they are going to visit. Hence, hotel stay, food and transport are not the problems for them. Leisure travellers, on the other hand, buy tour packages, which include tickets of all types; they are not well versed with the tourist spots that they plan to visit and hence, depend upon the travel agency for preparing smooth and efficient tour itineraries.

2. ABC Codes

These codes are used in the membership of ICPB (India Convention Promotion Bureau). Category 'A' Membership comprises: The Department of Tourism, Government of India, National. Air carriers, Hoteliers, Travel Agencies, Tours operators, International. Congress Centers and

any other organisations duly approved by the Department of Tourism, Government of India in the Governing Body

Category 'B' Membership comprises: State Tourism Development Corporations, Airport Authorities, Trade Fair Authority of India, Centers of Education and Learning, Surface Transport Companies, Air Cargo Agents, Ancillary Services such as interpreters, photographers, audiovisual and other supplier, Restaurants, Banks, Central and State Government Emporia, Advertising Agencies, Newspaper/Magazines, Trade Journals, Sports Authority of India, Indian Olympic Association and other national sports bodies, Merchants/Traders, Federation of Indian Chambers of Commerce and Industry, Rent - A- Car Companies, Authorised Foreign Exchange Dealers, Duty-Free Shops and other organisations duly approved by the relevant Government Authority and as decided by the Governing Body.

Category 'C' Membership comprises: Travel Agents Association of India (TAAI), Indian Association of Tour Operators (IATO), Federation of Hotels and Restaurant Association of India. (FHRAI) duly approved by the Government of India and as decided by the Governing Body.

3 Agents in Air Ticketing

(a) **GSA:** The full form of the term GSA is General Sales Agent. He is approved by the IATA. There can be only one GSA of an airline on one city. The GSA take air tickets in bulk from the airline. He is required to achieve the target of sales (of such tickets) in specified time frames. He is a bulk purchaser of tickets. He can sell tickets to PSAs and sub-agents. He holds maximum stocks of air tickets. He gives a guarantee to the airline that he would sell a minimum number of tickets within a given time frame.

4 Commission: There are two schemes of payment of commission to the GSA, as follows :-

(a) **Commission Based on Basic Ticket Price:** The GSA gets a commission of 7 per cent on the basic ticket Price for every ticket sold by him. If he sells the ticket to the sub-agent or the PSA, then he gets a commission of 1 per cent on the basic ticket price while the subagent or PSA get 6 per cent on the basic ticket price. In such cases, the PSA or sub-agent does the

selling to the ultimate customer who is supposed to buy the ticket. These percentages are approved by the IATA. These are changed only rarely.

(b) Commission Based on Quantity of Tickets Sold: If the GSA sells 10 tickets, he gets the eleventh ticket free of cost. If he is able to sell the eleventh ticket, he keeps the entire amount (of its basic price) with himself. If he is not able to sell that ticket, the airline reimburses the basic price of that (eleventh) ticket to him. The rule of 10 sold + 1 free has been replaced by 15 sold + 1 free. The latter implies that if the GSA sells 15 tickets, he gets the sixteenth ticket free of cost. He can sell it and keep its basic ticket price with him. If he is unable to sell it, then, he is reimbursed the basic ticket price for that (sixteenth) ticket by the airline. Note that different airlines may use different schemes in this context. But the generally accepted rule nowadays is 15 sold + 1 free.

(C) Other Incentives: The airline gives turnover incentives and free tickets or packages to the staff of a GSA from time to time. But these sops depend upon how the GSA performs in the market. Different airlines give different types of incentives. Normally, free air packages or tour packages are given to the director of the GSA or his employees. These are over and above the commission that the GSA gets, as explained earlier.

Examples: Nijhawan Travels is the GSA of British Airways. There is no GSA of British Airways in Delhi except Nijhawan Travels. Further the GSAs of Lufthansa and Sri Lanka are having their offices in Connaught Place (New Delhi). Stic Travels is the GSA of all the airlines except British Airways.

9.3 PSA

The full form of the term PSA is Passenger Sales Agent. He is also approved by the IATA. There can be many PSAs of one airline within the same city. They can buy tickets from GSAs. They normally sell ticket stocks to ultimate customers. The PSA takes air tickets in small quantities from the airline. He is not bulk purchaser of tickets. He can sell tickets to sub-agents. He can get 10-12 stocks of air tickets per flight.

Commission: There are two schemes of payment of commission to the PSA, as follows:

- (a) **Commission Based on Basic Ticket Price:** The PSA gets a commission of 7 per cent on the basic ticket price for every ticket sold by him. If he sells the ticket to the sub-agent, he gets a commission of 1 per cent on the basic ticket price while the sub-agent gets 6 per cent on the basic ticket price. In such cases, the sub-agent does the selling to the ultimate customer who is supposed to buy the ticket.
- (b) **Commission Based on Quantity of Tickets Sold:** The rule of 10 sold + 1 free or 15 sold + 1 free is also applicable in the case of a PSA.
- (c) **Other Incentives:** The incentives given to the GSA can also be given to the PSA.
- (d) **DSA:** Its full form is Direct Selling Agent. These agents also sell air tickets directly to passengers. They can also sell tickets to sub-agents. A DSA must also be approved by the IATA: The airline gives air ticket stocks to him directly.
- (e) **Sub-Agent:** These are the small travel agencies that operate in various cities and depend upon PSAs or GSAs for their ticket requirements. They need not be approved by the IATA. They can deal with both the PSAs and GSAs. They get a commission of 6 per cent of the basic ticket price. The balance 1 per cent is retained by those PSAs or GSAs from whom, they procure such tickets. They are not eligible for getting incentives based on ticket sales (like 10 sold + 1 free or 15 sold + 1 free scheme). They get only commission on airline seats sold by them. However, in group bookings, PSAs may offer them extra seats (i.e. under 10 sold + 1 free or 15 sold + 1 free scheme). Normally, they work under PSAs. Their credit term is 14 days.

9.4 MPM Calculation

MPM stands for Maximum Permitted Mileage. It governs the maximum distance that a passenger can cover between two particular points by paying a direct fare charge. When a through fare is constructed by combining a few sector fares, through maximum mileage (if it is available) from the origin to the destination of such constructed fare may be used unless it is prohibited by rules applicable to one of sector fares. The tenets for computing the fare are mileage and fuel.

Following steps are taken in MPM Calculations:

1. Find out the applicable MPM between two particular points.
2. Add up the non-stop sector mileage between all the points of the route. Use the actual route of travel to do so. Also include scheduled stopovers, intermediate transit points and connecting points.
3. Compare the total of non-stop sector mileage to the applicable MPM permitted at the direct fare between the two points. If the total non-stop mileage is equal to or less than the MPM, the itinerary is allowed at the published direct fare, except as provided in the rules that follow
4. If the total sector mileage for a desired route exceeds the MPM, a surcharge has to be levied. Use the excess mileage table to determine that surcharge. It is available with all the travel agents and tour operators. The direct fare is subject to a surcharge in amounts varying from 5 to 25 per cent; it depends upon the mileage in excess of the published fare.
5. Airfare bargains are in vogue, especially after the airlines of the world have been gripped by a wave of recession. The post 9/11 syndrome, the Iraq-US war and global recession have wreaked havoc on the airline business. That is why, airlines are offering Apex Fares, Super Apex fares, Super Saver Scheme, Youth fares, Mid-week agains, Golden Eagle Scheme, Budget Fares, Frequent Flier Schemes, Al-Taj Offer etc., to their customers. These are the bids to woo the air passenger who is slightly afraid to travel by air. Recession has also played a derogatory role in this context. The AI and IA are known to incur losses simply because they are PSUs. Thus, the system of MPM may be given a back-seat, at least during the times of recession.
6. Frequent Flier Programme must be given special consideration. A frequent flier is one who uses the air services of various airlines to the maximum extent. Such a person is always on the move. His foreign trips are frequent. He is a valued customer for any airline. Thus, every airlines tries to attract him to its fold. Frequent fliers can be domestic or international passengers. If they travel frequently, which they do quite often, they get some bonus points from the airline. A frequent flier may get 10 bonus points if he travels

along the route of DEL-NY-DEL. As he is a frequent flier, he keeps in accumulating these bonus points. If the number of bonus points exceeds a fixed value, say 1,000, he is given one ticket free of cost, The member airlines of the Star Alliance use this scheme. The IA has also started this scheme. The passenger must use only one airline to avail this scheme.

9.5 Cargo Handling

The load of an aircraft cannot exceed a specified limit. Thus the officials accept only that much of the load, which can be made airborne. Excess load is rejected by airline officials. Normally, the load limits are not exceeded due to reasons related to safety. But in exceptional cases, some excess luggage may be taken aboard the aircraft.

There are 3 types of air cargo-passenger cargo, commercial air cargo, mail cargo and courier cargo. Passenger cargo is carried in the same aircraft in which, the passenger is being flown. Commercial air cargo is the cargo booked by those people or firms who are not flying along with the cargo. They want this cargo to be delivered in a destination city where it would be picked up by their agents. Those agents or representatives must arrive at the customs godown of the destination airport and get the goods release after submitting the airway bill to the airport/customs authorities at the destination airport. These are typically commercial transactions. Mail cargo comprises all the letters and packets that are to be sent by air mail. Courier cargo comprises the goods that are to be carried by the courier firms. It could include goods, documents and letters too. But courier services cannot be used to send animals, narcotics, gold, jewellery and other contraband items. Airmail and carrier cargo is sent according to the previously specified agreements between nations and airlines. Not all the air carriers carry mail cargo; the same fact true is for courier cargo too. In general, courier companies' arrange their own aircraft to transport their cargo from one station to another.

1 Passenger Cargo

Passenger cargo is received by the airline officials at their counters in the departure lounge. The luggage is X-rayed first. Passengers leave their luggage at the airline counters after getting it weighed and paying the EBR charge (only on excess baggage). When this is done, the official of the airline attaches a baggage identification tag to each and every piece of

luggage. The counterfoil of this baggage identification tag is attached to the air ticket to the passenger. For the sake of understanding of our valued readers, we are appending the scanned copy of an actual baggage identification tag that is handed over to the passenger.

2 Other Types of Cargo

Other types of cargo are sent directly to the cargo officials. The receipt point is clearly visible to all those who may be keen to send this type of cargo to other cities or countries. Such items are always accompanied by airway bills. These bills have to be cleared in advance by those who want to send these items by air. Note that transport by air is a costly affair; the only exception is books, which are transported (by air) at cheap rates. All other types of cargo, which are not accompanied by passengers also have baggage identification tags. These pieces of cargo are also weighed and thoroughly scanned lest they should contain dangerous or contraband items.

3 The Baggage Identification

The baggage identification tag specifies 6 categories of luggage damage/loss/spoilage in respect of that luggage that the passenger carries along with him in the cargo hold. These are—Fragile, Suitably packed, Perishable, Late Check-in, Not Permitted as Cabin Baggage and Damaged Specify. These classes are mentioned on the back of the baggage identification tag. The official of the airline marks one of the them and sends the baggage for loading. If the baggage is received as damaged, the official marks one of the 10 categories that mentions the status of the luggage. These categories are defined on the tag just below 6 categories described earlier. These are— Broken Handle, Broken Strap, Torn, Dent, Scratch, Top, Side, Bottom, End and other. The official marks one of these on the tag of the luggage as and when he examines the luggage. All the airlines bear limited liability in the context of theft, loss, breakage and damage to the luggage. They also specify that baggage identification tag is not a baggage ticket and that it has to pass through the formalities of customs at the destination airport. Now that the concept of luggage ticket has been described in Article 4 of the Warsaw Convention or the Warsaw Conventions amended by the Hague Convention (1955).

4. Packing and Hauling

Some type of packing may be necessary. Passengers and consignors are required to pack their goods in airworthy packages. Sensitive and fragile items may have to be repacked. The airline is not responsible for breakage of luggage while it is being handled.

Every airline has its own terminal for loading and unloading cargo. Normally these terminals are fixed. The officials of the airline spread along the length of the conveyor, which is a sophisticated automatic logistics system. It works with the help of electric power. When the passenger gives his luggage to the airline official at the counter of the airline (in the departure lounge). The official puts this luggage on an automatic conveyor belt. This belt takes the luggage to the conveyor system of that particular airline. The receipt terminal is located inside the airport premises (i.e. beyond the airport building, which cannot be accessed by passengers). At this terminal, the officials of airline are ready to receive each and every piece of luggage. They keep on lifting the luggage till the pieces of the same have been received.

5 The Cargo Hold

The airline staff are always on duty along the entire line of transport of cargo. They have a complete list of the luggage that the aircraft is supposed to carry. They use forklift trucks to pick the luggage. They can check the identification of the luggage at any point of time by reading its baggage identification tag. They can also read the bar code printed on it with the help of a bar code reader. This bar code is useful when the bag is lost; in such a case it can be easily identified and its flight details can be found out. Forklift trucks take the luggage to the aircraft. There, the luggage is loaded in the space in the lower part of its body. It is a large space that can accommodate large numbers of suitcases and bags. It is called Cargo Hold. All the loading procedures are automatic; in some cases, these may be semi-automatic.

Other types of cargo can be transported with the help of large delivery trucks. Many of these trucks are capable of moving containers and other bulky types of load. Finally the cargo hold is closed.

Check your progress

I Each answer should not exceed 50 words

- (a) IATA
- (b) Define MPM

II Each answer should not exceed 250 words

- (a) Brief about the ABC codes
- (b) Discuss about the agents involved in Air ticketing

III Each answer should not exceed 500 words

- (a) Explain in detail about the procedures involved in Air Ticketing

9.6 Let us sum up

The main function of a travel agent is to book the air tickets for the customer so that the objectives of the airline as well as those of the customer could be met. In this process, the travel agent earns a commission from the airline. If the travel agent is also planning the tour itinerary for his customer, he is entitled to get commission from the hotel or another travel agency that executes the tour of the customer at the tourist spot. But his commission on the airline ticket is paid by the airline. If he is a subagent, his commission is paid by the agent (PSA or GSA). Ticketing is, however, not an easy job as the range and diversity of international airfares is very complex and varied. All these topics are discussed in detail in this lesson.

LESSON 10

TOURISM PLANNING AND ADMINISTRATION IN INDIA

10.1 Learning Objectives

After reading this lesson, you will be able to

- ❖ understand how tourism planning is very essential for the development of tourism
- ❖ recognise the challenges faced by the tourism industry and understanding the carrying capacity of the destination
- ❖ realising the importance of sustainable development in tourism planning

Structure

10.1 Introduction

10.2 Tourism planning

10.3 Types of Tourism Planning

10.4 Preservation and Conservation of Heritage Environment

10.5 Environmental Policy for Tourists

10.6 Carrying Capacity

10.7 Sustainability

10.8 Coordination in Tourism Development

10.9 Let us sum up

10.10 Answers to check your progress

10.1 Introduction

In the field of tourism, the need for planned development is of paramount importance. Many countries in the world, especially the developing countries, have lately realised the importance of Tourism and the benefits which it brings out. The use of macroeconomic planning techniques for tourism sector are however relatively new. The planning methods for national

economic development which have been largely utilised since early fifties do not always cover tourism development as a particular field. The increasing significance of tourism as a source of income, employment generation, regional development and as a major factor in the balance of payments for many countries has been attracting increasing attention on the part of many governments as well as other with an interest in economic development. Thus, tourism development became more and more a particular field of research in the economic planning undertaken by many countries.

10.2 Tourism planning

Tourism planning is the process leading to tourism development as it is through the planning process that the set developmental goals are achieved. Tourism planning is also a tool for addressing the various choices associated with tourism development. It fosters achievements of tourism objectives and goals and also the assessment of tourism benefits and costs. Tourism development on the other hand is broader term which incorporates the planning, tourism infrastructure, management of tourism attractions and facilities and accommodation and transport services. Tourism planning is a continuous and long term process of preparing a destination for receiving tourists and also continuously upgrading and improving a destination's attractiveness for the tourists.

Community involvement in the entire process of tourism planning and development is crucial. In fact communities are the basic element of tourism. In recent times, communities have become conscious of their participation in the developmental process and have realized the need to be more Proactive and responsive in their approach to tourism. Tourism depends heavily upon the goodwill and acceptance of the local host communities. It is therefore necessary that planning must consider the desires and preferences of the local community whose participation is vital in tourism planning.

1. Levels of Tourism Planning

Tourism planning may be at:

- | | |
|---------------------|-------------------|
| 1. Individual level | 1. State-level |
| 2. Firm level | 2. National-level |

3. Industry level

3. Region-level

4. Economy as a whole.

10.3 Types of Tourism Planning

1.Spatial Tourism Planning

In this type of tourism planning, the space as well as the environment of the tourist spot is scrutinised for creating good-quality infrastructure and quantities at that spot. Example : Corbett National park (Uttaranchal).

2.Sectorial Tourism Planning

In this type of tourism planning, the region to be developed is divided into various broad sections, called Sectors. These sectors are allocated resources. Their social, economic and environmental needs are assessed. The final plan must take due care of these vital aspects. Industrialisation and urbanisation should not harm the people of that sector. The natural resources of each sector must be preserved and protected. These sectors must also coordinate with one another to achieve tourism synergy. Example : South-east Asia is a popular tourism sector of the world.

3. Integrated Tourism Planning

In this type of tourism planning, the sectors or parts of a tourists region are integrated so that the region becomes a hot destination. Example : Tourist spots of Mount Titlis, Lucern, Geneva and other parts of Switzerland are integrated. These have been developed to provide packages to tourists so that they could visit all these spots when they visit the Swiss Alps.

4. Complex Tourism Planning

When several regions are considered for the purpose of planning, it is called Complex Tourism Planning. These regions may be located far away from one another, so preset have to be developed on a comprehensive basis because the international tourist may be keen to visit all the tourist spots located in these regions. Example : Chaar Dham yatra from tourist spots in the Hindu Pantheon viz, Dwarka, Badrinath, Puri and Rameshwaram. These are located in

four different regions of India. The pilgrims visit all these spots of his religious devotion. He would leave no stone unturned to complete the tour. His problems and agencies must be mitigated through the activities of complex tourism planning

5. Centralised Tourism Planning

This type of planning is done by a single authority, usually the state or central government. It intervenes in the tourism planning takes of a tourists spot because no other (private) player comes forward. Moreover, the demand of resources (to execute the tourism plan) may not be available with a private sector firm. However, nowadays, centralised planning is losing its sheen because the government is decentralising or privatising the tourism industry as well as the hotel industry. Example : Renovation of the Red Fort for exposing more areas of its promise to tourists.

6. Decentralised Tourism Planning

This is currently in vogue. The parties, who are keen to develop a tourist spot, plan the execution of the activities of the spot. They take the assistance of the government as well as finance from the local, regional or national banks to do so. The government does not interfere in the planning and execution operations. But it gives support and money to such firms. The rates of taxation are less when the tourist spot is in its infancy stage. Later, when the tourist spot develops as a lucrative proposition, the government increases taxes and withdraws incentives or concessions. Example: The first private airport of India has been developed at Nedumbassary (TN) more are under process.

7. Urban and Rural Tourism Planning

This is a new concept in tourism planning. In urban tourism planning, the emphasis is on creation of modern infrastructure, state-of-the-art facilities and luxurious spots. Some basis facilities namely electricity, water, road, transport, communications, Internet, entertainment etc, are already available. Urban tourism planning exercises, consolidate these vital elements of the infrastructure.

Rural tourism planning became a rage during the last decade of the nineties when old havelis, buildings of the yore and village spot were converted into popular tourist destinations.

There were no facilities at these places and everything had to be built from scratch, except those representatives of a rich culture and history. Rambagh Palace (Jaipur), Lake Palace (Udaipur) and many other old buildings went converted into hotels and popular tourist spots. But these were far and few in number. The rural wetland of India has received the attention of tourism planners only during the recent times. Luxury hytels are not within the reach of every traveller but sarai, havelis and tourist resorts in villages certainty are. Thus, in order to develop rural tourist destinations, rural tourism planning is being done in India.

10.4 Preservation and Conservation of Heritage Environment

Dimensions

A High quality of environment is basic for tourism development. When hundreds of thousands of tourists visit a destination, their impact is bound to be felt on the host areas. The environment has to be examined in terms of its physical characteristics – vegetation, climate, soil fauna and flora and the dynamic of the relationships between these.

1. The key elements of environmental change connected with tourism development mainly focus on issues of land and landscape both in man-made or built and natural environment. These physical impacts tend to be most visually apparent because tourism development, like any other development activity, will certainly have impact on physical location to a certain extent wherever that location exists.
2. Mass movement of tourists may be responsible for both protecting as well as destroying the environment of a destination area.
3. A destination's environment in all its forms is a major motivating factor for the initial visitor interest in an host area. If there is any deterioration in the environment of a host area or if the quality of the environment is threatened by visitors or by tourist development itself, the very reason for tourism development may be defeated.
4. There has been a growing concern over the years regarding environmental protection and conservation. A growing concern for the protection of the environment and the individual's quality of life is being felt. It is within this context that the relationship between tourism and the environment has been receiving a growing level of attention from both the public and private sector organisations in various countries in the world.

5. Various international bodies have cooperated in the preparation of a host of studies, plans, programmes and activities on tourism and environment. At every leading platform where tourism is discussed, environmental protection receives attention.
6. The concern for environmental protection in the field of tourism can, however, be traced back to much earlier. The International Union of Official Travel Organisations (IUOTO), the predecessor of World Tourism Organisation (WTO), was one of the first organisations to come to the defense of environmental protection as early as 1950 having, as one of its main objectives, the study and development of natural tourist resources.
7. In the year 1954, the study of environmental questions became institutionalised in the activities of IUOTO and the protection of tourist heritage was included on the agenda of each IUOTO Assembly.
8. The tourism boom which characterised the 1960s as a result of the introduction of jet travel was also responsible for the advancements in the development of statistical measurements and evaluation of tourism.
9. More and more governments realising the importance of tourism to their country's economies started collecting and compiling the basis tourist statistics to determine the benefits and also to plan for future developments. Some evaluation studies of qualitative aspects of tourist movements were also undertaken.
10. Various surveys conducted showed that natural tourist resources were the primary factor that attracted tourists even in countries rich in cultural heritage. There were large movements from urban areas to beaches, mountains and other natural resources for rest and recreation.
11. The great increase in number of visitors to these areas resulted in rapid, unplanned construction of hotels and other dwellings for use of tourists and for migratory service employees. This unplanned growth threatened to destroy the very environment that was the tourist attraction in the first place. There appeared an environmental threat both aesthetic and ecological from overcrowding of particularly attractive areas.
12. The need for what began to be described as an 'integrated approach to the tourism development was felt by both governments, international agencies and the public in general.

13. Increased interest began to be generated in what was termed as the 'ecological impact of tourism.
14. Awareness and also the recognition of 'ecological threat' led IUOTO to recommend to world governments that they implement a resolution adopted in 1960 by its Fifteenth General Assembly in the following terms:
 - (a) "The General Assembly, considering that nature in its most noble and unchanging aspects constitutes and will continue increasingly in the future to constitute one of the essential elements of the national or world tourist heritage"
 - (b) "Believes that the time has come for it to deal with the problems raised by the dangers threatening certain aspects of nature..."
 - (c) "Decides consequently to recommend to all IUOTO member countries to exercise increased vigilance regarding the attacks made on their natural tourist resources.'

10.5 Environmental Policy for Tourists

Implementation of the above resolution required the adoption of a tourist environmental policy. A policy was set forth by IUOTO in a research paper entitled "Study on human environment" which was submitted to the Twenty-Second General Assembly held at Ankara, Turkey, in the year 1971. The Tourist Environmental policy had the following highlights

- (a) Recognition that protection of the environment, which is at the very basis of the development of tourism, has often been neglected in physical planning policies. This entailed promoting an awareness that the real interests of tourism did not lie in the immediate profitability of plan but in a rational utilisation of tourist natural resources which, far from damaging them would contribute to their development. Accordingly, it was seen as essential to base development policies on long term prospects and on the basic needs of tourists;
- (b) Recognition that as tourism was largely international nature offering the natural resources to individuals of another country for their cultural enrichment and well being the protection of the tourist capital was in the interest of everyone and must be dealt with at world level. Underlying this recommendation was an awareness that close international cooperation was necessary so that no region would be at a disadvantage as a result of having adopted high-quality environmental protection measures;

- (c) Recognition of a lack of uniformity in the way in which environmental protection was handled at national level. In many cases there were no provisions to ensure that tourism interests were represented within bodies with responsibility for the environment and physical planning. It was therefore seen as necessary to establish or strengthen collaboration between all bodies dealing with the problems of nature protection. The need was also seen to set up a special body at national level responsible for coordinating steps to protect nature, a proposal that was subsequently to be adopted by the United Nations Conference on the Human Environment at Stockholm ;

1. Inventory of Natural Tourist Resources

Central to such a policy was seen to be the establishment of an inventory of natural tourist resources with a view to identifying in particular

- (i) Protected areas or natural reserves where attempts at the very least should be made to conserve or re-establish the natural balance (national parks, forest reserves, etc.);
- (ii) Areas reserved primarily for tourism because of their natural attractions and from which industries would be excluded (beaches, mountain resorts, etc.
- (iii) Mixed natural areas in which the establishment of industry must be so planned as to safeguard the main tourist resources.

Implicit in the above policy directives was the concept of classification or zoning, whereby areas with a particularly sensitive or fragile environment would not be developed for tourism or at least where tourism access would not be 'severely restricted '. In areas where tourism development was to be permitted on a larger scale, planning measures were seen as essential if the growth of tourism itself were not to produce adverse environmental effects; the pollution of bathing water, for example. Legislation was seen as playing a key role in the implementation to the tourist environmental policy. It was needed not only in national parks or nature reserves but also in tourist areas in general so as to prevent anarchic construction of dwellings, dirty camping grounds or beaches, forest fire or the proliferation of advertising hoardings outside of towns.

2. Guidelines for Environment Protection

The establishment of guidelines for the development of new tourist resorts was a key feature of the new tourist environment policy. It suggested that new developments should conform to a definite plan drawn up by a multidisciplinary team of experts in legislation, tourism and ecology. According to these guidelines,

1. If the conception of the plan was the responsibility of regional or local authorities, account should be taken of the developments in neighboring areas or localities so as to achieve coordination of measures necessary to protect natural surroundings
2. It was also considered desirable to establish suitable reception capacity at the resort in order to plan the communication and transport infrastructure and the distribution of areas for building a recreational plant thus avoiding traffic problems, air pollution and noise congestion, etc.
3. Architecture and the general aspect of buildings and the location of sports facilities or camping sites should be so designed as to ensure harmony with natural surroundings and vegetation.
4. For planning parks, forests or even the countryside, the competent authorities should also ensure that ecological principles were applied and prevent the destruction of trees, flora and fauna by determining the areas to be set aside for the construction of buildings and by creating paths and other means of access which were not harmful to the beauty of the sites.
5. The pollution of water and beaches was recognised as a serious threat to main tourist areas and it was recommended that specific measure be taken to limit or prevent these effects.

3. UN Conference

The United Nations some years back organised a conference in Stockholm on Human Environment. This conference symbolised the growing importance that the people of the world attach to maintaining and improving the quality of human life and to enrich the human environment. It is a fact that, all over the world, man has been using natural resources without

any thought of the future. It is the wrong use of these resources which causes problems. Today environmental pollution poses a serious threat to life on earth and this is true not only of the areas where there is a great concentration of industries but also where there is a great concentration of tourists.

4. Nation of Maitres D' Hotel

The negative impacts of haphazard and unplanned development of tourism are well illustrated by many areas in North America and Western Europe and also to a greater or lesser extent throughout large parts of Asia's tourism circuit. Yugoslavia's Adriatic coast and the Seychelles are other examples. Many of the beaches of North America and Western Europe bear a mute testimony to the havoc that can be wrought by uncontrolled development of tourism. Destinations once noted for their particular character are reduced to unattractive showpieces as many countries endeavor to keep pace with the visitor inflow. Despite a measure of governmental control during the development the great increase in number of visitors to these areas resulted in rapid, unplanned construction of hotels and dwellings for tourists and for migratory service employees. These expansions threatened to destroy the very environment that is the tourist attraction. A prominent leader in the Seychelles objected to seeing his country become a "nation of maitres d' hotel". These examples underline environmental threat, both aesthetic and biological, from overcrowding of particularly attractive areas.

5. Resource Exploitation

Tourism development brings in special ecological problems not encountered in other types of economic activity. The environmental resources 'exploited' for tourism attract tourists because of their outstanding beauty, recreational possibilities or educational and cultural interest. The modern tourism's most paradoxical trait is its capacity to destroy those attributes which attracted the visitor in the first place.

6. Environmental Amenities

The environmental amenities which attract tourists have tended to be taken for granted. Preservation of their quality has only recently begun to concern tourism development planner. For tourism the quality of the environment is the basis for attracting visitors and needs to be

conserved. Tourism development can become a positive factor for improving the environment, if certain amount of intelligent basic planning is done. In fact the quality of the tourism product depends upon a high quality natural environment.

7. Contribution of Tourism in Preservation

It has been seen that major social benefits accrue to tourists themselves. But tourism also has valuable spillover benefits for tourist receiving countries. Notable among these is the contribution of tourism to the preservation of historic sites and cultural values. Careful cleaning and beautifying ancient monuments, clearing the areas around the monuments and improving them, for tourism purposes is a case in point. Through tourism development, the environment is not degraded but in fact can be improved. So great has been the national and international demand for tourism and recreational facilities that government have increasingly to face up to the choice between extending public access and availability of sites, and conservation and protection against over-development.

Governments are increasingly aware that future growth of the industry will necessitate careful management and avoiding over development of regions of natural beauty. Moreover, saturation in principal destination areas will require a more active policy of diversification and redistribution of tourist flow.

8. Regional Planning Considerations

The potential of a region for tourism may be so great that its development will be central to economic goals and plans. However, regional planning for tourism more often will be considered as a separate and distinct planning effort, aimed primarily at determining the best location of facilities like hotels, resort facilities and transportation networks. Such planning views tourism primarily as a source of foreign exchange earnings. This approach would recommend development to accommodate maximum possible number of projected visitors and to design facilities to generate the maximum possible spending by the tourists. However, this approach of profit maximising in tourism development can result in deterioration of fragile environment and attractive landscapes through over-building and excessive number of visitors. The aim is conserving the environment amenities of a region and advancing regional

development through interdependence. The more the local people benefit from tourism the more they will benefit from a commitment to preserve the environmental features which attract tourism. Consideration of the region's ecological characteristics are essential to providing adequate criteria for the development of facilities and viable plans for the use and management of resources for tourism.

10.6 Carrying Capacity

Carrying capacity is closely linked with environment. Every tourist region has a carrying capacity for tourists as well as for any other type of use. This capacity varies with the fragility of the area concerned and the nature of the tourist activity contemplated. For example, an island rainforest is a very fragile environment which could be easily endangered by excessive number of tourists using it. By contrast, a recreational beach is not easily damaged by large number of tourists. Planning facilities for tourist development in the case of the island rainforest would require limitations on hotel and similar other installations in order not to encourage excessive number of tourists. In the second case that of recreational beach, high density accommodation and other installations for tourism might well be tolerated carrying capacity of a place or a region may however alter or change over time. Technological advances for instance may increase the amount of sewage which may be treated properly, thereby increasing the carrying capacity. Similarly improvements in infrastructure designs and developments, modes of transports etc. may also increase carrying capacity over time. An important point to recognise, however, is that the overall carrying capacity of a destination is often determined by just one factor. This one factor becomes the limiting factor beyond which carrying capacity cannot be altered or changed. For example there may be enough hotel rooms to cater for, say, 10,000 tourists per night, but if the sewage system is meant to cope with only 5,000 tourist per night, in that case carrying capacity will be 5,000 tourists

1. Definitions

1. "Carrying capacity can be defined as the maximum number of people who can use a site without an unacceptable alteration in the physical environment and without an unacceptable decline in the quality of experience gained by visitors." Matheson and Wall, *Tourism: Economic, and Social Physical Impact*,

2. "The concept of maintaining a level of development and use that will not result in serious environmental deterioration, socio-cultural or economic problems, or be perceived by tourists as depreciating their enjoyment and appreciation of the area. "WTO, National and Regional Tourism Planning."
3. "That level of tourist presence which creates impacts on the host community, environment and economy that are acceptable to both tourists and hosts, and sustainable over future time periods." Cooper et al, Tourism Principles and Practice.

2. Type of carrying capacity

1. Physical/'Ecological

- (a) Acceptable levels of visual impact and congestion.
- (b) Point at which ecological systems are maintained before damage occurs.
- (c) Conservation of wildlife and natural vegetation of both the land and marine environments.
- (d) Acceptable levels of air; water and noise pollution.

2. Economic

- (a) Extent of tourism that provides optimum overall economic benefits without economic distortions or inflation.
- (b) Level of tourism employment suited to the local community.

3. Socio-cultural

- (a) Extent of tourism development that can be absorbed without detriment to the life styles and activities of the local community.
- (b) Level of tourism that will help maintain historic and cultural monuments, arts, crafts, belief systems, customs and traditions without detrimental effects.

4. Infrastructure

- (a) Adequate availability of transportation facilities and services.
- (b) Adequate availability of utility facilities and services of water supply, electric power, sewage and solid waste disposal and telecommunication..

- (c) Adequate availability of other community facilities and services such as those related to health, and safety, and of housing for employees in tourism sector.

5. Psychological

Crowding and the psychological impact of being with too many other people for comfort/enjoyment.

3. Factors affecting carrying capacity

Major factors usually include:

1. Alien Factors

- (a) The volume and characteristic of the tourist ; mass tourism will have a greater impact than independent/explorer type tourism.
- (b) The length of stay.
- (c) Geographical concentration of visitors.
- (d) The degree of seasonality.
- (e) The type of tourism activity.
- (f) Educational level, purpose of visit, age of visitors, etc will all affect the impact. This is very closely linked to the volume and characteristics of the tourism.
- (g) The degree of exposure to other forces of technological, social and economic change e.g. the effect of television, may have a greater than tourism.

2. Local Factors

- (a) The fragility of the local environment: sand dunes, marine environment etc. are more fragile than Trafalgar Square in London or Wall Street in New York.
- (b) The social structure of the host economy: the more developed a country is, the less vulnerable to the influence of the tourist.
- (c) The economic structure: developing countries are less likely to be able to reap the same benefits as a developed country due to the fact that are likely to have to import more

goods to cater for the needs of the tourist because these are not produced locally. They may also be dependent on foreign investment for development the profits generated from these development will be repatriated (or at least some will be).

- (d) The political structure: government may encourage or discourage tourism. This will be reflected in the resources and support made available to cope with the impact of tourism.
- (e) Availability of local resources: the greater the local resources, the lower will be the need for imports and the greater the benefit for the local community. Natural resources will also serve as an attraction for tourists.
- (f) The policies adopted with regard to tourist dispersal.

3. Combined Factors

- (a) The difference between the tourist and host: the greater the difference the greater the impact. This applies to both differences in wealth and differences in culture.
- (b) The amount of contact: fleeting contact will be less likely to allow hosts/tourist to learn about the other's culture. Segregation of the tourist reduces what is called the demonstration effect'.

10.7 Sustainability

The term sustainability is linked very closely to carrying capacity. Both are related to the concept of maintaining a level of tourism which does not cause irreversible damage and which allows tourism in a given destination to continue into the future. What has happened in a lot of cases, and the south coast of Spain is a good example, is that tourism grew too fast and growth was uncontrolled. Resorts became too crowded. They became less popular/fashionable and the number of tourists had fallen off.

Definition

According to the WTO the term sustainability may be defined as:

“The underlying approach now applied to tourism planning, as well as to other types of development, is that of achieving sustainable development.”

1.The Sustainable Development Approach

It implies that the natural, cultural and other resources of tourism are conserved for continuous use in the future, while still bringing benefits to the present society. The concept of sustainable development has received much emphasis internationally since the early 1980's, although tourism plans prepared even before that period often were concerned with conservation to tourism resources.

“The sustainable development approach to planning tourism is acutely important because most tourism development depends on attractions and activities related to the natural environment historic heritage and cultural patterns of areas. If these resources are degraded or destroyed, then the tourism areas cannot attract tourists and tourism will not be successful. More generally, most tourists seek destinations that have a high level of environmental quality- they like to visit places that are attractive, clean and neither polluted nor congested. It is also essential that residents of the tourism area should not have to suffer from a deteriorated environment and social problems.”

2. Coordinated Approach

Because of the nature of the tourism industry, i.e. it is fragmented with many players, problems have arisen because of conflicting interests. Venice is a good example of where coordinated overall planning has proved difficult. There is no one government department that has responsibility for planning and conflicts have arisen between the needs of the locals and the needs of the tourists. Everyone should take responsibility for achieving sustainable development Government is usually involved, for instance in terms of granting planning permission. Developers are involved, but do not always have long-term objectives, particularly if they come from outside the community in which the development is taking place. The local community have a vested interest in ensuring that their “home” is not spoilt, but often there are conflicts between hotel owners (or any who benefit from tourism) and those who only “suffer” the tourists (eg. traffic jams etc). Tour operators and travel agents have started to take a more responsible stance in their brochures they try and “educate” the tourists to be more aware of local customs involved.

3. Archaeological Sites and Wildlife

Tourism has the greatest need to protect the environment of the places of natural and cultural importance be it a monument, a beach resort, national park, recreational area or a wildlife sanctuary. The planners must consider the environmental process wherever large investment are made in tourism development. The tourist has a strong desire to see and experience places of wonder and beauty in areas where nature remains essentially unspoiled. Destinations noted for their particular character and beauty should not be reduced to innocuous urban jungles in order to keep pace with the visitor inflow. Wildlife which is deteriorating and vanishing so rapidly can be safeguarded. The environment in which various animals live can be properly preserved. Similarly, many other tourist areas can be safeguarded against forces which are responsible for their degeneration. Tourism must be used as a positive factor in environmental improvement.

4. Area Development

Area development and physical planning are therefore very essential for environmental improvement. Tourism development can become a positive factor for improving the environment if a certain amount of basis planning and aesthetics are applied in the entire process. Whenever there is any major tourism development, environment planning should be made part of that development. Any development without some controls, without any thought given to the environmental factors can, in fact, prove to be disastrous and ultimately will be counter-productive for tourism itself.

10.8 Coordination in Tourism Development

As many agencies are involved in tourism development, coordination is therefore very necessary among various segments responsible for environmental development and improvement. With a view to preserving the unique character, atmosphere and natural setting of monuments and other places of tourist interest, a coordinated approach needs to be evolved to exercise environmental control of tourist centers.

1. Conservation Policy

The UN Conference

The United Nations Conference on the Human Environment, held a few years back in Stockholm recommended evolving a conservation policy within the framework of the resolution of the World Cultural Heritage'. There was a unanimity of opinion that something radical had to be done to save the quality of human life and to enrich human environment. The conference was of the opinion that any development scheme of the particular area should be determined by the absorption capacity of the area, otherwise the environment would deteriorate and may in the long run create more complication than actually serve the purpose. This is true in the case of development of monuments, new tourist areas and resort towns.

2. Science and Ecology

A concept of conservation is that of science and ecology. The premise is that of man-environment balance. The only way of striking this balance is to define conservation as protection of natural resources. Conservation means the exercise of rigid controls to prevent habitat destruction, habitat homogenisation, reduction of species and natural resource pollution. Conservation, in the sense of preservation of the cultural heritage is popularly supported today. Many man-made artefacts have a scarcity value that becomes as important to society's well-being as do the natural resources. Therefore, conservation means their protection, restoration and interpretation.

3. Organisations from Various Sectors

The relationship between tourism and the environment has been receiving a growing level of attention from both public and private sector organisation all over the world. During the last decade various international bodies have cooperated in the production of great number of studies, programmes, plans and activities on tourism and environment. The degree of importance of the relationship between tourism and environment is cited in the Manila Declaration during World Tourism Conference held in Manila in October 1980. The Declaration states:

"Tourism resources available in various countries consist, at the same time, of space, facilities and values. These are resources whose use cannot be left uncontrolled without running

the risk of their deterioration, or even destruction. The satisfaction of tourism requirements must not be prejudicial to the social and economic interests of the population in tourist areas, to the fundamental attraction of tourism, and historical and cultural sites. All tourism resources are part of the natural heritage of mankind. National communities and the entire international community must take the necessary steps to ensure their preservation. The conservation of historical, cultural and religious sites represents at all times, and notably in time of conflict, one of the fundamental responsibilities of states.” The importance of the relationship between tourism and the environment is also stressed in the letters of agreement exchanged between the United Nations Environment programme (UNEP) and the World Tourism Organisation. The letters of agreement state: “The protection, development and improvement of the various constituents of the environment of man are among the basic conditions for the harmonious development of tourism. Similarly, intelligent tourism management can contribute in large measure to the protection and development of the physical environment and cultural heritage of mankind as well as the improvement of the quality human life. It is, therefore, advisable that tourism development and sound environmental management should be integral concerns of national development policies.

4. WTO Environmental Committee

The growing importance of this subject of tourism's impact on the environment led the WTO Executive Council to form the Environment Committee. This committee in its first meeting at Madrid attempted to define the relationship between tourism and the environment, and formulate guidelines and activities to be implemented by the World Tourism Organisation in the future in the areas of the environment. Much of the discussion of the Environment Committee Meeting centered on the theme “Tourism Development and its Effects on the Environment.”

5. Development Aspects

Tourism development can bring positive results to the countries that succeed in establishing an effective programme. It is important that the damage which can be done to the environment through a misuse of natural and cultural resources be avoided through the implementation of proper policies. Possible negative effects could then be checked such as: ecological deterioration in areas of good environmental quality, especially in mountain and coastal regions and in areas

surrounding places of historical, architectural or artistic interest; speculative pressure on special sectors with the ensuing destruction of the landscape and wastage of natural environment, destruction of the traditional values of the domestic architecture and deterioration in the latter when the human dimensions of existing localities are exceeded; saturation and overcrowding of the urban microcosm with consequent deterioration in the quality of the environment in these areas. Various positive steps have been taken with a view to preserve the natural environment.

6. Aspects Receiving WTO Attention

- (a) Creation of natural reserves and national parks
- (b) Preservation of historical towns
- (c) Alignment roads and highways so as to minimise environmental nuisance (d) Restrictions on the encroachment of the town into the countryside
- (e) Zoning of industry
- (f) Restrictions on dumping at sea, in land and in fresh water of household or industrial residues.

7. Goals of Environment Committee

The Environment Committee has adopted the following goals:

- (a) To identify clusters of closely related touristic environmental issues including carrying capacity, ecosystem solvency, protection of cultural elements, protection of the built environment.
- (b) To systematize field information.
- (c) To define ways to involve tourists in the preservation of the environment.
- (d) To develop and disseminate guidelines for use by governments in assessing, controlling and minimising adverse environmental effects in tourist activities.

8. Recommendations

In order to achieve the above mentioned goal, the Environment Committee recommended a programme of work that includes

1. The evaluation and updating of existing studies and methodology;
2. The general understanding of touristic environmental problems
3. Cooperation between public and private institutions at the national and international levels aimed at developing touristic environmental guidelines and standards
4. Action by WTO and other international organisations to apply guidelines.

Check your progress

I Each answer should not exceed 50 words

- (a) Define Tourism Planning
- (b) Define carrying capacity
- (c) Define sustainability

II Each answer should not exceed 250 words

- (a) What are the types of carrying capacity
- (b) State and explain the UN conference on Conservation

III Each answer should not exceed 500 words

- (a) Explain in detail about the levels and types of Tourism Planning
- (b) List and explain the challenges in sustainability

10.9 Let us sum up

Through the process of tourism planning the developmental goals are achieved. Tourism planning is also a tool for addressing the various choices associated with tourism development. Every tourist destination has a carrying capacity for tourists as well as for any other type of use. Hence it implies that the natural, cultural and other resources of tourism are conserved for continuous use in the future, while still bringing benefits to the present society. The concept of sustainable development has received much emphasis internationally since the early 1980's, although tourism plans prepared even before that period often were concerned with conservation to tourism resources. In this lesson the core concept of tourism planning, carrying capacity and sustainable development are summarised.

LESSON 11

GOVERNMENT DEPARTMENTS AND NON-GOVERNMENTAL AGENCIES

11.1 Learning Objectives

After reading this lesson, you will be able to

- ❖ Understand the role of public sectors and private sectors in promoting tourism

Structure

11.1 Introduction

11.2 Board of Directors

11.3 Government Organisations

11.4 Non-Governmental Organisations in Tourism

11.5 Let us sum up

11.6 Answers to check your progress

11.1 Introduction

India Tourism Development Corporation (ITDC)

Established on October 1, 1966 India Tourism Development Corporation has been the prime mover in the progressive development and expansion of tourism infrastructure in the country. As a commercial organization in the public sector, ITDC has been playing a crucial and strategic role in ensuring proper dispersal of socio-economic benefits of tourism, promoting national integration and international understanding, helping removal of regional imbalances, generating employment opportunities, augmenting foreign exchange earnings and also acting as a catalyst in the development of tourism in the country.

11.2 .Board of Directors

The ITDC Board consists of Directors including the Chairman-Cum-Managing Director.

Organisational Structure

The organisational set up at the Corporate level comprises number of functional Divisions each headed either by a Senior Vice-President or Vice-President. There are four regional offices at New Delhi, Bombay, Madras and Calcutta.

1.Subsidiary Companies

Presently, ITDC is having six subsidiary companies

Assam Ashok Hotel Corporation Ltd

Ranchi Ashok Bihar Hotel Corporation Ltd

Utkal Ashok Hotel Corporation Ltd

Madhya Pradesh Ashok Hotel Corporation Ltd

Pondicherry Ashok Hotel Corporation Ltd

Donyi Polo Ashok Hotel Corporation Ltd

Each of the above subsidiary companies has initially undertaken construction of a joint venture hotel project in the respective state.

In association with ITDC, Shri Mata Vaishno Devi Shrine Board has set up a Fast Food Restaurant at Jaikaaraa Ashok at Shri Mata Vaishno Devi Shrine.

The Corporation has recently signed to Promoters Agreements for setting up a Resort Hotel Project at Pahalgam in Collaboration with Jammu and Kashmir State Tourism Development Corporation Ltd. and a Joint venture hotel project at Chandigarh in collaboration with Punjab Tourism Development Corporation Ltd.

2. Consultancy and Management Services - Aboard

With the phenomenal success of the first joint venture speciality Indian cuisine restaurant at Moscow, the expertise of ITDC has been recognised abroad. A series of enquires for setting

up hotels and Indian cuisine restaurants, in association with ITDC, have been received from various countries.

The Corporation has entered into collaboration agreements with private companies incorporated in respective countries for setting up a 160-room, 4 start hotel at wellington, New Zealand; an Indian cuisine restaurant at Wellington, New Zealand and an Indian cuisine restaurant at San Francisco, USA.

The Corporation has signed a Memorandum of Understanding with a Foreign party for setting up an Indian cuisine restaurant at Los Angeles, USA and also a Protocol with Soviet authorities for taking over Jaltarang restaurant and running it as an Indian cuisine restaurant at Moscow, USSR. Further proposals are for having a hotel at Moscow and an Indian cuisine restaurant each at Talin and Samarkand in USSR.

3.Consultancy and Management Services in India

At home front there is a marked increase in the demand ITDC consultancy services. The consultancy assignments related to the preparation of techno-economic feasibility report for private sector hotel projects; master plan for development of tourism and technical services for state-owned hotel and youth hostels.

The consultancy assignments include preparation of feasibility report for health resort, hotel projects, tourist lodge preparation of master plans for development of tourism tourist survey of hilly areas; technical services for private sector family beach resort; hotel projects, youth hostel; and fast food restaurants.

The corporation is presently providing marketing and managerial services to private sector hotels, state-owned hotels and restaurant. The corporation is also providing professional support and guidance to Tourist Complexes.

4. Promotion of Domestic Tourism

The corporation continues its efforts to promote domestic tourism through attractive packages. The various packages offered during the year include, students Package, LTC

Package, Senior Citizens Package, Weekend Package, You and Me Package, Youth Package, etc.

5.Food Festivals

The Corporation continues to popularise Indian cuisine and cultural heritage by Organising food-cum cultural festivals within the country.

6. Human Resource Development

The Ashok Training centre made a modest beginning in the area of Workers Education Programme by conducting courses on productivity, code of discipline, work ethics, motivation, industrial relations, health and safety, family welfare etc.

The Ashok Training Centre has conducted programmes for non-executives and for executive and on quality circles.

7.Network of ITDC Services

The present network of ITDC services consists of Ashok Group Hotels (including beach resorts, joint venture hotels, forest lodge), travellers lodge, restaurants including airport restaurants, fast food restaurants at Shri Mata Vaishno Devi Shrine and one joint venture Indian cuisine restaurant at Moscow, Ashok Travel and Tours units, Tourist Service Station, Duty/Tax free shops, and Sound and Light shows. The corporation is also handling catering services in New Delhi at Western Court, Ashok Mayur Restaurant at Vigyan Bhawan and the State Guest House and Hospitality Centre at Hyderabad House besides providing managerial services to three state owned hotels and private sector hotels.

8.Measures for Conservation of Energy

The corporation continued earnest efforts to conserve energy in hotels and other establishments. The various steps taken in this regard include, economical use of energy in all operational services and areas; effective maintenance and up-keep of service equipment and machines for preventing loss of energy and improving their efficiency; identifying and replacing out-dated equipments with modern energy saving machines; and use of non-conventional sources of energy like installation of solar hot water system etc, in ITDC hotels.

11.3 Government Organisations

1. Ministry of Tourism

The basic tasks of the Ministry of Tourism are to undertake promotional activities in the field of tourism - both international and domestic, to develop tourism infrastructure. These functions involve the dissemination of tourist information, development of tourist facilities, and regulation of the activities of various segments, such as hotels, travel agents, transport operators, wildlife outfitters, guides, etc. Other important functions are to project India's image abroad through publicity media such as advertising in print, TV/video, production of tourist publicity literature including posters, and maps, films, studio-visuals, putting up of cultural presentations, participation in trade fairs and exhibitions and the like.

The highlights of promotional activities undertaken overseas are:

1. Extensive electronic campaigns are launched in the major tourist generating markets of USA, UK, Europe, West Asia, Japan, Australia and South-East Asia. These are backed by print media campaigns aimed at product marketing.
2. Support is extended to wholesaler and tour operators overseas for launching new India programmes in the major markets.
3. Agreements are signed with international airlines for special India promotions to be launched abroad.
4. The Ministry also launches a massive campaign in the United states in cooperation with TWA (Trans-World Airlines) Gateway Holidays.
5. An "Affordable India" campaign has been launched in Europe to generate off peak seasonal traffic.

The important activities undertaken for infrastructure building are:

1. Wildlife Tourism
2. Yatri Niwas
3. Social Tourism
4. Adventure and Sports Tourism

5. Mountain Resorts and Winter Sports
6. Transport at Selected Centres
7. Floodlighting/SEL Shows
8. Infrastructure Development at Tourist Centre
9. Cultural Tourism, Beach Tourism
10. Development of Andaman and Lakshadweep
11. Golf Courses
12. Tourism Planning at Selected Buddhist Sites
13. Setting up of Taj National Park

The integrated development of tourism at national and international levels is achieved through the activities of:

1. Department of Tourism
2. National Council for Hotel Management and Catering Technology, and the Institutes of Hotel Management and Food craft Institutes
3. Indian Institute of Tourism and Travel Management

2. India Tourism Development Corporation Limited

Besides promotional activities, the Ministry of Tourism is also involved in the task of developing tourist infrastructure by providing budget accommodation, wayside facilities, and development of specified tourist centres. The government has given high priority to development of human resources for hotel-catering industry on the one hand and tourism and travel industry on the other as an important aspect of infrastructure building.

3. Department of Tourism (DoT)

The Department of Tourism is responsible for the promotion of India as a tourist destination and development of tourism infrastructure facilities in the country. It also performs regulatory functions in the field of tourism.

a. Activities

The activities of the department include:

Promotional : It carries out extensive publicity and promotion campaigns through its tourist offices located in the major tourist generating markets of the world viz., USA, Canada, UK, Western Europe, Australia, South East Asia, Japan and West Asia.

Development : Various schemes under successive plans have been formulated and implemented for domestic and cultural tourism, development of supplementary accommodation, promotion of wildlife tourism, sports tourism, social tourism, mountains and beach resorts, promotion of fairs and festivals, grant of interest differential subsidies for hostels, grant of loans for tourist transport operators, leisure tourism and development of travel circuits. It also assists the State governments, State Tourism Development Corporations and other agencies for the implementations of various schemes under Five Year Plans.

Regulatory : It exercises the functions of laying down norms and conditions for the operation of hotels, travel agencies, tour operators and tourist transport operators and maintains approved lists of these agencies.

b. Significant Events

The conference division handles international training, bilateral relations international cooperation and international conferences.

The department was represented in the Tourism Promotional Seminars in Spain, France, Saudi Arabia, UAE, Oman, Qatar, Germany, Austria and Denmark.

c. Conferences

In the international conference field, the Nodal Ministry's clearance and clearance of Home and External Affairs Ministries are arranged for various conferences.

4. India Convention Promotion Bureau

In the last decade, an important component has emerged to the tourism scenario, i.e., convention and conference traffic. The benefits of holding of conventions in the country are

manifold, besides earning valuable foreign exchange. By holding the conference they give the national members of that particular conference an exposure to international views and news regarding their particular area of specialization. In India, the conference traffic has increased steadily during the last few years. In order to promote conference traffic to India, the travel trade has set up India Convention Promotion Bureau (ICPB). The membership of ICPB comprises the Department of Tourism, national air carriers, hoteliers, travel agencies, tour operators, international congress sectors, state tourism development corporations, airport authorities and other segments connected with travel trade. ICPB has got the approval of International Congress and Convention Association which will help in obtaining more conferences and conventions to India.

5 International Bilateral Relations

The department had negotiations with various foreign countries under the Cultural Exchange Programmes. This Division has also handled tourism cooperation with the member-countries of SAARC and the implementation of greater cooperation in tourism between the member-countries by means of fiscal and physical incentives.

6 Japanese Assistance to Buddhist Heritage Sites

Sites associated with the life of Lord Buddha are situated in areas of Bihar and UP which were once rich in resource and development. These areas are now some of the most backward and undeveloped areas in India. With a view to developing Buddhist pilgrims the central and state governments would undertake landscaping of the area, strengthen the road, rail and communication systems, build wayside amenities and hotels to suit both the pilgrim traffic and also the up market traffic from Japan, Thailand, etc.

National Parks

The US National Parks have also shown interest in preserving and the improvement of heritage sites in India.

7 INDO-German Cooperation

Germany is one of the largest producers of tourists to India. Additionally the per-capita expenditure on German tourists on overseas travel is the highest in the world. It has been

recognised of late that there is considerable scope for promoting in-bound tourism from Germany to India.

8. Organisation and Functions

The major activities fall under the following broad heads:

1. Promotion and publicity at home and abroad with the object of promoting travel to and within India;
2. Compilation, collection and dissemination of tourist information in India and abroad and attending to enquiries from international tourists and travel agents, airlines, steamship companies, tour operators and hotels
3. Facilitation work, such as simplification of frontier formalities in respect of international tourists
4. Cooperation with international travel and tourist organisations at government and non-government levels
5. Development of tourist facilities and infrastructure at places of interest to international and domestic tourists
6. Regulation of activities of the various segments of the travel trade, such as hotels, travel agents, tour operators, wildlife outfitters, guides, tourist car operators and shopkeepers catering to tourists' needs.
7. Compilation of statistics, conducting and commissioning market research and surveys

9 Regional Offices

Within India

The tourist offices in India and abroad disseminate information regarding tourism infrastructure in India. These offices maintain liaison with the state governments, state tourism corporations and also help the Ministry in exercising control over different segments of the travel trade to ensure that services to tourists are maintained at the national/ international level and are available at reasonable rates.

10.Overseas

A highly competitive market situation continues to prevail amongst the countries of the world who wish to attract affluent tourists from the developed world. Given the prevailing scenario the existence of the overseas tourist offices has acquired considerable importance. These offices are the Ministry's outposts in the traffic generating markets of the world and their prime function is to create an awareness of India as an important/attractive tourist destination. Tourist offices in India and abroad handle tourist enquiries, disseminate tourist information, undertake promotion by means of advertising and publicity, maintain liaison with travel trade and press. The main function of tourism offices abroad is to counter the adverse coverage by foreign media in respect of various events taking place in India. With the objective of achieving optimum impact the government and Air-India under the Operation Schemes are engaged in joint promotional efforts in Europe, UK, America, East Asia, West Asia and Australia through tourist offices located in various parts of the world.

11.Vigilance

The Vigilance Cell is headed by Chief Vigilance Officer of the rank of Joint secretary/ Deputy C.V.O of the rank of Deputy Secretary and Confidential Assistant. With this set up, every possible effort is being made to look into the complaints and get them processed/ investigated promptly.

12.O & M

Concerted efforts have been made to improve the working environment in the offices with a view to bring in efficiency in the administration.

13.Tourist Publicity Literature

Under its production programme, it has brought out a range of publicity material including shell folders on adventure, wildlife, South India, Agra and Rajasthan, tourist map of India and city maps of Delhi, Bombay and Agra and trekking maps of Himalayas. It also produced a general India brochure and those on various states and tourist destination in India.

14.Films

The Department also produces a number of films.

15.Promotion of Domestic Tourism

It launches major campaign on "Tourism Environment / Awareness". These campaign are being released in all leading magazines across the country in Hindi, English and other Indian languages. The theme of the campaigns are "We can and we will keep India beautiful". Besides, the department also launches advertising campaigns to promote lesser known hill resorts called "Holiday Campaign"; to promote Orissa and a campaign to promote Andaman and Nicobar and Lakshadweep Islands.

16.Surajkund mela

Publicity material for this Mela, which is held at Surajkund each year in February from 1st to 15th is prepared.

11.4 Non-Governmental Organisations in Tourism

In the field of tourism, organisations emerged with the objective of developing and promoting the subject of tourism. The international organisations in particular have played a key role in strengthening tourism by way of combined efforts and therefore their role is of vital importance. The increasingly international character of modern tourism and the growing influence of international agencies in various fields are reflected in the growth and development of international cooperation and organisation in tourism. Organisers and the providers of various tourist services whether in the government, private or public sector come together at various forums at the international level to discuss and share common problems and arrive at certain conclusions. providers of tourist services sometimes meet as individuals or as individual firms, but more often when their national sectoral organisation is a member of a particular international body which has been set up for general or specific purposes.

Various international organisations in the field of tourism are operating today. Some of these organisations are specifically concerned with the development and promotion of tourism at the international level while others deal with the development and promotion of tourism in a

particular region. There are other international organisations which do not concern themselves specifically with tourism but with factors indirectly connected with tourism like airlines, travel agents and the hoteliers.

1. The Role of Private sector

Tourism has emerged as the largest export industry globally and all over the globe private sector has played the lead role in this growth. The private sector has to consider investment in tourism from a long term perspective and create the required facilities including accommodation, time share, restaurants, entertainment facilities, shopping complexes etc. in areas identified for tourism development. Non-core activities in all airports, major stations and interstate bus terminus such as cleanliness and maintenance, luggage transportation, vehicles parking facilities etc. should be opened up to private operators to increase efficiency and profitability. The specific role of the private sector includes:

- Build and manage the required tourist facilities in all places of tourist interest.
- Assume collective responsibility for laying down industry standards, ethics and fair practices.
- Ensure preservation and protection of tourist attractions and give lead in green practices.
- Sponsor maintenance of monuments, museums and parks and provision of public conveniences and facilities.
- Involve the local community in tourism projects and ensure that the benefits of tourism accrue to them in right measure.
- Undertake industry training and man-power development to achieve excellence in quality of services.
- Participate in the preparation of investment guidelines and marketing strategies and assist in database creation and research.
- Facilitate safety and security of tourists. Endeavour to promote tourism on a sustained and long term perspective.
- Collaborate with government in the promotion and marketing of destinations.

2. Global Tourism Promotion Agencies

Tourism and travel has become an international activity which is pursued by a large number of people worldwide. Thus, International organizations were formed and today numerous organizations are in the fray to guide and shape the tourism and travel industry. While some of the international organizations are specifically concerned with the development and promotion of tourism, others deal with areas like airlines, travel agents and hotels. The first association in the field of tourism was formed in the year 1908. It was under the initiatives of three countries – France, Spain and Portugal that the “Franco-Hispano-Portuguese Federation of Tourist Association” was formed. In the year 1924, the International Union of Official Organizations for Tourist Propaganda was formed and it is considered as the forerunner of the IUOTO. Some of the leading international tourism organizations are listed below

3. International Union of Official Travel Organizations (IUOTO)

It was founded in 1947 and represented by over one hundred national tourism offices of various countries as full members and eighty national and international organizations of both public and private sector, as associate members. Its major task consisted of the stimulation and co-ordination of tourism developments, stimulation and increase of the free flow of persons in the interest of economic development and the strengthening of social and cultural relations. India joined the organization in the year 1950. The important tasks and aims of IUOTO are now carried on by World Tourism Organization.

4. International Civil Aviation Organization (ICAO)

Established in 1947 as a specialized agency of the United Nations, ICAO is an organization of 162 governments for the promotion of civil aviation on a world wide scale. Its headquarters is in Montreal and it has six regional offices in Bangkok, Cairo, Dhaka, Lima, Mexico city and Paris. It provides the machinery for the achievement of International co-operation in the air and the successful result depends upon the willingness of the nations of the world to work together. India has been an elected member of the council of ICAO. The aim and objectives of the organization are to develop the principles and techniques of International air navigation and to foster planning and development of International air transport in order to ensure the safe and orderly growth of International civil aviation throughout the world

5. World Tourism Organisation

The World Tourism Organisation (WTO), an inter-governmental technical body dealing with all aspects of tourism began its legal existence of January, 1975. It came into existence as a result of the transformation of IUOTO and was called upon to succeed it. The swift expansion of travel had created the need for a world body able to deal with tourism problems at the government level, and this led to the transformation of IUOTO into WTO. The headquarters of the organisation were set up in Madrid (Spain) in January 1976.

6. Aims of WTO

The aims of the organisation are defined in Article 3 of the Statute which is divided into the following three sections:

- (a) The fundamental aim of the organisation shall be the promotion and development of tourism with a view to contributing to economic development, international understanding, peace, prosperity and universal respect for, and observance of human rights and fundamental freedoms for all without distinction to either race, sex, language or religion. The organization shall take all appropriate action to attain this objective.
- (b) In pursuing this aim, the organisation shall pay particular attention to the interests of the developing countries in the field of tourism.
- (c) In order to establish its central role in the field of tourism the organisation shall establish and maintain effective collaboration with the appropriate organs of the United Nations and its specialised agencies. In the connection the Organisation shall seek a cooperative relationship with and participation in the activities of the United Nations Development Programme as a participating and executing agency.

7. Pacific Asia Travel Association (PATA)

Pacific Asia Travel Association (PATA) was founded in the year 1951 as a non-profit corporation to stimulate interest in the Pacific region as a vacation land, and to develop, promote and facilitate travel to and among the many Pacific destinations. The Association had 44 Founder Members. The Founder Lorin Thurston, a leading newspaper publisher in Honolulu had an idea to organise all travel from the occident to the Pacific area in a consistent, cohesive and

systematic manner as to ensure maximum benefit from the existing opportunities and the creation of fresh opportunities through multimedia publicity. PATA's first conference was held in January 1952 in Honolulu and its headquarters were established in San Francisco, USA in 1953, PATA has its own Director for Europe who is based in London and works to promote traffic from the European markets into the Pacific region. PATA's first Asian office was opened in Manila, Philippines in 1976.

8.Aims and Objectives of PATA

As a non-profit organisation PATA was set up with the objective of developing, promoting and facilitating travel to and within the Pacific area and South East Asian region. It primarily operates in the United States market which is the world's biggest travel market.

9.Activities of PATA

PATA activities include assisting small and up-and-coming destinations to develop their infrastructure, providing expertise, and planning group travel schemes, destinations, hotels operations and discounts. It provides up-to-date information and practical and theoretical experience in the field of tourism. Through its Research, Development, Education and Marketing Councils, PATA serves as a central source, supporting its diverse membership in tactical marketing programmes for their destinations and products together with training and educational programmes for human resource development.. All members benefit directly or indirectly from the continuing programmes of PATA, which include travel research, marketing, training programmes, and the development of visitor plants and services.

10.Secretariat

The PATA Secretariat located in San Francisco, USA, is the operational hub that links PATA members in all divisions, coordinating PATA's policies plans, administration and finances, memberships and chapters, communications and planning for PATA's Annual Conference.

11. International Air Transport Association (IATA)

In the business of travel, the International Air Transport Association (IATA), the world organisation of scheduled airlines have played a key role since its inception in the year 1945.

A world association of about 200 Active Members and 35 Associate Members, the International Air Transport Association was a result of the rapid expansion in the network of international airlines in the years following the Second World War. A need for the worldwide regulation of air traffic including co-coordinating international air-fares and rates was felt and consequently an international convention was called by President Franklin D. Roosevelt of the United States of America at Chicago from November 1 to December 7, 1944. The Convention constituted two permanent bodies, namely, the international Air Transport Association (IATA) and the International Civil Aviation Organisation (ICAO).

However, before reaching the position that it now occupies in the field of aviation, IATA passed through several stages, in parallel with a spectacular development of commercial aviation. Its modest beginnings date back to 1919 when the International Air Traffic Association was founded in the Hague by half a dozen European airlines that had just been created right from the beginning: they recognised the need to cooperate in setting up a network for rationalising airlines business.

The International Air Traffic Association expanded steadily with the development of air services in the world. Among other things, it drew up the general formula for tickets and transport documents adopted in 1927. The innovations and improvements introduced by the Association progressively placed unique tools at the disposal of the industry.

12. International Civil Aviation Organisation (ICAO)

The convention providing for the establishment of the International Civil Aviation Organisation was drawn up by the International Civil Aviation Conference held in Chicago from November 1 to December 7, 1944. A Provisional International Civil Aviation Organisation (PICAO) functioned from 6 June, 1945 until the formal establishment of ICAO. The International Civil Aviation Organisation (ICAO) was formally established on April 4, 1947 as a specialised agency of the United Nations. ICAO has a membership of over 130 governments joined for the common purpose of promoting civil aviation on a global scale. The headquarters of the organisation are located at Montreal, Canada. The organisation has its regional offices in Mexico city, Lima, Paris, Dakar, Cairo and Bangkok

The International Civil Aviation Organisation representing over 130 governments of various countries throughout the world provides the machinery for the achievement of greater global cooperation in the matters of civil aviation. Over the years the organisation has achieved great success in various matters relating to civil aviation.

13.UFTAA

The UFTAA has formed a national-level travel agency association from more than 84 countries of the world. This travel agency association represents, in turn, more than 20,000 travel agencies of the world. The Federation has been divided into 9 distinct regions. Each region has a group of nations.

The headquarters of the UFTAA are located at Brussels, Belgium. Some of the achievements of the UFTAA are as follows:-

- Active collaboration with the International Rail Union (IRU). This move of the Federation helped it get a commission of 8 per cent from various railway networks. It is also involved in the formulation of professional training courses and introduction of rail-inclusive tours.
- The Federation has tied up with the IATA in regard to air transport. Thus it has been able to get a commission of 8 per cent. It has also been able to get an overriding commission of 4 per cent and a concession of 50 per cent (in air fare) for the spouses of travel agents.
- It has created a set-up to start international correspondence courses for training the airline agency sales staff.
- The Federation has interacted with the International Hotel Association (IHA). Consequently, it has created an international convention, set regulations/rules for bookings in hotels and defined procedures for cancellation of such bookings. It has also clearly defined the cancellation fees after interacting with the IHA. Finally, a court of arbitration has settles disputes between hotel agents and travel agents who may be located in different countries of the world.

Check your progress

I Each answer should not exceed 50 words

- (a) Define ICAO
- (b) Define WTO
- (c) Define UFTAA

II Each answer should not exceed 250 words

- (a) Discuss the aims and activities of PATA
- (b) Write a brief note on IATA

III Each answer should not exceed 500 words

- (a) Explain the objectives and functions of ITDC
- (b) List and explain the Non-governmental organisations in Tourism

11.5 Let us sum up

In this the lesson the role of governmental and nongovernmental organisations in promoting and developing tourism are discussed. ITDC has been playing a crucial and strategic role in ensuring proper dispersal of socio-economic benefits of tourism, promoting national integration and international understanding, helping removal of regional imbalances, generating employment opportunities, augmenting foreign exchange earnings and also acting as a catalyst in the development of tourism in the country. In the field of tourism, organisations emerged with the objective of developing and promoting the subject of tourism. The international organisations in particular have played a key role in strengthening tourism by way of combined efforts and therefore their role is of vital importance.

LESSON 12

TOURISM INDUSTRY IN TAMIL NADU

12.1 Learning Objectives

After reading this lesson, you will be able to

- ❖ learn about tourism in Tamil Nadu and the role of TTDC in promoting tourism in Tamil Nadu

Structure

12.1 Introduction

12.2 Tourism in Tamil Nadu

12.3 Tourism Products

12.4 Tourist Centers in Tamil Nadu

12.5 Tamil Nadu Tourism Development Corporation

12.6 Let us sum up

12.7 Answers to check your progress

12.1 Introduction

Tamil Nadu is a State with multifarious tourist attractions. It has mountains, verdant vegetation, sandy beaches, mammoth monuments, timeless temples, fabulous wildlife, scintillating sculptures and reverberating rural life. It has picturesque spots, continuing heritage, cultural confluence and aesthetic magnificence. Tourism is declared as an “Industry”. Tamil Nadu is ranked first in both domestic and foreign tourist arrivals in 2014 and 2015 consecutively in the country. Many steps are being taken to sustain the top position in both domestic and foreign tourist arrivals in the ensuing years.

12.2 Tourism in Tamil Nadu

Targeted promotional strategies and extensive marketing campaigns through print and electronic media at the national and international levels and creation and up gradation of basic

amenities and infrastructure at tourist destinations have resulted in the increase of tourist arrivals to Tamil Nadu.

Tamil Nadu is a forerunner in tourism sector in the country. Tourism in recent times has transformed from a service sector into a major export industry. The State holds the position of pride with 5 UNESCO Heritage sites in India, being the highest number. The State is well connected with sea ports, best roads and rail connectivity, besides being the only State with four international airports offering direct connectivity to many countries. With peace loving people and good law & order, the State offers right business environment and desired linkages, along with all necessary infrastructure for investors.

1. Growth and Development of Tourism in Tamil Nadu

The Tamil Nadu tourism body comprises the Tourism Department in the secretariat and Directorate of Tourism. Which focuses on formulating policies and implementing programs for the development of the tourism sector in the state. The Tamil Nadu Tourism Development Corporation coordinates the activities of various other government departments and agencies as well as the Private sector.

2. Role Of Tamil Nadu Tourism

As the nodal agency for the development of Tourism in the state, the department plays a crucial role in catalysing private investment, strengthening promotional and marketing efforts and providing trained manpower resources in the sector. In this context ,the secretariat Department handles the following functions

1. All policy matters including :
 - Development policies,
 - Incentives,
 - Man power development.

Growth strategies,

2. Planning,

3. Regulation,
 - Standards,
 - Guidelines
4. Infrastructure and Product Development
 - Central and state Assistance
 - Distribution of Tourism Products
5. Research, Analysis, Monitoring and Evaluation
6. Legislation and Assembly work
7. Establishment Matters
8. Overall Review of the field offices
9. VIP references
10. Welfare, Grievances and protocol
11. Budget coordination and Monitoring

3. The Directorate of Tourism is responsible for the following functions

1. Assistance in the formulation of policies by providing feedback from field offices.
2. Monitoring of plan projects and assisting the plan formulation
3. Coordinating the activities of the field offices and their supervision
4. Inspection and quality control
 - Guide service

 - Field publicity, Promotion and Marketing

- Hospitality programmes
- Conventions and conferences
- 6. Human Resource Development
 - Institutions
 - Setting standards and guidelines
- 7. Publicity and Marketing
 - Policy
 - Media plan
 - strategies
 - co-ordination
 - supervision
- 8. Assistance for assembly work
- 9. Establishment matters of the Directorate of Tourism excluding the officers and those requiring the approval of secretary and minister

4. Tourist Arrivals to Tamilnadu

Aggressive promotion and marketing campaigns through print and electronic media at the domestic, national and international levels and up gradation of basic amenities and infrastructure at the tourist destinations have resulted in the increase of tourist arrivals to Tamil Nadu are furnished below

YEAR	DOMESTIC (in lakhs)	FOREIGN (in lakhs)	TOTAL (in lakhs)
2005	323.4	11.79	335.2
2006	392.1	13.35	405.5
2007	507.5	17.53	524
2008	626.2	20.4	646.6

2012	1841	35.62	1877
2013	2442	39.9	2482
2014	3276	46.58	3322
2015	3335	46.85	3381

Tamil Nadu is ranked first in both domestic and foreign tourist arrivals in 2014 and 2015 consecutively in the country. Many steps are being taken to sustain the Top position in both domestic and foreign tourist arrivals in the ensuing years. The length of stay of an average tourist in Tamil Nadu is 4 to 5 days in the case of a domestic tourist and 7 days in the case of foreign tourist.

5. Goals of Tourism Department

1. Creation of tourist infrastructure facilities at tourist centres with State and Central funds. Tourism Department will encourage tourism entrepreneurs.
2. Conduct of capacity building training programmes to impart quality service to the tourists visiting Tamil Nadu.
3. To enhance service delivery providing adequate and correct tourist information to the tourists Guide Training Programmes are being conducted.
4. For encouragement of Tourism Stakeholders, awareness Seminar programmes will be conducted involving the tourism stakeholders for strengthening the mutual cordial relationships.

12.3 Tourism Products

1. Responsible tourism

TamilNadu tourism has been making ceaseless efforts to promote rural areas. This strategy turns rural areas tourist friendly and thereby develops the socio economic status of local inhabitants .The aim of the responsible tourism is to inculcate the local populace, the sense of responsibility towards the need to preserve the eco fragile systems, the awareness of the best practices and sensitivity to the concerns of guests. In parallel, it also aims to make the visiting tourists more responsive to local culture, conventions and customs and strives to avoid exploitation.

2. Pilgrimage tourism

No Indian state is more dominated by its temples than Tamil Nadu where temple architecture catalogues the tastes of successive dynasties and testifies to the centrality of religion in everyday life. It is also known as the land of temples. The multiplicity in culture and religious performances in Tamil Nadu has led to setting up of several places of worship, which belongs to the followers of diverse religions. Since the Hindus exceed in population their places of worship temples dot the whole landscape. Most temples are built in honour of Lord Shiva, Lord Vishnu and their consorts; all are characterised not only by their design and sculptures but also by constant activity, devotion, dancing, singing, puja, festivals and feasts. Each is tended by Brahmin priests, recognisable by their dhotis, a sacred thread draped over the right shoulder, and marks on the forehead. The Kanyakumari temple of Tamil Nadu is an important center for pilgrimage for years. The Meenakshi temple complex in Madurai in Tamil Nadu is one of the largest in India and the presiding deity at the Meenakshi temple is Goddess Meenakshi. The Ramanathaswamy Temple is one of the most sacred shrines of the Hindus in India and is considered as holy as Varanasi. Pilgrims from all over the world come to pay homage to the deity. The inhabitants of Tamil Nadu also include Muslims, Jews, Jains and Sikhs. A number of Mosques, Synagogues, and Gurudwaras represent the sentiments of their respective religions. Of all the worship places, temples are the oldest. Tamil Nadu was also influenced by Christianity during the Portuguese and British invasions. Hence the travellers will also come across a number of churches.

3. Eco-Tourism

There are several wildlife parks and gardens in Tamil Nadu that make it an interesting spot for the nature lovers. A state that is blessed by so many gods and goddesses is also bound to be blessed by nature's bounty. Its major wildlife sanctuaries Mudumalai and Annamalai are located in the Western Ghats. The hills here provide a safe shelter for elephants, bison, deer, monkeys and, of course, tigers. The forests here are filled with plants with medicinal value. Guindy National Park, in Chennai is a major attraction for all true wildlife enthusiasts. This park is located within the city and it has a few populations of animals. Arignar Anna Zoological Park of Tamil Nadu which is also known as the Vandalur Zoo was the first public zoo

in India. It is a home to more than one hundred and seventy species of mammals, birds and reptiles. The Botanical Garden of the state is an ecstasy for bird watchers where a wide array of birds, both seasonal and year-round residents, can be sighted. The Madumalai National Park is the first wild life sanctuary of south India. Elephant safari and Jungle safari are arranged for interested tourists.

4.Rural Tourism

Tamil Nadu Tourism has decided to develop and promote rural tourism in order to showcase rural life, art, culture and the heritage of rural locations in villages and to benefit the local community economically and socially as well as to enable interaction between tourists and local populations for a mutually enriching experience. The Ministry of Tourism, Government of India, has partnered with the UNDP for endogenous Rural Tourism in the form of Pilot projects for capacity building. The concept of rural tourism was highlighted in the trade fair and rural life was depicted in all its authenticity and this happened to become the cynosure of all eyes for the visitors to the Trade fair, Chennai.

5.Adventure Tourism

Tamil Nadu Tourism is promoting adventure tourism activities in all tourist spots. Adventure boats are available at Muttukadu and Mudaliarkuppam. Trekking equipment is given on hire to the tourists by Tamil Nadu tourism. TamilNadu tourism is also coordinating with the Youth Hostels Association of India in conducting trekking programmes in the hilly regions. Water scooters, speed boats, Kayaks and Banana boats in Mudaliarkkupam provide thrill to the youngsters. Paragliding in Yelagiri attracted tourists in large numbers.

6.Medical Tourism

Tamil Nadu provides high standards of health care to people from all over the world. Ultra modern corporate hospitals, talented medical professionals, state of the art medical facilities and large number of government hospitals have helped patients from various parts of the country and world to come ,convalesce and return with good health. The Department of tourism has realised that it is essential to provide facilities for them to visit places of interest and tourist attraction, so that they can recuperate and get rejuvenated speedily.

7. Leisure Tourism

The first thing that comes to the mind while speaking of leisure tourism in Tamil Nadu is its sun kissed beaches. The beaches in Tamil Nadu are calmer than most part of India. Some of the beaches here are Marina, Mahabalipuram, and Rameshwaram. The beaches of Tamil Nadu, the southernmost state of India have got a charm of their own. A must visit is the second longest beach in the world, Marina Beach in Chennai, the capital city of Tamil Nadu. One of the important reasons for the booming tourism industry in Tamil Nadu is the much coveted hill stations which attracts tourist from across the globe. The Ooty and Kodaikanal hill stations are renowned all across the world.

8. Heritage Tourism

Tamil Nadu is a home to many beautiful forts which were established around 17th and 18th centuries. British established their first major fort in Tamil Nadu and most of the forts in state are built by them. These majestic forts are popular destinations for the tourists. The Ginjee Fort was established in the 9th century under the reign of the Cholas. At present the fort has been transformed to a museum where the visitors can get an opportunity to perceive many historical buildings like prison cell, the granaries, the Kalyan Mahal and Chenjamman Temple. The Fort St. George built in the 17th century is noted for its rich historical significance. The fort has eye-witnessed some eminent battles in the 18th century. The other important forts of Tamil Nadu are Vettakottai Fort, Sankagiri Fort, and Dindigul Fort. The palaces are an integral part of tourism in Tamil Nadu. The Shivaganga Palace in the Shivaganga district of Tamil Nadu is appreciated for its architectural beauty. The Tanjavur palace in Trichy houses a library, a Museum and an Art Gallery. The magnificent palaces in Tamil Nadu are a major crowd puller. The Rameshwaram beach is ideal for sunbathing, swimming and watch dolphins playing in the waters. The Elliot's beach is lined with fast food joints, shrines and souvenir stalls and is a well known hub with the youths. The heritage sites in Tamil Nadu are worth a watch. The heritage sites at Mahabalipuram, Kanyakumari, and Rameshwaram are well conserved for the tourists who keep concern and interest in the heritage of India.

12.4 Tourist Centres in Tamil Nadu

1. Hill Stations

Tamil Nadu has excellent hill stations like ooty, kodaikanal, Yercaud, Yelagiri, Javadhu hills, kolli hills, Sirumalai hills, Valparai, Topslip, Parvathamala hills and Pachamalai hills

The 42nd India Tourist and Industrial Fair was inaugurated at Island Grounds, Chennai on 11.01.2016. All the Government Departments had erected their Pavilions in an attractive manner showcasing various Welfare Schemes and Development programmes of the State Government through attractive working models

4. Marketing initiatives of TTDC - Tie-up

- _ Tie-up arrangements have been made for online booking of TTDC Hotels and Tours.
- _ Tie-up arrangements have been made with Air India for providing Holiday Home facilities at TTDC Hotels and earned revenue of Rs.10 lakhs during the year 2015-2016.
- _ Initiatives were taken for holding Conferences/Workshops by leading Companies at Beach Resort Complex, Mamallapuram

5. Marketing initiatives of TTDC - Holiday Home

Tie-up arrangements have been made for online booking of TTDC Hotels and Tours. Tie-up arrangements have been made with Air

India for providing Holiday Home facilities at TTDC Hotels and earned revenue of Rs.10 lakhs during the year 2015-2016. Initiatives were taken for holding Conferences/Workshops by leading Companies at Beach Resort Complex, Mamallapuram.

E- Governance initiatives of TTDC

TTDC earned the distinction of being the first State Tourism Corporation to introduce on-line booking of Tours and Hotels inaugurated by the Hon'ble Chief Minister of Tamil Nadu during July 2004. This has helped TTDC to improve its revenue significantly through online bookings of Tours and Hotels. The facility of online reservation of TTDC Hotels was earlier provided to only 17 Hotels. It has been extended to cover all the 22 Hotels operated by TTDC.

Mobile reservation of TTDC Hotels and Tours was launched by the Hon'ble Chief Minister of Tamil Nadu on the World Tourism Day i.e. 27th September 2012. This has helped the tourists to book TTDC Hotels and Tours through all the mobile networks.

The facility of online reservation of TTDC Hotels was earlier provided to only 17 Hotels. It has been extended to cover all the 22 Hotels operated by TTDC.

The revenue generated through On-line Bookings is Rs.10.07 Crores during 2015-2016 compared to the revenue of Rs.10.04 Crores earned during the previous year.

6. Public Relations

(i) Advertisement

Tamil Nadu tourism launched a series of international and domestic print campaigns which were released in various international in-flight magazines and other leading travel magazine as well. Advertisement on event and occasion specific campaigns like summer campaign, Mamallapuram Dance festival, Rail cum road tours were released in various leading news papers and magazines. Periodically advertisement on local events and festivals related to domestic tourism are publicized in vernacular dailies and magazines. Regularly, audio and visual advertisements figure in radio and television media, apart from stories on innovative tourism projects.

(ii) Tourist literature

Printing of informative folders and books, hi-tech media products of compact discs, DVDS in 25 min and 6min duration etc. are one of the essential dissemination tools provided to the tourist .

Thoorigaiyil Thamizhagam (Tamil Nadu in Colours)

A colorful “Coffee Table Book” named Thoorigaiyil Thamizhagam has been produced with private-public partnership, depicting art forms and cultural dimensions of Tamil Nadu and important tourist places. This coffee table book with beautiful paintings by eminent artists of Tamil Nadu has versions in Tamil, English, French and German with concise information on the paintings and their significance in the Tamil Nadu context.

(iii) News Letter

Realizing the importance of dissemination of information to the stakeholders, a monthly newsletter is being brought out. These are distributed among the GOI Tourist offices in India, Tamil Nadu tourism offices across the country and all tour operators ,travel agents and hoteliers. All major news pertaining to various activities that the tourism department is engaged in and important tourism related events are highlighted in the news letter.

(iv) Website Management and other IT services

Various initiatives have been taken in the direction of providing quality tourist information facilities and services to the tourists, tourism promotional agencies, media and others in the state and outside the state. some of the major initiatives taken are below:

- Website : www.tamilnadutourism.org- the main promotional portal of Tamil Nadu tourism

(v) Virtual Museum

The Government museum at Egmore is one of the premier museums in the country. It has several facilities to understand and comprehend our culture. Tamil Nadu Tourism is going to cover all the galleries of the museum and post it on the website. It will help the tourist to view the magnificence of the museum. More number of tourists are expected to visit the museum after this initiative.

7. Hotel Management system

TTDC has introduced the Hotel Management system(HMS) for a chain of hotels. The entire front office operation of TTDC hotels has been covered via this system. It has been established in 12 TTDC hotels. The HMS covers major functional areas such as Various types of bookings, phone or email reservation, online reservation and walk in etc, check in and check out. guest history. computerised bills etc.
